<i>Preface</i>	<i>xiii</i>
<i>Common Terminologies Used in This Book</i>	<i>xv</i>
1. The Need for Alternative Iron Units	1–17
1.1 Background	1
1.2 Size and Scale of Blast Furnaces	1
1.3 Global Coke Availability/Supply for Blast Furnace Ironmaking	4
1.4 Progress in Blast Furnace Ironmaking	7
1.4.1 Increase in Use of Coal (and Other Fuels) to Replace Coke	9
1.5 Limits to Coal (and other Auxiliary Fuels) Injection	14
1.6 Alternative Methods of Ironmaking	14
1.7 Concluding Comments	16
References	17
2. Scrap: Type, Availability and Demand	18–36
2.1 Introduction	18
2.2 Categories of Scrap	18
2.3 Availability of Scrap	20
2.4 Interdependence between Steel and Scrap	22
2.5 Quality of Scrap	24
2.6 Utilisation of Scrap in Steelmaking and in Other Applications	29
2.7 Worldwide Steel Scrap Trade	30
2.8 Alternative Source of Metallics	33
2.8.1 Value of Alternative Iron Sources	33
2.9 Concluding Comments	35
References	36
3. Fundamentals of Direct Reduction	37–81
3.1 Introduction	37
3.2 History of Direct Reduction	38

3.3	Thermodynamics and Kinetics of Iron Oxide Reduction	38
3.3.1	Ellingham Diagram	38
3.3.2	Other Thermodynamic Data	39
3.3.3	Kinetic Aspects	39
3.3.4	Systems Employing Solid and Gaseous Reductants	44
3.3.5	Steps Involved in Iron Oxide Reduction	46
3.4	Mechanism of Iron Oxide Reduction in Coal-based Processes	47
3.5	Mechanism of Iron Oxide Reduction in Gas-based Processes	48
3.5.1	Reduction of Dense Iron Oxide	49
3.5.2	Reduction of Porous Iron Oxide	52
3.6	The Boudouard Reaction	54
3.6.1	Effect of Pressure on the Boudouard Reaction	55
3.6.2	Reduction by Hydrogen	58
3.6.3	Reduction by Carbon Monoxide-Hydrogen Mixtures	59
3.7	Rate of Iron Oxide Reduction	61
3.7.1	General	61
3.7.2	Reducibility of Iron Ores	62
3.7.3	Structural Changes during Reduction	65
3.7.4	Rate Controlling Steps	66
3.7.5	Final Stages of Reduction	70
3.7.6	Role of the Properties of Pellets	71
3.7.7	Effect of Gas Composition and Pressure	72
3.7.8	Reduction by Solid Carbon	73
3.8	Concluding Comments	75
3.9	Some Problems and Solutions	75
	<i>References</i>	81
4.	Coal-based DR Processes Using Rotary Kilns	82-134
4.1	Introduction	82
4.2	Broad Classification of DR Processes	82
4.3	General Comments on Rotary Kiln DR	85
4.4	Reactions during Direct Reduction	88
4.5	Facilities Common to All Rotary Kiln DR Units	89
4.6	Strengths and Weaknesses of Rotary Kiln Direct Reduction	90
4.7	Other Features of Rotary Kiln DR Processes	93
4.8	Global Status of Coal-based DR	95
4.9	Rotary Kiln DR Processes in Commercial Usage	96
4.10	Details of Individual DR Processes	97
4.10.1	SL/RN	98
4.10.2	Codir	99
4.10.3	Accar	102
4.10.4	DRC	104
4.10.5	TDR	107
4.10.6	SIIL	109
4.10.7	Jindal	110

4.11	Salient Points of Rotary Kiln DR	111
4.11.1	Process Analysis	112
4.11.2	Raw Material Characteristics	114
4.12	Rotary Kiln Processes for Reduction of Waste Iron Oxides	123
4.12.1	Kawasaki	123
4.12.2	Koho	124
4.12.3	CRIMM	126
4.13	Some Problems and Solutions	128
	References	133

5. Coal-based Processes Using Reactors Other Than Rotary Kiln..... 135–176

5.1	Introduction	135
5.2	Rotary Hearth Furnace-based Processes	135
5.2.1	Inmetco Process	138
5.2.2	Fastmet Process	142
5.2.3	Comet Process	149
5.2.4	Maumee (DryIron) Process	154
5.2.5	IT Mk3	157
5.3	Vertical Retort-based Processes	162
5.3.1	Kinglor–Metor Process	162
5.4	Multiple Hearth Furnace-based Processes	164
5.4.1	Primus Process	165
5.5	Coal-based DR in Tunnel Kilns	169
5.5.1	Hoganas	169
5.6	Fluidised Bed-based Processes	173
5.6.1	Circofer Process	173
	References	176

6. Gas-based Direct Reduction 177–242

6.1	What is Natural Gas?	177
6.2	Occurrence of Natural Gas	178
6.3	Use of Natural Gas in Direct Reduction	179
6.4	Principles of Gas-based Direct Reduction	181
6.5	Individual Units in Gas-based DR Plants	182
6.5.1	Reduction Furnace	182
6.5.2	Gas Reforming Section	183
6.5.3	Gas Cleaning Section	184
6.5.4	General	184
6.6	Retort Processes	184
6.6.1	HYL (Now Referred to as HYL I)	184
6.7	Fluidised Bed Processes	187
6.7.1	Fior	187
6.7.2	Finmet	189
6.7.3	HIB (High Iron Briquette) Process	193
6.7.4	Circored	194

6.8	Shaft Furnace Processes	198
6.8.1	HYL III	198
6.8.2	HYL with Self-Reforming (HYLSA IV M)	204
6.8.3	Energiron Process	208
6.8.4	Development of the Arex Technique for Auto-Reforming	208
6.8.5	Midrex	210
6.8.6	Comparison of Midrex and HYL	218
6.8.7	Danarex Process	219
6.8.8	Armco	221
6.8.9	Purofer	222
6.8.10	NSC-DR	224
6.8.11	Ghaem Direct Reduction	227
6.9	Increase in Productivity in DR Shaft Furnaces	229
6.10	Concluding Comments	231
6.11	Some Problems and Solutions	233
	<i>References</i>	241

7. Gas-based Direct Reduction Using Alternatives to Natural Gas 243-278

7.1	Introduction	243
7.2	Gas from Coal	243
7.3	Coal Gasification Reactions	244
7.4	Technologies Available for Coal Gasification	246
7.4.1	Lurgi Gas Generator	249
7.4.2	Winkler Process	249
7.4.3	Koppers-Totzek (KT) Gasifier	249
7.4.4	Texaco (GE) Gasifier	250
7.4.5	Shell Coal Gasifier	250
7.4.6	Sasol-Lurgi Process	252
7.5	Cleaning and Conditioning of Syngas	252
7.6	Gas Quality Requirements for Shaft Furnace DR	253
7.7	Actual Experience of Shaft Furnace DR with Alternative Gases	255
7.7.1	Syngas Coupled with HYL	255
7.7.2	Use of Steel Plant By-product Gases for Shaft Furnace DR	258
7.7.3	Combination of the Midrex Process with Syngas	262
7.7.4	Plasmared	267
7.7.5	BL Process (Developed in China)	268
7.8	Concluding Comments	269
	<i>References</i>	269

APPENDIX 271

Lurgi Gasifier	271
Kopper-Totzek Gasifier	271
Winkler Gasifier	273
Texaco Gasifier	274
Sasol-Lurgi Fixed Bed Dry Bottom Gasifier	276
JSPL's Plant in Angul	277

8. Use of DRI in Ironmaking and Steelmaking.....	279–325
8.1 Introduction	279
8.2 Properties of DRI	280
8.3 Usage of DRI in Blast Furnaces	282
8.3.1 Mechanism of Improvement in Blast Furnace Performance	286
8.4 DRI as Feed Material in Steelmaking	288
8.4.1 Use of DRI in BOFs	289
8.4.2 Use of DRI in Electric Arc Furnaces	293
8.4.3 Recent Developments in EAF Steelmaking with Reference to DRI Usage	309
8.4.4 Use of Hot DRI in Steelmaking	318
8.4.5 Use of DRI/HBI in Induction Furnaces	320
8.4.6 Use of HBI/DRI in Steel Ladles	323
8.5 Concluding Comments	323
<i>References</i>	324
9. Present and Future of Direct Reduction.....	326–349
9.1 Introduction	326
9.2 Availability of Raw Materials for DRI Production in India in the Future	329
9.2.1 Coal and Natural Gas	329
9.2.2 CBM as an Alternative to Natural Gas	331
9.2.3 Iron Ore	331
9.2.4 Alternatives to Lump Ore	334
9.2.5 Future of Metallics for Steelmaking	334
9.3 Environmental Considerations	336
9.3.1 Emphasis on Environment Friendly Ironmaking and Steelmaking	338
9.3.2 CO ₂ Emission in the Production of Steel	339
9.3.3 Pollution Issues in the Indian DR Industry	341
9.3.4 Global Outlook	343
9.4 Concluding Comments	345
<i>References</i>	348
<i>Index.....</i>	<i>351–355</i>
