

# CONTENTS

Introduction .....	1
PART I. THE REPRESENTATION OF MULTICOMPONENT SYSTEMS BY THE METHOD OF OPTIMUM PROJECTIONS	
Characteristic Features of the Optimum Projections of Four-Dimensional Figures on Coordinate Planes .....	9
Optimum Planar Projections of Multidimensional Figures Representing Systems of the First and Second Classes .....	17
Optimum Planar Projections of Multidimensional Figures Representing Systems of the Third Class .....	23
Optimum Planar Projections of Multidimensional Figures Representing Systems of Higher Classes .....	27
Optimum Projections of Some Four-Dimensional Figures in Three-Dimensional Space .....	35
PART II. EXAMPLES OF THE PREDICTION OF THE PROPERTIES OF MULTICOMPONENT SYSTEMS ON THE BASIS OF THE OPTIMUM PROJECTIONS METHOD	
Interpolation and Extrapolation Within the Ranges of Crystallization of Identical Phases of the System .....	43
Fusion Diagram of the Six-Component System Fe-Ni-Cr-Mn-Cu-Co .....	47
Prediction of the Melting Points of Certain Compositions in the Ni-Ti-Cr-Mo-W-Nb System .....	53
Provisional 25°C Solubility Isotherm for the Ten-Component System Ba, In, Be, Na, Cd, Co, Cu, Li // Cl, Br + H <sub>2</sub> O .....	61
The River System and Problems of the Classification of Natural Waters .....	65
Phase Diagram of the Seven-Component System K, Na, Li, TI // F, Cl, NO <sub>3</sub> , SO <sub>4</sub> in the Range of Crystallization of Potassium Chloride .....	73
Solubility Polythermal for the System K <sup>+</sup> , Na <sup>+</sup> // Cl <sup>-</sup> , SO <sub>4</sub> <sup>2-</sup> , Cr <sub>2</sub> O <sub>7</sub> <sup>2-</sup> - H <sub>2</sub> O .....	77
Literature Cited .....	81
