<i>Preface</i>	<i>page xi</i>
1 Introduction	1
2 Pareto optimality in a market economy	10
2.1 The Pareto criterion	10
2.2 General equilibrium in a market economy	11
2.3 The Pareto criterion in a market economy	15
2.4 A concluding remark	21
3 The compensation principle and the social welfare function	22
3.1 The compensation principle	22
3.2 The social welfare function	27
3.3 Measurability and comparability	29
3.4 The optimal distribution of welfare and income	32
3.5 Concluding remarks	39
4 Measuring welfare changes	40
4.1 Consumer surplus	40
4.2 Multiple price changes	42
4.3 Aggregation of consumer surplus	47
4.4 Compensating and equivalent variations	49
4.5 Some further results	53
4.6 Welfare measures for firms	56
4.7 Concluding remarks	58
5 Market failures – causes and welfare consequences	60
5.1 Decreasing average costs	60
5.2 Monopoly	61
5.3 Public goods	63
5.4 External effects	64

5.5	Market imbalances	66
5.6	Other sources of market failures	68
5.7	Market failures as a prisoner's dilemma	68
5.8	Concluding remarks	70
6	Public choice	71
6.1	Efficient provision of public goods	71
6.2	The typical taxpayer	76
6.3	Lindahl equilibrium	78
6.4	The median voter equilibrium	79
6.5	What do voters and bureaucrats maximize?	81
7	A 'Smorgasbord' of further topics	86
7.1	Property rights, policy instruments, and the depletion of stratospheric ozone	86
7.2	Coase's theorem	89
7.3	Local public goods	92
7.4	Pareto-efficient and optimal taxation	92
7.5	Intergenerational equity	97
7.6	On the possibility of a Paretian liberal	99
8	How to overcome the problem of preference revelation: practical methodologies	102
8.1	Survey data	102
8.2	The Clarke–Groves mechanism	106
8.3	The travel costs method	108
8.4	Hedonic prices	110
9	Cost-benefit analysis	112
9.1	Preliminaries	113
9.2	Taxes on inputs and outputs	116
9.3	Imperfect competition in input markets	118
9.4	Externalities	120
9.5	Unemployed resources	121
9.6	Trade restrictions	124
9.7	Use of present value	126
9.8	Choice of discount rate	128
9.9	Distributional considerations	131
9.10	Sensitivity analysis	133
9.11	Concluding remarks	133
10	The treatment of risk	135
10.1	A first example	135
10.2	Attitudes towards risk	137

10.3	Welfare analysis of risky projects	139
10.4	The value of information and irreversible consequences	144
10.5	A concluding remark	145
Appendix:	The consumer and the firm	147
A1	Preferences and the utility function	147
A2	Utility maximization and demand functions	152
A3	Substitution and income effects	154
A4	The perfectly competitive firm	157
A5	Cost minimization and profit maximization	159
A6	Some further notes	163
