<i>Preface</i>	vii
<i>Introduction</i>	1
1. The Partial Equilibrium Approach EDGAR M. HOOVER	3
2. The General Equilibrium Approach LEON N. MOSES	15
PART I LEAST COST THEORY	31
3. Distance Inputs and the Space Economy: The Locational Equilibrium of the Firm WALTER ISARD	33
4. Location and the Theory of Production LEON N. MOSES	59
5. A Theoretical Framework for Geographical Studies of Industrial Location D. M. SMITH	73
PART II LOCATIONAL INTERDEPENDENCE (SPATIAL COMPETITION)	101
6. Stability in Competition HAROLD HOTELLING	103
7. Optimum Location in Spatial Competition ARTHUR SMITHIES	119
8. A Dissenting View of Duopoly and Spatial Competition NICOS E. DEVLETGLOU	133
PART III MARKET AREA ANALYSIS	155
9. The Economic Law of Market Areas FRANK A. FETTER	157
10. The Economic Law of Market Areas C. D. HYSON and W. P. HYSON	165
11. The Size and Shape of the Market Area of a Firm MELVIN L. GREENHUT	171
12. A Model of Market Areas with Free Entry EDWIN S. MILLS and MICHAEL R. LAV	187
PART IV LOCATIONAL EQUILIBRIUM ANALYSIS	201
13. Equilibrium of the Household WILLIAM ALONSO	203

Contents

14.	Integrating the Leading Theories of Plant Location	219
	MELVIN L. GREENHUT	
15.	The Equilibrium of Land-Use Patterns in Agriculture	233
	EDGAR S. DUNN, JR.	
16.	A General Location Principle of an Optimum Space-Economy	251
	WALTER ISARD	
PART V GENERAL EQUILIBRIUM THEORY		
17.	Equilibrium Among Spatially Separated Markets: Solution by Electrical Analog	277
	STEPHEN ENKE	
18.	Spatial Price Equilibrium and Linear Programming	285
	PAUL A. SAMUELSON	
19.	Equilibrium Among Spatially Separated Markets: A Reformulation	307
	T. TAKAYAMA and G. G. JUDGE	
Conclusion		323
20.	Towards a United Theory of Spatial Economic Structure	325
	EDWIN VON BÖVENTER	
Index		357
