Contents

Chapter 1: What Is Simulation? 1

1.1 Modeling 1
1.1.1 What's Being Modeled? 2
1.1.2 How About Just Playing with the System? 3
1.1.3 Sometimes You Can't (or Shouldn't) Play with the System 3
1.1.4 Physical Models 4
1.1.5 Logical (or Mathematical) Models 4
1.1.6 What Do You Do with a Logical Model? 4
1.2 Computer Simulation 5
1.2.1 Popularity and Advantages 5
1.2.2 The Bad News 6
1.2.3 Different Kinds of Simulations 7
1.3 How Simulations Get Done 8
1.3.1 By Hand 8
1.3.2 Programming in General-Purpose Languages 10
1.3.3 Simulation Languages 10
1.3.4 High-Level Simulators 10
1.3.5 Where Arena Fits In 11
1.4 When Simulations Are Used 12
1.4.1 The Early Years 12
1.4.2 The Formative Years 12
1.4.3 The Recent Past 13
1.4.4 The Present 13
1.4.5 The Future 14

Chapter 2: Fundamental Simulation Concepts 15

2.1 An Example 15
2.1.1 The System 15
2.1.2 Goals of the Study 17
2.2 Analysis Options 18
2.2.1 Educated Guessing 18
2.2.2 Queueing Theory 19
2.2.3 Mechanistic Simulation 20
2.3 Pieces of a Simulation Model 20
2.3.1 Entities 20
2.3.2 Attributes 21
2.3.3 (Global) Variables 21
2.3.4 Resources 22
2.3.5 Queues 22
2.3.6 Statistical Accumulators 23
2.3.7 Events 23
2.3.8 Simulation Clock 24
2.3.9 Starting and Stopping 24

2.4 Event-Driven Hand Simulation 25
2.4.1 Outline of the Action 25
2.4.2 Keeping Track of Things 26
2.4.3 Carrying It Out 28
2.4.4 Finishing Up 32
2.5 Event- and Process-Oriented Simulation 32
2.6 Randomness in Simulation 34
2.6.1 Random Input, Random Output 34
2.6.2 Replicating the Example 35
2.6.3 Comparing Alternatives 36
2.7 Simulating with Spreadsheets 37
2.7.1 A News Vendor Problem 37
2.7.2 A Single-Server Queue 43
2.7.3 Extensions and Limitations 47
2.8 Overview of a Simulation Study 47
2.9 Exercises 48

Chapter 3: A Guided Tour Through Arena 53

3.1 Starting Up 53
3.2 Exploring the Arena Window 55
3.2.1 Opening a Model 55
3.2.2 Basic Interaction and Pieces of the Arena Window 56
3.2.3 Panning, Zooming, Viewing, and Aligning in the Flowchart View 58
3.2.4 Modules 60
3.2.5 Internal Model Documentation 61
3.3 Browsing Through an Existing Model: Model 3-1 62
3.3.1 The Create Flowchart Module 62
3.3.2 The Entity Data Module 63
3.3.3 The Process Flowchart Module 64
3.3.4 The Resource Data Module 66
3.3.5 The Queue Data Module 67
3.3.6 Animating Resources and Queues 67
3.3.7 The Dispose Flowchart Module 67
3.3.8 Connecting Flowchart Modules 68
3.3.9 Dynamic Plots 69
3.3.10 Dressing Things Up 71
3.3.11 Setting the Run Conditions 72
3.3.12 Running It 73
3.3.13 Viewing the Reports 74
3.4 Building Model 3-1 Yourself 79
3.4.1 New Model Window and Basic Process Panel 80
3.4.2 Place and Connect the Flowchart Modules 81
3.4.3 The Create Flowchart Module 81
3.4.4 Displays 82
3.4.5 The Entity Data Module 83
3.4.6 The Process Flowchart Module 83
3.4.7 The Resource and Queue Data Modules 84
3.4.8 Resource Animation 84
3.4.9 The Dispose Flowchart Module 85
3.4.10 Dynamic Plots 85

3.4.11 Window Dressing....88
3.4.12 The Run > Setup Dialog Boxes....89
3.4.13 Establishing Named Views....89
3.5 Case Study: Specialized Serial Processing vs. Generalized Parallel Processing....90
3.5.1 Model 3-2: Serial Processing – Specialized Separated Work....90
3.5.2 Model 3-3: Parallel Processing – Generalized Integrated Work....93
3.5.3 Models 3-4 and 3-5: The Effect of Task-Time Variability....95
3.6 More on Menus, Toolbars, Drawing, and Printing....98
3.6.1 Menus....98
3.6.2 Toolbars....103
3.6.3 Drawing....106
3.6.4 Printing....107
3.7 Help!....108
3.8 More on Running Models....109
3.9 Summary and Forecast....110
3.10 Exercises....110

Chapter 4: Modeling Basic Operations and Inputs....121

4.1 Model 4-1: An Electronic Assembly and Test System....121
4.1.1 Developing a Modeling Approach....122
4.1.2 Building the Model....123
4.1.3 Running the Model....134
4.1.4 Viewing the Results....136
4.2 Model 4-2: The Enhanced Electronic Assembly and Test System....138
4.2.1 Expanding Resource Representation: Schedules and States....139
4.2.2 Resource Schedules....140
4.2.3 Resource Failures....144
4.2.4 Frequencies....146
4.2.5 Results of Model 4-2....149
4.3 Model 4-3: Enhancing the Animation....153
4.3.1 Changing Animation Queues....154
4.3.2 Changing Entity Pictures....156
4.3.3 Adding Resource Pictures....158
4.3.4 Adding Variables and Plots....160
4.4 Model 4-4: The Electronic Assembly and Test System with Part Transfers....162
4.4.1 Some New Arena Concepts: Stations and Transfers....162
4.4.2 Adding the Route Logic....164
4.4.3 Altering the Animation....167
4.5 Finding and Fixing Errors....171
4.6 Input Analysis: Specifying Model Parameters and Distributions....178
4.6.1 Deterministic vs. Random Inputs....179
4.6.2 Collecting Data....180
4.6.3 Using Data....181
4.6.4 Fitting Input Distributions via the Input Analyzer....182
4.6.5 No Data?....190
4.6.6 Nonstationary Arrival Processes....193
4.6.7 Multivariate and Correlated Input Data....194
4.7 Summary and Forecast....194
4.8 Exercises....194

Chapter 5: Modeling Detailed Operations 207

5.1 Model 5-1: A Simple Call Center System 208
5.2 New Modeling Issues 209
5.2.1 Customer Rejections and Balking 209
5.2.2 Three-Way Decisions 210
5.2.3 Variables and Expressions 210
5.2.4 Storages 211
5.2.5 Terminating or Steady State 211
5.3 Modeling Approach 212
5.4 Building the Model 214
5.4.1 Create Arrivals and Direct to Service 214
5.4.2 Arrival Cutoff Logic 220
5.4.3 Technical Support Calls 222
5.4.4 Sales Calls 225
5.4.5 Order-Status Calls 226
5.4.6 System Exit and Run Setup 232
5.4.7 Animation 234
5.5 Model 5-2: The Enhanced Call Center System 237
5.5.1 The New Problem Description 237
5.5.2 New Concepts 239
5.5.3 Defining the Data 241
5.5.4 Modifying the Model 245
5.6 Model 5-3: The Enhanced Call Center with More Output Performance Measures 250
5.7 Model 5-4: An (*s*, *S*) Inventory Simulation 257
5.7.1 System Description 257
5.7.2 Simulation Model 259
5.8 Summary and Forecast 270
5.9 Exercises 271

Chapter 6: Statistical Analysis of Output from Terminating Simulations 279

6.1 Time Frame of Simulations 280
6.2 Strategy for Data Collection and Analysis 280
6.3 Confidence Intervals for Terminating Systems 282
6.4 Comparing Two Scenarios 287
6.5 Evaluating Many Scenarios with the Process Analyzer (PAN) 291
6.6 Searching for an Optimal Scenario with OptQuest 296
6.7 Periodic Statistics 302
6.8 Summary and Forecast 303
6.9 Exercises 303

Chapter 7: Intermediate Modeling and Steady-State Statistical Analysis 311

7.1 Model 7-1: A Small Manufacturing System 311
7.1.1 New Arena Concepts 312
7.1.2 The Modeling Approach 314
7.1.3 The Data Modules 315
7.1.4 The Logic Modules 317
7.1.5 Animation 324
7.1.6 Verification 326

7.2 Statistical Analysis of Output from Steady-State Simulations 330
7.2.1 Warm-up and Run Length....330
7.2.2 Truncated Replications 334
7.2.3 Batching in a Single Run 335
7.2.4 What To Do?....338
7.2.5 Other Methods and Goals for Steady-State Statistical Analysis....339
7.3 Summary and Forecast....339
7.4 Exercises 339

Chapter 8: Entity Transfer 345

8.1 Types of Entity Transfers 345
8.2 Model 8-1: The Small Manufacturing System with Resource-Constrained Transfers ..347
8.3 The Small Manufacturing System with Transporters 351
8.3.1 Model 8-2: The Modified Model 8-1 for Transporters 352
8.3.2 Model 8-3: Refining the Animation for Transporters 359
8.4 Conveyors 365
8.4.1 Model 8-4: The Small Manufacturing System with Nonaccumulating Convenyors 368
8.4.2 Model 8-5: The Small Manufacturing System with Accumulating Conveyors 373
8.5 Summary and Forecast....374
8.6 Exercises 374

Chapter 9: A Sampler of Further Modeling Issues and Techniques....379

9.1 Modeling Conveyors Using the Advanced Transfer Panel 379
9.1.1 Model 9-1: Finite Buffers at Stations 380
9.1.2 Model 9-2: Parts Stay on Conveyor During Processing 384
9.2 More on Transporters....385
9.3 Entity Reneging 386
9.3.1 Entity Balking and Reneging....386
9.3.2 Model 9-3: A Service Model with Balking and Reneging 387
9.4 Holding and Batching Entities....395
9.4.1 Modeling Options 395
9.4.2 Model 9-4: A Batching Process Example....396
9.5 Overlapping Resources 402
9.5.1 System Description....402
9.5.2 Model 9-5: A Tightly Coupled Production System 404
9.5.3 Model 9-6: Adding Part-Status Statistics....410
9.6 A Few Miscellaneous Modeling Issues 413
9.6.1 Guided Transporters....414
9.6.2 Parallel Queues 414
9.6.3 Decision Logic....415
9.7 Exercises 416

Chapter 10: Arena Integration and Customization....423

10.1 Model 10-1: Reading and Writing Data Files....423
10.1.1 Model 10-2: Reading Entity Arrivals from a Text File....425
10.1.2 Model 10-3 and Model 10-4: Reading and Writing Access and Excel Files 429

10.1.3 Advanced Reading and Writing 436
10.1.4 Model 10-5: Reading in String Data 440
10.1.5 Direct Read of Variables and Expressions 442
10.2 VBA in Arena 442
10.2.1 Overview of ActiveX Automation and VBA 442
10.2.2 Built-In Arena VBA Events 444
10.2.3 Arena's Object Model 448
10.2.4 Arena's Macro Recorder 451
10.3 Model 10-6: Presenting Arrival Choices to the User 454
10.3.1 Modifying the Creation Logic 455
10.3.2 Designing the VBA UserForm 456
10.3.3 Displaying the Form and Setting Model Data 458
10.4 Model 10-7: Recording and Charting Model Results in Microsoft Excel 465
10.4.1 Setting Up Excel at the Beginning of the Run 466
10.4.2 Storing Individual Call Data Using the VBA Module 469
10.4.3 Charting the Results and Cleaning Up at the End of the Run 471
10.5 Arena Template Building Capabilities 472
10.6 Arena Visual Designer 473
10.6.1 Overview of Visual Designer 473
10.6.2 Dashboards 475
10.6.3 3D Scenes 475
10.7 Summary and Forecast 477
10.8 Exercises 477

Chapter 11: Continuous and Combined Discrete/Continuous Models 479

11.1 Modeling Simple Discrete/Continuous Systems 480
11.1.1 Model 11-1: A Simple Continuous System 480
11.1.2 Model 11-2: Interfacing Continuous and Discrete Logic 483
11.2 A Coal-Loading Operation 487
11.2.1 System Description 488
11.2.2 Modeling Approach 489
11.2.3 Model 11-3: Coal Loading with Continuous Approach 491
11.2.4 Model 11-4: Coal Loading with Flow Process 501
11.3 Continuous State-Change Systems 505
11.3.1 Model 11-5: A Soaking-Pit Furnace 505
11.3.2 Modeling Continuously Changing Rates 506
11.3.3 Arena's Approach for Solving Differential Equations 507
11.3.4 Building the Model 508
11.3.5 Defining the Differential Equations Using VBA 512
11.4 Summary and Forecast 514
11.5 Exercises 514

Chapter 12: Further Statistical Issues 519

12.1 Random-Number Generation 519
12.2 Generating Random Variates 525
12.2.1 Discrete 525
12.2.2 Continuous 527
12.3 Nonstationary Poisson Processes 529

12.4 Variance Reduction 530
12.4.1 Common Random Numbers 531
12.4.2 Other Methods 537
12.5 Sequential Sampling 538
12.5.1 Terminating Models 539
12.5.2 Steady-State Models 543
12.6 Designing and Executing Simulation Experiments 545
12.7 Exercises 546

Chapter 13: Conducting Simulation Studies 549

13.1 A Successful Simulation Study 549
13.2 Problem Formulation 552
13.3 Solution Methodology 553
13.4 System and Simulation Specification 554
13.5 Model Formulation and Construction 558
13.6 Verification and Validation 560
13.7 Experimentation and Analysis 563
13.8 Presenting and Preserving the Results 564
13.9 Disseminating the Model 565

Appendix A: A Functional Specification for *The Washington Post* 567

A.1 Introduction 567
A.1.1 Document Organization 567
A.1.2 Simulation Objectives 567
A.1.3 Purpose of the Functional Specification 568
A.1.4 Use of the Model 568
A.1.5 Hardware and Software Requirements 568
A.2 System Description and Modeling Approach 569
A.2.1 Model Timeline 569
A.2.2 Presses 569
A.2.3 Product Types 571
A.2.4 Press Packaging Lines 571
A.2.5 Tray System 571
A.2.6 Truck Arrivals 572
A.2.7 Docks 573
A.2.8 Palletizers 573
A.2.9 Manual Insertion Process 574
A.3 Animation 575
A.4 Summary of Input and Output 575
A.4.1 Model Input 575
A.4.2 Model Output 576
A.5 Project Deliverables 577
A.5.1 Simulation Model Documentation 577
A.5.2 User's Manual 577
A.5.3 Model Validation 577
A.5.4 Animation 578
A.6 Acceptance 578

Appendix B: A Refresher on Probability and Statistics 579

B.1 Probability Basics 579
B.2 Random Variables 581
B.2.1 Basics 581
B.2.2 Discrete 582
B.2.3 Continuous 584
B.2.4 Joint Distributions, Covariance, Correlation, and Independence 586
B.3 Sampling and Sampling Distributions 589
B.4 Point Estimation 591
B.5 Confidence Intervals 591
B.6 Hypothesis Tests 593
B.7 Exercises 595

Appendix C: Arena's Probability Distributions 597

C.1 Beta 599
C.2 Continuous 600
C.3 Discrete 602
C.4 Erlang 603
C.5 Exponential 604
C.6 Gamma 605
C.7 Johnson 606
C.8 Lognormal 607
C.9 Normal 608
C.10 Poisson 609
C.11 Triangular 610
C.12 Uniform 611
C.13 Weibull 612

Appendix D: Academic Software Installation Instructions 613

D.1 Authorization to Copy Software 613
D.2 Installing the Arena Software 613
D.3 System Requirements 614

References 615
