

# Contents

<b>PREFACE</b>	<b>vii</b>
1 Introduction and Unifying Principles	1
2 Ultraviolet and Visible Spectrophotometry	83
3 Infrared Spectrophotometry	155
4 Emission Spectroscopy	245
5 Flame Photometry, Atomic Absorption Spectroscopy, and Atomic Fluorescence Spectroscopy	277
6 Raman Spectroscopy	315
7 Microwave Spectroscopy	359
8 Fluorometry and Phosphorimetry	381
9 Refractometry and Interferometry	411
10 Spectropolarimetry and Circular-dichroism Spectrometry	431
11 Turbidimetry and Nephelometry	451
12 X-ray Methods: Absorption, Emission, and Diffraction	463

**vi CONTENTS**

13	Nuclear Magnetic Resonance and Electron Spin Resonance Spectroscopy	487
14	Gamma-ray Spectroscopy and Mössbauer Spectroscopy	579
<b>APPENDICES</b>		
A	Supplementary Definitions and Principles	611
B	Tables	619
	<b>INDEX</b>	<b>621</b>
