

# CONTENTS

Chapters' contents. . . . .	VI
Introduction . . . . .	XII
Madagascar relief and main types of landscape . . . . .	1
The geology of Madagascar . . . . .	27
The climatology of Madagascar . . . . .	87
Flora and vegetation of Madagascar . . . . .	145
The forest of Madagascar . . . . .	191
Les sols de Madagascar . . . . .	201
Accelerated erosion and soil degradation . . . . .	227
Rivers and streams on Madagascar . . . . .	261
Man and the environment in Madagascar . . . . .	311
The Malagasy subfossils . . . . .	339
The coral reefs of Madagascar . . . . .	367
Some ecological and biogeographical problems of the entomofauna of Madagascar . . . . .	411
Les arachnides de Madagascar . . . . .	427
Le peuplement de Mollusques terrestres de Madagascar . . . . .	459
Fishes of the continental waters of Madagascar . . . . .	477
Les reptiles de Madagascar et des îles voisines . . . . .	501
The evolution and affinities of the birds of Madagascar . . . . .	615
Insectivores . . . . .	629
The rodents of Madagascar: The seven genera of Malagasy rodents	661
The carnivora of Madagascar . . . . .	667
Order of primates; Sub-order of lemurs . . . . .	683
Human diseases and their relationship to the environment . . . . .	703
The problems of nature conservation in Madagascar . . . . .	727
In conclusion . . . . .	741
Index . . . . .	757

## CHAPTERS' CONTENTS

<b>R. BATTISTINI: Madagascar relief and main types of landscape</b>	1
Relief: the rocks of the Precambrian shelf . . . . .	5
Relief: sedimentary layers . . . . .	7
The problem of the erosion surface . . . . .	11
Volcanic land forms . . . . .	13
The littoral relief . . . . .	16
Pliocene-Quaternary variations in the climate . . . . .	20
Panorama of the main types of natural scenery . . . . .	22
<b>P. BRENON: The geology of Madagascar</b>	
Historical . . . . .	27
General features . . . . .	29
The Precambrian basement. . . . .	34
The Androyan system . . . . .	38
The Graphite system . . . . .	41
The Vohibory system . . . . .	46
Terminal Precambrian . . . . .	51
Structure of the Precambrian basement . . . . .	54
Mineral resources of the basement complex . . . . .	57
Sedimentary zone . . . . .	57
Precambrian basement . . . . .	58
Upper Jurassic . . . . .	65
Cretaceous . . . . .	66
Tertiary . . . . .	68
Recent formations . . . . .	70
Volcanic activity of Madagascar. . . . .	74
Recent crustal movements . . . . .	80
<b>G. DONQUE: The climatology of Madagascar</b>	87
The climatic mechanisms . . . . .	87
Position . . . . .	87
The maritime environment . . . . .	94
Altitude and relief . . . . .	95
Atmospheric Conditions . . . . .	99
The subtropical highs and the south-east trade wind . . . . .	99
The southerly perturbation current . . . . .	103
Intertropical Convergence and Monsoon . . . . .	104

Secondary centres of action . . . . .	105
Tropical cyclones . . . . .	106
Regional climatological outline . . . . .	114
The Eastern Regions . . . . .	114
The Plateau . . . . .	122
The West . . . . .	130
The South and South-West . . . . .	135
The regions of the extreme North and North-West . . . . .	139
Bibliography . . . . .	142
<b>J. KOECHLIN: Flora and vegetation of Madagascar</b>	<b>145</b>
Introduction . . . . .	145
The ecological environment . . . . .	146
Eastern Malagasy region . . . . .	151
The Western Malagasy region . . . . .	151
Flora and vegetation . . . . .	155
The facts . . . . .	156
The explanations . . . . .	157
The vegetation . . . . .	161
The woody formations . . . . .	162
The grass formations. . . . .	180
Conclusions . . . . .	189
References . . . . .	190
<b>B. CHAUVET: The forest of Madagascar</b>	<b>191</b>
Eastern type forests . . . . .	191
Western type forests . . . . .	195
Southern type forests . . . . .	197
The High Plateaux . . . . .	197
Conclusion . . . . .	198
References . . . . .	199
<b>P. ROEDERER: Les sols de Madagascar</b>	<b>201</b>
Généralités . . . . .	201
Les sols de Madagascar . . . . .	201
Répartition des sols par région . . . . .	223
Valeur agronomique des sols de Madagascar . . . . .	224
Conclusion . . . . .	225
Bibliographie . . . . .	225
<b>P. LE BOURDIEC: Accelerated erosion and soil degradation</b>	<b>227</b>
Forms of erosion . . . . .	228
The laminar forms . . . . .	228

The linear forms . . . . .	231
Mass movements . . . . .	234
Elementary lavaka . . . . .	238
Compound lavaka . . . . .	239
The causes of accelerated erosion . . . . .	241
Direct action . . . . .	243
Indirect action . . . . .	244
Consequences of accelerated erosion . . . . .	246
The fight against erosion . . . . .	251
Conclusion . . . . .	257
Bibliography . . . . .	257

**M. ALDEGHERI: Rivers and streams on Madagascar** 261

Hydrography . . . . .	261
The slopes of the Ambre mountain . . . . .	263
The Tsaratanana slopes . . . . .	263
The Eastern slopes . . . . .	265
The Western slopes . . . . .	270
The Southern slopes . . . . .	285
Hydrology . . . . .	288
The northern or Ambre mountain regime. . . . .	290
North-eastern regime . . . . .	291
Tsaratanana regime . . . . .	291
Regime of the eastern slopes . . . . .	293
The regime of the high Plateaux . . . . .	294
The regime of the North-west coast . . . . .	300
The South central regime . . . . .	300
The West coast regime . . . . .	303
The South Sahelian regime . . . . .	303
The mixed regimes . . . . .	305
Bibliography . . . . .	310

**R. BATTISTINI & P. VERIN: Man and the environment in Madagascar** 311

Recent transformation of the environment in Madagascar: Flora, fauna and erosion system . . . . .	311
The settlement of the island . . . . .	317
The present population of the island . . . . .	330
Bibliography . . . . .	336

**J. MAHÉ: The Malagasy subfossils** 339

Introduction . . . . .	339
The fields containing subfossils . . . . .	339
The main subfossils of Madagascar . . . . .	341

Origin of the subfossil fauna . . . . .	352
Extinction of the subfossils . . . . .	359
Conclusion . . . . .	362
Résumé . . . . .	362
Bibliography . . . . .	364
<b>M. PICHON: The coral reefs of Madagascar</b>	367
Abstract . . . . .	367
Coral reefs and Scleractinian corals . . . . .	367
Zonation in reefs . . . . .	373
Distribution of coral reefs along the coast of Madagascar . . . . .	386
The reefs of the North-West coast of Madagascar . . . . .	386
The reefs of the Mid-West coast of Madagascar . . . . .	395
The reefs on the South-West coast of Madagascar . . . . .	396
The reefs of the East coast of Madagascar . . . . .	406
Conclusions . . . . .	407
References . . . . .	408
<b>R. PAULIAN: Some ecological and biogeographical problems of the entomofauna of Madagascar</b>	411
Pre-Tertiary elements . . . . .	416
Recent elements . . . . .	420
Conclusions . . . . .	425
References . . . . .	426
<b>R. LEGENDRE: Les arachnides de Madagascar</b>	427
Scorpiones . . . . .	427
Uropygi . . . . .	434
Amblypygi . . . . .	435
Palpigradi . . . . .	435
Araneae . . . . .	435
Pseudo-Scorpions . . . . .	446
Opilions . . . . .	447
Acari . . . . .	448
Bibliographie . . . . .	450
<b>E. FISCHER-PIETTE et MME F. BLANC: Le peuplement de Mollusques terrestres de Madagascar</b>	459
Introduction . . . . .	459
Étude, pour chaque genre, de sa distribution à l'intérieur de l'île et du degré d'endémisme que présentent ses espèces . . . . .	462
Groupement de ces résultats . . . . .	464
Remarque . . . . .	468

Conclusions . . . . .	468
Rapports entre les mollusques et la végétation . . . . .	469
Originalité et affinités de la faune malacologique terrestre de Madagascar . . . . .	470
Affinités de chacun des genres . . . . .	471
Récapitulation . . . . .	472
Bibliographie . . . . .	476
<b>A. KIENER &amp; G. RICHARD-VINDARD: Fishes of the continental waters of Madagascar</b> . . . . .	477
Introduction . . . . .	477
General description of the ecological conditions found in Fresh and Brackish waters in the Grande ile . . . . .	477
Definition of the waters studied, extent of the continental waters. . . . .	477
Species found in fresh waters and brackish waters. Principal ecological and biological factors conditioning the penetration of the inland waters by species with marine affinities . . . . .	480
General characteristics of the Ichthyological fauna . . . . .	482
General ecological conditions . . . . .	485
Ichthyological fauna . . . . .	488
Description of the principal families of economic importance . . . . .	488
Secondary families and general summary of species. . . . .	490
Peculiarities and biogeography of some species, scientific problems encountered with certain of these . . . . .	491
Fisheries and Fish culture, planning problems . . . . .	495
<b>CH. P. BLANC: Les reptiles de Madagascar et des îles voisines</b> . . . . .	501
Introduction . . . . .	501
Répertoire systématique . . . . .	504
Observations sur la composition de la faune . . . . .	527
Origine ou affinités de la faune . . . . .	547
Le peuplement de l'aire Malgache . . . . .	564
Ecologie . . . . .	582
Conclusion . . . . .	594
Résumé . . . . .	596
Summary . . . . .	596
Bibliographie . . . . .	596
<b>J. DORST: The Evolution and affinities of the birds of Madagascar</b> . . . . .	615
Poverty of Malagasy avifauna . . . . .	615
Unique nature of the Malagasy avifauna . . . . .	618
Oriental affinities of the Malagasy avifauna . . . . .	620
African affinities of the Malagasy avifauna . . . . .	620

The colonization of Madagascar by birds . . . . .	622
Evolution of Malagasy avian communities . . . . .	624
References . . . . .	627
<b>H. HEIM DE BALSAC: Insectivores</b>	629
Soricidae. . . . .	629
Tenrecidae . . . . .	631
Historique & Répartition. . . . .	631
Evolution et Spéciation – Particularités biologiques . . . . .	634
La spéciation chez les Tenrecidae . . . . .	647
Ecologie et particularités biologiques des Oryzoryctinae . . . . .	658
<b>F. PETTER: The rodents of Madagascar: The seven genera of Malagasy rodents</b>	661
Hypogeomys . . . . .	663
Macrotrarsomys . . . . .	663
Nesomys . . . . .	664
Eliurus . . . . .	664
Gymnuromys . . . . .	665
Brachytarsomys . . . . .	665
Brachyuromys . . . . .	665
<b>R. ALBIGNAC: The carnivora of Madagascar</b>	667
The Fossa genet. . . . .	668
Eupleres . . . . .	669
Galidia . . . . .	672
Mungotictis . . . . .	674
Galidictis . . . . .	676
Salanoia . . . . .	677
Cryptoprocta . . . . .	678
The Civet-cat. . . . .	680
Conclusion . . . . .	681
Bibliography . . . . .	681
<b>J. J. PETTER: Order of primates: Sub-order of lemurs</b>	683
<b>E. R. BRYGOO: Human diseases and their relationship to the Environment</b>	703
The air and the soil . . . . .	703
