## Part I Semiclassical and Adiabatic Limits

Local Smoothing with a Prescribed Loss for the Schrödinger Equation Hans Christianson and Jared Wunsch	3
Propagation Through Trapped Sets and Semiclassical Resolvent Estimates Kiril Datchev and András Vasy	7
Space-Adiabatic Theory for Random-Landau Hamiltonian: Results and Prospects Giuseppe De Nittis	11
Microlocal Analysis of FIOs with Singularities Raluca Felea	15
A Nonlinear Adiabatic Theorem for Coherent States Clotilde Fermanian Kammerer and Rémi Carles	19
Adiabatic Limits and Related Lattice Point Problems Yuri A. Kordyukov and Andrey A. Yakovlev	25
The Effective Hamiltonian in Curved Quantum Waveguides and When It Does Not Work David Krejčiřík and Helena Šediváková	29
The Adiabatic Limit of the Laplacian on Thin Fibre Bundles	33
Adiabatic Limit with Isolated Degenerate Fibres Richard B. Melrose	37
Microlocal Analysis and Adiabatic Problems: The Case of Perturbed Periodic Schrödinger Operators Gianluca Panati	45

<b>Recent Results in Semiclassical Approximation with Rough Potentials</b> T. Paul	49
Part II Singular spaces	
On the Closure of Elliptic Wedge Operators Juan B. Gil, Thomas Krainer, and Gerardo A. Mendoza	55
Generalized Blow-Up of Corners and Fiber Products Chris Kottke and Richard Melrose	59
<b>Trace Expansions for Elliptic Cone Operators</b> Thomas Krainer, Juan B. Gil, and Gerardo A. Mendoza	63
<b>Spectral Geometry for the Riemann Moduli Space</b> Rafe Mazzeo	69
Invariant Integral Operators on the Oshima Compactification of a Riemannian Symmetric Space: Kernel Asymptotics and Regularized Traces Pablo Ramacher and Aprameyan Parthasarathy	73
<b>Pseudodifferential Operators on Manifolds with Foliated Boundaries</b> Frédéric Rochon	77
The Determinant of the Laplacian on a Conically Degenerating Family of Metrics David A. Sher	81
Part III Spectral and Scattering Theory	
Relatively Isospectral Noncompact Surfaces Pierre Albin, Clara Aldana, and Frédéric Rochon	87
Microlocal Analysis of Scattering Data for Nested Conormal Potentials Suresh Eswarathasan	91
Equidistribution of Eisenstein Series for Convex Co-compact Hyperbolic Manifolds Colin Guillarmou and Frédéric Naud	95
<b>Lower Bounds for the Counting Function of an Integral Operator</b> Yuri Safarov	99
The Identification Problems in SPECT: Uniqueness, Non-uniqueness and Stability Plamen Stefanov	103

Contents

Eigenvalues and Spectral Determinants on Compact Hyperbolic Surfaces Alexander Strohmaier and Ville Uski		105
Part IV	Wave Propagation and Topological Applications	
A Suppo Dean Bas	rt Theorem for a Nonlinear Radiation Field	111
<b>Propaga</b> Submani Nick Hab	tion of Singularities Around a Lagrangian fold of Radial Points er and András Vasy	113
Local En Asympto Dietrich I	ergy Decay for Several Evolution Equations on tically Euclidean Manifolds Häfner and Jean-François Bony	117
<b>Rayleigh</b> Sönke Ha	Surface Waves and Geometric Pseudo-differential Calculus	121
<b>Topologi</b> Gerardo <i>I</i>	cal Implications of Global Hypoellipticity A. Mendoza	125
<b>Chern-Si</b> Sergiu M	mons Line Bundle on Teichmüller Space oroianu and Colin Guillarmou	129
A Simple Asympto Ha Pham	e Diffractive Boundary Value Problem on an tically Anti-de Sitter Space	133
<b>Quantiza</b> Radu Pur	i <b>tion in a Magnetic Field</b> ice, Viorel Iftimie, and Marius Măntoiu	137
