<i>Acronyms</i>	<i>page</i> ix
<i>Notation</i>	xiii
<i>Preface</i>	xv
1 Introduction to the World of Sparsity	1
1.1 Sparse Representation	1
1.2 From Fourier to Wavelets	5
1.3 From Wavelets to Overcomplete Representations	6
1.4 Novel Applications of the Wavelet and Curvelet Transforms	8
1.5 Summary	15
2 The Wavelet Transform	16
2.1 Introduction	16
2.2 The Continuous Wavelet Transform	16
2.3 Examples of Wavelet Functions	18
2.4 Continuous Wavelet Transform Algorithm	21
2.5 The Discrete Wavelet Transform	22
2.6 Nondyadic Resolution Factor	28
2.7 The Lifting Scheme	31
2.8 Wavelet Packets	34
2.9 Guided Numerical Experiments	38
2.10 Summary	44
3 Redundant Wavelet Transform	45
3.1 Introduction	45
3.2 The Undecimated Wavelet Transform	46
3.3 Partially Decimated Wavelet Transform	49
3.4 The Dual-Tree Complex Wavelet Transform	51
3.5 Isotropic Undecimated Wavelet Transform: Starlet Transform	53
3.6 Nonorthogonal Filter Bank Design	58
3.7 Pyramidal Wavelet Transform	64

3.8	Guided Numerical Experiments	69
3.9	Summary	74
4	Nonlinear Multiscale Transforms	75
4.1	Introduction	75
4.2	Decimated Nonlinear Transform	75
4.3	Multiscale Transform and Mathematical Morphology	77
4.4	Multiresolution Based on the Median Transform	81
4.5	Guided Numerical Experiments	86
4.6	Summary	88
5	The Ridgelet and Curvelet Transforms	89
5.1	Introduction	89
5.2	Background and Example	89
5.3	Ridgelets	91
5.4	Curvelets	100
5.5	Curvelets and Contrast Enhancement	110
5.6	Guided Numerical Experiments	112
5.7	Summary	118
6	Sparsity and Noise Removal	119
6.1	Introduction	119
6.2	Term-By-Term Nonlinear Denoising	120
6.3	Block Nonlinear Denoising	127
6.4	Beyond Additive Gaussian Noise	132
6.5	Poisson Noise and the Haar Transform	134
6.6	Poisson Noise with Low Counts	136
6.7	Guided Numerical Experiments	143
6.8	Summary	145
7	Linear Inverse Problems	149
7.1	Introduction	149
7.2	Sparsity-Regularized Linear Inverse Problems	151
7.3	Monotone Operator Splitting Framework	152
7.4	Selected Problems and Algorithms	160
7.5	Sparsity Penalty with Analysis Prior	170
7.6	Other Sparsity-Regularized Inverse Problems	172
7.7	General Discussion: Sparsity, Inverse Problems, and Iterative Thresholding	174
7.8	Guided Numerical Experiments	176
7.9	Summary	178
8	Morphological Diversity	180
8.1	Introduction	180
8.2	Dictionary and Fast Transformation	183
8.3	Combined Denoising	183
8.4	Combined Deconvolution	188
8.5	Morphological Component Analysis	190

8.6	Texture-Cartoon Separation	198
8.7	Inpainting	204
8.8	Guided Numerical Experiments	210
8.9	Summary	216
9	Sparse Blind Source Separation	218
9.1	Introduction	218
9.2	Independent Component Analysis	220
9.3	Sparsity and Multichannel Data	224
9.4	Morphological Diversity and Blind Source Separation	226
9.5	Illustrative Experiments	237
9.6	Guided Numerical Experiments	242
9.7	Summary	244
10	Multiscale Geometric Analysis on the Sphere	245
10.1	Introduction	245
10.2	Data on the Sphere	246
10.3	Orthogonal Haar Wavelets on the Sphere	248
10.4	Continuous Wavelets on the Sphere	249
10.5	Redundant Wavelet Transform on the Sphere with Exact Reconstruction	253
10.6	Curvelet Transform on the Sphere	261
10.7	Restoration and Decomposition on the Sphere	266
10.8	Applications	269
10.9	Guided Numerical Experiments	272
10.10	Summary	276
11	Compressed Sensing	277
11.1	Introduction	277
11.2	Incoherence and Sparsity	278
11.3	The Sensing Protocol	278
11.4	Stable Compressed Sensing	280
11.5	Designing Good Matrices: Random Sensing	282
11.6	Sensing with Redundant Dictionaries	283
11.7	Compressed Sensing in Space Science	283
11.8	Guided Numerical Experiments	285
11.9	Summary	286
	<i>References</i>	289
	<i>List of Algorithms</i>	311
	<i>Index</i>	313
