PRELIMINARY REMARKS	1
PART A: THE FRAME OF THE STUDY	8
1. Models for agricultural development	8
1.1 Accelerating the rate of growth	8
1.2 The conservation model	9
1.3 The urban-industrial impact model	9
1.4 The high payoff input model	9
1.5 The induced development model	11
1.6 Diffusion of agricultural innovations	12
1.7 The need for administrative implementation	15
1.8 Development with an unlimited supply of labour	16
2. Synopsis of Indian agricultural development	18
2.1 Foundations of agricultural policy	18
2.2 A factual outline and rates of growth	20
2.3 A preliminary interpretation of Indian agricultural development	29
2.4 Instruments of modernization	31
2.4.1 The Community Development Programme (CDP)	31
2.4.2 The Intensive Agricultural District Programme (IADP)	33
2.4.2.1 Development of the Programme	33
2.4.2.2 IADP in action	35
2.4.3 The Intensive Agricultural Area Programme (IAAP) and the High Yielding Variety Programme (HYVP)	37
2.4.3.1 Relocation of agricultural inputs	37
2.4.3.2 The extent of the 'green revolution'	38
2.4.3.3 Adoption pattern and aspects of interfarm disparities	43
2.4.4 The falling share of agriculture	48
2.5 Closing remarks, four answers, questions and the main hypothesis	51

	Page
PART B: SPECIFIC HYPOTHESES AND THE ORGANIZATION OF THE FIELD SURVEYS	55
3. Specific hypotheses	55
4. The organization of the field surveys	57
4.1 The selection of the villages to be investigated	57
4.2 Research methodology	59
4.2.1 The language barrier	59
4.2.2 The household unit and the reliability of information	59
4.2.3 The first period in the villages	60
4.2.4 The questionnaire and the second period of investigation	61
4.2.5 The interpretation of Indian village survey data and a review of Indian village studies - an excursus	62
4.2.5.1 The interpretation of Indian village survey data	62
4.2.5.2 A review of Indian village studies	65
PART C: THE LEVEL OF INTEGRATION OF FOUR VILLAGES IN SOUTH INDIA	69
5. The scene of the test area	69
5.1 An introduction to India	69
5.1.1 India as a Geographical Unit	69
5.1.2 Regionalization of India	72
5.2 The State of Karnataka	73
5.2.1 The formation of the State	73
5.2.2 The climate	75
5.2.3 The soil	76
5.2.4 Physical characteristics	78
5.2.5 Karnataka State in the Indian set-up	80
5.3 The districts of Mandya and Bangalore	84
5.3.1 Introduction	84
5.3.2 Rainfall variability and irrigation	85
5.3.3 The districts at a glance	90
6. Comparative analysis of four villages in South India	95
6.1 General characteristics, geographical particulari- ties and population structure	95
6.1.1 General characteristics of the villages and their inhabitants	95
6.1.2 Geographical particulars and population structure	98
6.1.2.1 The location of the four villages	98
6.1.2.2 Rainfall and soil-quality	102

	Page
6.1.2.3 The village-areas	106
6.1.2.4 Diagrammatic sketch maps of the villages; castes and population structure	109
6.2 The cropping system and the spatial diffusion of high yielding varieties	119
6.2.1 The cropping system through the year	119
6.2.2 The seasonal situation in the village-areas	124
6.3 The participation of farmers in the process of diffusing innovations	128
6.3.1 Available innovations	128
6.3.2 Farmers participating in the process of diffusing agricultural innovations	129
6.4 Appropriateness of agricultural innovations	134
6.4.1 The level of agricultural prosperity; a first look	134
6.4.2 The level of agricultural prosperity: a second look	136
6.5 Diffusion, integration and economic and social development	138
SUMMARY AND CONCLUSIONS	140
APPENDIX I: GLOSSARY	143
APPENDIX II: QUESTIONNAIRE	146
BIBLIOGRAPHY	153
MAPS OF THE VILLAGES SURVEYED	171
