

Contents

	<i>Preface</i>	<i>page xi</i>
1	Introduction: research perspectives	1
	Development of research on preschool children and of observational studies in preschool settings	4
	Preschool provision: the present situation in Britain	17
	Plan of the book	18
2	Research philosophy and methods	21
	Observation and experiment	21
	Setting up the playgroup	24
	Two independent groups	28
	Data collection methods	31
	Direct observation and effects of observer	33
	Behaviour categories	35
	Inter-observer agreement	40
	Time-sampling procedures	43
3	Preschool behaviour and the physical environment: a review	50
	Choice of toys and the design of play environments	50
	Behavioural effects of crowding	52
	Crowding in the preschool	55
	A reconceptualisation of crowding experiments	58
	Research programme	60
4	Number of children in the group	61
	Population sample and group size variations	61
	Commensurate resource variations	64

	Observational methods	68
	Methods of analysis	68
	Results	70
	Summary	98
5	Amounts of space and play equipment	100
	Population sample	100
	Resource variations	100
	Observational methods	103
	Methods of analysis	104
	Results	105
	Summary	151
6	Subsidiary studies on physical resources	154
	Further study of spatial variation	154
	Population sample and resource variations	155
	Observational methods and methods of analysis	156
	Results	158
	Further study of equipment variations	168
	Population sample and resource variations	169
	Observational methods and methods of analysis	170
	Results	171
	Observations for short periods with no equipment present	175
	Study of effects of different kinds of play equipment	177
	Population sample and resource variations	177
	Observational methods and methods of analysis	178
	Results	178
7	Preschool behaviour and the physical environment: comparison of the separate studies with each other and with previous research	183
	Effects of spatial density and amount of space	184
	Effects of equipment density and amount of play equipment	185
	Effects of number of children	186
	Effects of kinds of play equipment	187
	Comparison with previous research	188
	Summary	196

8	Studies of preschool curricula and staff:child ratio: a review	197
	The effects of different preschool curricula: correlational studies	197
	The effects of different preschool curricula: experimental studies	201
	Staff participation and teacher:child ratios	205
	Studies of teacher-child contacts and their unequal distribution in classrooms	205
	Studies of teacher:child ratios	207
9	A comparison of structured-activities and free-play conditions	209
	Population sample	209
	Structured-activities and free-play regimes	210
	Timetabling of differing regimes	213
	Observational methods and assessment procedures	213
	Methods of analysis	219
	Results	220
	Summary	249
10	Variations in staff:child ratio in structured-activities conditions	253
	Population sample and variations in number of children	253
	Organisation of activities and variations in numbers of staff	254
	Staff:child ratios and observational schedules	255
	Observational methods and rating procedures	256
	Results	263
	Summary	283
11	Structured activities in the preschool: comparison of present studies with previous research	286
	Structured and unstructured activities in the preschool	286
	Aggressive behaviour	288
	Rough-and-tumble play	290
	Fantasy play	291
	Attention span	294
	Staff-child interaction and the effects of staff:child ratio	297
	Kinds of staff-child interaction and their distribution	297

	Effects of staff:child ratio on interactions and their distribution	299
	Summary	302
12	Implications and applications	304
	General approach and methodology: summary and evaluation	304
	Summary of results of separate studies	309
	Implications of the findings	312
	The provision of preschool facilities: aims, values, and areas for further research	317

Appendices

A	Details of age and family background of children	323
	First year of project: study on amount of space and play equipment	323
	Second year of project: study comparing free play and structured activities	325
	Third year of project: study comparing different numbers of children in the group	328
B	Category definitions	335
	Number and nature of companions	335
	Toy or activity choice	336
	Behaviour units	338
C	Sample records	344
	Narrative commentaries of observations of children	344
	Standard score-sheet coded for observations of children	346
	Standard record-sheet for staff-child communications	350
D	Total occurrences, and significance levels, for full list of 89 behaviour units	351
	Number of children in group	352
	Further spatial variation	352

Amounts of space and play equipment	353
Structured activities and free play	353
E Copy of instructions to staff concerning the two playgroup regimes	360
<i>Bibliography</i>	363
<i>Author Index</i>	377
<i>Subject index</i>	381
