

# Table of Contents

Preface	XIII
Conference organization	XV
Partners, Sponsors and Exhibitors	XVII

## INVITED LECTURES

The Influence of R&D on the Design, Construction and Damage Assessment of Large Cooling Towers <i>P. L. Gould</i>	3
Giga-Shells for Energy Generation: Natural Draft Cooling Towers and Solar Updraft Chimneys <i>W. B. Krätzig</i>	17
The Structural Reliability of Cooling Towers under Wind Hazard Considering Extreme Wind Statistics with an Upper Limit <i>H.-J. Niemann, S. Diburk</i>	29

## THERMODYNAMICS

Evaluation of Natural Draft Wet Cooling Tower Performance Based on Numerical Aero-thermodynamic Analyses <i>A. Haj Ayed, K. Kusterer, H. Strangfeld, T. Herinx</i>	43
Cooling of Low-Temperature Power Plants – Challenges for the Example of Geothermal Binary Power Plants <i>S. Frick, A. Saadat, S. Kranz</i>	53
Selecting Optimum Combination of Wet and Heller Cooling Tower for Reduction of Wet Cooling Tower Make Up Water <i>G. Ghezelasheghi</i>	61

Plume Simulation of Natural Draught Cooling Towers <i>K. Grasemann, F. Mohasseb, N. Wieners, G. Reymann</i>	69
Interaction between Mechanical Parts and Structure on Cooling Towers <i>A. Hennecke</i>	75
CO <sub>2</sub> Reduction by Cooling Tower Retrofit Measures <i>F. Mohasseb, H. Stiens, G. Reymann, M. Braunsburger, J. Torkar</i>	83
Development of a Spray System that Provides a Uniform Water Distribution with Minimal Pump Head <i>D. Roux, H. Reuter</i>	91
Development of Drop Breakup Devices for Enhancement of Cooling Tower Rain Zone Performance <i>R. Terblanche, H. Reuter</i>	99
Optimal <i>Legionella</i> Control for Cooling Towers using Biofilm Monitoring and Isothiazoline Dosing <i>L. P. Venhuis</i>	111
Determination of Efficacy of Applied Pre-Treatment and Cooling Water Treatment Programs for Industrial Cooling Tower Systems <i>L. P. Venhuis</i>	119
Potential of Improving of Efficiency and Savings of CO <sub>2</sub> Emissions through Cold End Optimization of Existing Power Plants <i>V. Vrangos, M. Roth</i>	127
Investigation of Cooling Tower Thermodynamic Calculation in AP1000 Nuclear Power Units' Conventional Island <i>L. Zhang, L. Tang, C. Yi, Z. Liu, H. Wu</i>	135

## WIND AND THERMAL ACTION

Numerical Investigation of Interference Effects on Wind Pressure on a Group of Large Scale Cooling Towers <i>F. Cao, Y.-J. Ge, L. Zhao</i>	145
Aerodynamic and Aeroelastic Performance of Super-Large Cooling Tower based on Wind Tunnel Tests <i>Y.-J. Ge, L. Zhao</i>	153
Effects of Atmospheric and Operational Thermal Conditions on the Structural Integrity of Cooling Tower Shells <i>R. Harte, H. Reuter, R. Wörmann</i>	161

Local Stresses at Openings of Cooling Towers due to Wind Action <i>M. Simon, N. Herzog</i>	171
Fire Tests for the Packing Material for EDF <i>H. Troncin</i>	179
The Numerical Research on Fog Plume Diffusion from the Outlet of Cooling Towers at Inland AP1000 Nuclear Power Units <i>L. Zhang, C. Yi, L. Tang, Z. Liu</i>	185
Investigation of Surface Roughness and its Influence to Flow Dynamic Characteristics of Hyperbolic Cooling Tower <i>L. Zhao, X.-X. Cheng, R. Dong, Y.-J. Ge</i>	191
Extreme Value Estimation of Non-Gaussian Aerodynamic Series of Cooling Tower <i>L. Zhao, S.-T. Ke, Y.-J. Ge</i>	199

## STRUCTURAL DESIGN

Safety Analysis and Rehabilitation of a Natural Draft Cooling Tower at the Power Plant of Niederaußern <i>F. Altmeyer, H. Scharf</i>	209
Cooling Tower Practice in Different Countries with and without Consideration of VGB Guidelines <i>M. Andres, U. Eckstein, J. Peters, N.K. Suryanarayanan</i>	217
Numerical Studies on Cooling Tower Shells Made of Steel Fibre Modified Reinforced Concrete <i>J. Bockhold</i>	223
VGB Standards for RC Cooling Towers – Design, Construction and Maintenance <i>H. Eggers, J. Lenz, R. Meiswinkel</i>	231
Numerical Evaluation of Repaired Cooling Tower Shell after Damaging <i>T. Hara</i>	239
Performance-Based Evaluation of Steel Hyperbolic Cooling Towers using Diagonal Grid System <i>M. Izadi, K. Bargi</i>	247
Computer Aided Design of Natural Draft Cooling Towers – Own Tailored Software Design for Special Requirements <i>C. Lang</i>	255
Basic Design for Structure of Indirect Air Cooling Tower in Qinling Power Plant <i>Q. Li, P. Ren</i>	263

Influence of Cooling Tower Shell Shape on Structural Behaviour <i>S.-Y. Noh, R. Harte, S.-Y. Lee</i>	273
Technologies and Development of Object-Related Constructions for Cooling Tower Maintenance <i>J. Teupe</i>	283
Re-Recognition of the BSS Approach for Hyperboloidal Cooling Towers <i>J.F. Zhang, S.-T. Ke, L. Zhao, Y.-J. Ge</i>	291

## SOIL-STRUCTURE-INTERACTION

Structural Interaction between Cooling Towers and Subsoil Based on Executed Projects <i>U. Eckstein, D. Placzek, R. Wörmann</i>	301
Analysis of Ground Dynamical Response to Natural Draft Cooling Tower Collapse in Nuclear Power Plant. <i>B. Limbourg, B. Grogna</i>	311
Cracks and Steel Stresses in a Cooling Tower Caused by Settlements of Column Footings <i>P. Noakowski, M. Breddermann, A. Harling, M. Rost</i>	319
Investigation of the Impact of Differential Settlements on Cooling Tower Shells <i>K. Stopp, R. Harte, B. Titze</i>	329
Duisburg-Walsum Cooling Tower 10 – Foundation by Means of Driven Cast-in-Situ Concrete Piles and Vibro Stone Columns in Difficult Building Ground Conditions <i>H. Wolf, J. Bosenick</i>	337

## CONCRETE TECHNOLOGY AND CONSTRUCTION METHODS

The Quality Control during the Construction of the Cooling Towers at the RWE Power Stations <i>D. Busch, J. Meyer, U. Ohlmann</i>	349
5D Digital Construction Process: the Use of BIM in Construction Processes <i>K. Kessoudis</i>	357
Cooling Tower Belchatow – Construction Aspects <i>M. Kociniak</i>	363

Performance of Concrete with Increased Acid Resistance for Natural Draught Cooling Towers 371  
*C. Rieck, R. Hüttl, D. Busch*

Concrete Repair on Natural Draft Cooling Towers 379  
*H. Stahl*

## LIFE-TIME-MANAGEMENT

Statistical Analysis of the Load Carrying Capacity of Natural Draught Cooling Towers 389  
*M. A. Ahrens, J. Bockhold*

Monitoring of Reinforced Concrete Draught Cooling Towers as a Guide for Maintenance and Repair Strategy 397  
*A. Courtois, Y. Genest*

Probabilistic Approaches for Lifetime Management of Cooling Towers - Benefits & Challenges 407  
*J. Gerlach, L. Lohaus*

Life Cycle Management of Cooling Towers: Monitoring, Documentation, Simulation 417  
*T. Pfister, A. Rabe, N. Fickler, J. Meyer*

SCANSITES 3D®: the Method to Fingerprint the Structural Health of Cooling Towers 425  
*S. Piot, H. Lançon, G. Camp, P. Carraud*

## MAINTENANCE AND REPAIR

Fitness Study of Degraded Cooling Towers under Additional Wind Interference due to New Power Plant Buildings 437  
*M. Andres, R. Harte, N. Hölscher, H.-J. Niemann, M. Tschersich*

Overloading, Failure & Rehabilitation of an FGD Exhaust Duct Support 447  
*M. Angelides*

Protection of the Surface Zone of Concrete Structures by Using Capillary Transported Hydrophobic Fluids 455  
*S. Bruder, H. Lehmann*

Carbon Fiber Reinforced Shotcrete 463  
*F. Eberth*

Prognosis Model on Deterioration and Damage of Shell Insides under FGD and about Adapted Protection Measures 469  
*H. Eisenkrein*

Continuous Measuring of Moving Crack Width of Severing Meridian Cracks in Cooling Tower Shells Caused by External Influences <i>H. Eisenkrein, R. Engelfried, A. Dorge, R. Wörmann</i>	477
Polymer-Coated Cooling Tower Shell Insides with Vertical Flue Gas Inlet Low Level. Status Analysis and Refurbishment after 15 Years of Operational and Environmental Impacts <i>R. Engelfried, M. Graf, H. Eisenkrein</i>	485
AGENDA 2030: Ploymer-Coated Insides of 14 Natural Draught Cooling Towers with Horizontal Flue Gas Inlet Low Level – Monitoring System to Ensure a Long Term Operational Time <i>R. Engelfried, U. Siegert, H. Eisenkrein</i>	495
Material Related Status quo Analysis of the Concrete of a Cooling Tower in Normal Operation with the Aim to Predict the Long Term Behaviour <i>R. Engelfried, P. Vögtlin, H. Eisenkrein</i>	503
The Long-Term Protection of Interior Shells of Cooling Towers with Respect to Today's Challenges and Future Developments <i>P. Heine, R. Martin, H. Schwarze</i>	513
Assessment and Repair of Delaminated Concrete Mantles to Cooling Towers in the East Midlands, England <i>B. Knight</i>	521
Use of an Electrochemical Method Coupled with Ground Penetrating Radar for the Detection of Corrosion of Reinforced Concrete on Cooling Towers <i>M.-E. Mitzithra, F. Deby, S. Laurens, J. Salin, P. Stephan, A. de Chillaz, D. François, G. Moreau, J. P. Balayssac</i>	529
Steps to Automation of Cooling Tower Monitoring <i>L. Petersen, L. Lohaus, B. Titze</i>	539
Structural Repairs to Hyperbolic Cooling Tower and Access Issues <i>D. Smith, A. Kelly</i>	547

## HYBRID COOLING TOWER MOORBURG

Challenges in the Planning and Implementation Concerning the Creation of the Moorburg Hybrid Cooling Tower <i>R. Haupt, L. Emde, A. Rabe</i>	555
Structural Calculation of Hybrid Cooling Towers <i>S. Höhler, T. Vossen, D. Lehnen</i>	567
Notice of Approval for the Power Plant Moorburg: The Birth of the Hybrid Cooling Tower <i>S. Meyer, B. Titze</i>	575

Buffeting Wind Load, Wind Load Effects and Equivalent Static Wind Pressures for the Design of Hybrid Cooling Towers <i>H.-J. Niemann, N. Hölscher, W. Hubert</i>	583
Hybrid CT Moorburg - A Challenge in Design and Execution <i>J. Peters, F. Bouton, N. Zalewski</i>	595

## FUTURE DEVELOPMENTS

Hybrid Natural Draft Steel Cooling Tower for Geothermal Power Plant Applications <i>Z. Guan, Z. Zou, H. Gurgenci</i>	607
Solar Updraft Towers: the Latest Wind Tunnel Results and the Current Comparative Studies <i>F. Lupi, C. Borri, H.-J. Niemann</i>	617
The 16th IAHR Cooling Tower and Air-Cooled Heat Exchanger Conference Presentation <i>A. Piatruchy</i>	627
Author Index	633
