LIST OF CONTRIBUTORS . . . . .	v
FOREWORD . . . . .	vii
PREFACE . . . . .	ix
CONTENTS OF PREVIOUS AND FUTURE VOLUMES . . . . .	xiii

### Chapter 1 / Some Aspects of the Thermodynamic and Transport Behavior of Electrolytes

*B. E. Conway*

I. Scope . . . . .	1
II. Introduction . . . . .	2
III. Origin of Ions in Solution . . . . .	5
IV. Solvation of Ions in Water and Nonaqueous Solvents . . . . .	7
V. Ionization of Acids and Bases . . . . .	50
VI. Volumes of Ions in Solution . . . . .	59
VII. Thermodynamics of Long-Range Interaction Effects in Ionic Solutions . . . . .	69
VIII. Ion Association . . . . .	92
IX. Ion Transport: Conductance and Diffusion . . . . .	120
X. Special Types of Electrolytes . . . . .	155
References . . . . .	157

### Chapter 2 / The Electrical Double Layer

*C. A. Barlow, Jr.*

I. General Discussion . . . . .	167
II. Electrodes and Electrode Reactions . . . . .	181
III. Thermodynamics . . . . .	189
IV. Common Experiments and Their Interpretation . . . . .	197
V. Diffuse Layer Theory . . . . .	204
VI. Compact Layer Theory without Adsorption . . . . .	220
VII. Compact Layer Theory with Adsorption . . . . .	233
VIII. Experimental Advances . . . . .	241
References . . . . .	244

**Chapter 3 / Principles of Electrode Kinetics***Terrell N. Andersen and Henry Eyring*

I. Introduction . . . . .	247
II. Kinetics of Simple Electrode Reactions . . . . .	250
III. Influence of Mass Transfer . . . . .	265
IV. Electrode Reactions Involving More than One Step . . . . .	280
V. Double-Layer Effects on Electrode Kinetics . . . . .	301
VI. Kinetics of Reactions Involving Specific Adsorption of Reactants, Intermediates, or Products . . . . .	315
VII. Electrocatalysis . . . . .	331
References . . . . .	340

**Chapter 4 / Techniques for the Study of Electrode Processes***Ernest Yeager and Jaroslav Kuta*

I. Introduction . . . . .	346
II. Critical Equations and Definitions . . . . .	347
III. Classification of Methods . . . . .	356
IV. Steady-State Potentiostatic and Galvanostatic Methods . . . . .	357
V. Non-Steady-State Potentiostatic, Galvanostatic, and Coulostatic Methods . . . . .	375
VI. Other Perturbation Methods . . . . .	434
VII. Other Techniques for the Study of Electrode Interfaces and Electrode Processes . . . . .	437
VIII. Computer Techniques in Electrode Kinetic Studies . . . . .	445
IX. Overall Perspective . . . . .	447
List of Symbols . . . . .	448
References . . . . .	451

**Chapter 5 / Semiconductor Electrochemistry***Heinz Gerischer*

I. General . . . . .	463
II. Electrical Double Layer at Semiconductor-Electrolyte Interface . . . . .	467
III. Electron Transfer Reactions . . . . .	488
IV. Electrolytic Processes with Chemical Change of the Semiconductor . . . . .	520
List of Symbols . . . . .	536
References . . . . .	540
