

# CONTENTS

|   |    |
|---|----|
| Introduction . . . . .  | 9  |
| 1. Meeting of the Commission on Interpretation of Aerial Photographs and Organization of the Report . . . . .             | 9  |
| 2. Definition of Biological Resources . . . . .   | 10 |
| 3. Importance of Biological Resources and Respective Surveys . . . . .  | 10 |
| Part I. General Principles for Air Photo Surveys of Biological Resources . . . . .  | 11 |
| 1. Viewpoints in Carrying Out Surveys . . . . .   | 11 |
| 2. Photo Interpretation Methods Versus Orthodox Field Surveys . . . . .   | 11 |
| 3. Types of Surveys . . . . .   | 12 |
| 4. Levels of Surveys and Decision-making . . . . .  | 14 |
| 5. Survey Phases and Related Technology . . . . .   | 14 |
| 6. Methodology of Photo Interpretation . . . . .  | 16 |
| References . . . . .  | 17 |
| Part II. Special Papers . . . . .   | 28 |
| 1. Forest Photo Interpretation - Now and Tomorrow, by <i>T. Eugene Avery</i> . . . . .                                    | 28 |
| A. Present Uses of Aerial Photographs . . . . .   | 28 |
| Tree identifications . . . . .  | 28 |
| Vegetation keys . . . . .   | 28 |
| Object counts . . . . .   | 28 |
| Individual tree volumes . . . . .   | 29 |
| Aerial stand-volume tables . . . . .  | 29 |
| Stand-volume estimates . . . . .  | 30 |
| B. Remote Sensing of Forest Areas . . . . .   | 30 |
| What is remote sensing? . . . . .   | 30 |
| The nature of infrared radiation . . . . .  | 30 |
| Emission of infrared energy . . . . .   | 31 |
| Detection of forest fires . . . . .   | 31 |
| Detection of mobile populations . . . . .   | 31 |
| References . . . . .  | 32 |
| 2. A Physiographic Approach to Wildland Classification, by <i>Philip Gimbarzevsky</i> . . . . .                           | 33 |
| Capability Classification and Mapping . . . . .   | 33 |
| 3. La Carte de la Végétation, Base d'un Recensement des Ressources Biologiques, par <i>Paul Rey</i> . . . . .             | 36 |
| 4. The Problem of Natural Regions in Relation to Airphoto Interpretation, by <i>Sigfrid Schneider</i> . . . . .           | 38 |
| Bibliography . . . . .  | 40 |
| 5. Airphotos and Biological Resources - Review of Work Done in the Netherlands, by <i>Herman Th. Verstappen</i> . . . . . | 42 |
| A. Introduction . . . . .   | 42 |
| B. Work Done in the Netherlands . . . . .   | 42 |
| C. Work Done Overseas . . . . .   | 42 |
| D. Research Carried Out at the ITC, Delft . . . . .   | 43 |
| E. Training Facilities . . . . .  | 43 |
| References . . . . .  | 44 |

|   |    |
|---|----|
| 6. Photo Interpretation for Rational Use and Conservation of Biological Resources - A Brief Review of Work Done in Japan, by <i>Takamasa Nakano</i> . . . . . | 46 |
| 7. Use of Aerial Photographs for the Assessment of Biological Resources in Switzerland, by <i>Dieter Steiner</i> . . . . .                                    | 47 |
| A. Photo Interpretation in Forestry . . . . .   | 47 |
| Mapping forest types . . . . .  | 48 |
| Classification of forest sites . . . . .  | 48 |
| Separation of forests and pastures . . . . .  | 49 |
| Air photographs as a record of changes . . . . .  | 49 |
| Controlling forest fires . . . . .  | 49 |
| Assessing wind and avalanche damages . . . . .  | 49 |
| Instrumental aids in forestry photo interpretation . . . . .  | 50 |
| B. Photo Interpretation in Agriculture and Agricultural Geography . . . . .   | 50 |
| Land use and crop identification on panchromatic photos . . . . .   | 50 |
| Crop identification on color and multiband material . . . . .   | 51 |
| Land use trends . . . . .   | 51 |
| Assessment of crop damages . . . . .  | 51 |
| C. Photo Interpretation in Vegetation Studies . . . . .   | 52 |
| References . . . . .  | 52 |
| 8. Present Status of Theory and Practice of Geobotanical Photo Interpretation in the USSR, by <i>B.V. Vinogradov</i> . . . . .                                | 55 |
| A. Investigation of vegetation forms through photo interpretation . . . . .   | 55 |
| B. Technical and natural factors in air photography for vegetation research . . . . .   | 55 |
| 1. Technical Factors . . . . .  | 55 |
| Film-filter combination and spectrum wavelength . . . . .   | 55 |
| Film resolution . . . . .   | 55 |
| Air photo scale . . . . .   | 55 |
| 2. Natural Factors . . . . .  | 56 |
| Diurnal changes . . . . .   | 56 |
| Annual changes . . . . .  | 56 |
| Meteorological conditions . . . . .   | 56 |
| C. Measurement evaluation of aerial photographs . . . . .   | 56 |
| Microphotometric analysis . . . . .   | 56 |
| Geometric analysis . . . . .  | 56 |
| D. Photo keys . . . . .   | 57 |
| E. Integrated approach to vegetation interpretation ("landscape method") . . . . .  | 57 |
| F. Methods of vegetation mapping . . . . .  | 57 |
| References . . . . .  | 58 |
| Recommendation . . . . .  | 60 |
