

Contents

Preface	vii
Software notes on the original columns	xiii
Graphing distributions	1
Graphing categorical and compositional data	24
Graphing agreement and disagreement	50
Graphing model diagnostics	71
Density probability plots	98
The protean quantile plot	113
Smoothing in various directions	132
Graphs for all seasons	152
Turning over a new leaf	175
Spineplots and their kin	196
Between tables and graphs	213
Creating and varying box plots	234
Creating and varying box plots: Correction	253
Paired, parallel, or profile plots for changes, correlations, and other comparisons	256
The statsby strategy	275
Graphing subsets	284
Transforming the time axis	296
Axis practice, or what goes where on a graph	306
Trimming to taste	319
