Preface	ix
Prologue: Turning sand into gold - experience and image	1
<b>Part One: Agricultural development and adaptive economic theory</b>	
1 The strategic details of development	7
A microeconomic focus	7
Punjab agriculture	8
The traditional farmer as economic man	9
Strategic details of development	10
Interdependence of household-firm decisions	11
Technology	12
Technical change	13
Details of decision making	15
External linkages	18
Summary	18
2 An adaptive microeconomic theory	19
Decision and feedback	19
The farm as part of a complex system	19
Feasibility	20
Target planning	23
Satisficing	23
Caution	25
Utility	26
Sequential attention to goals	27
Imputation	29
Adaptation in response to feedback	30
Aggregation	31
The recursive programming approach	32
Mathematical notes	33
<b>Part Two: The Punjab simulation model</b>	
3 The Punjab	43
A green revolution case study	43
The Punjab	44
Economic characteristics	49
The development record	51

## Contents

4	A simulation model	60
	Introduction	60
	Basic hypotheses	61
	Activities	64
	Resource constraints	75
	Subsistence	79
	Safety	79
	Commercial consumption	84
	The profit objective	85
	Model summary	86
	Mathematical recapitulation	88
5	Model evaluation	94
	The problem of model evaluation	94
	The simulation results and visual comparisons	96
	Quantitative tests of fit	102
	Qualitative tests of fit	111
	Conclusions	116
	<b>Part Three: Tracking the green revolution</b>	
6	Tracking the green revolution	119
	Postmortems	119
	Aggregate farm output, input proportions, and factor productivity	120
	Technological diffusion	122
	Commercialization and capitalization of the farm sector	126
	Structural changes in farm employment	131
	Mechanization in a labor-surplus economy	132
	Conclusion	136
7	The drive to maturity	139
	Introduction	139
	Projections to 1980	139
	Long-term trends in factor use and substitution	140
	Factor pricing, factor availability and short-run factor substitution	145
	Conclusions	152
	<b>Part Four: Recent developments and policy perspectives</b>	
8	Recent developments	157
	Introduction	157
	Continued trends	158
	Growth of agricultural infrastructure	164
	Summary	166
9	Agriculture in transition: some policy perspectives	168
	Economic development: process and policies	168
	Mechanization, unemployment, and price distortions	169
	Problems of success	177

## *Contents*

<b>Epilogue: The nature of development and the model builder's role</b>	186
<b>Appendixes</b>	
<b>Appendix A: Type of farming areas in the Punjab</b>	191
Climate	191
Soils	191
Topography	192
Type of farming areas	193
<b>Appendix B: Activity analysis of farm production</b>	194
Introduction	194
Activity analysis	194
Production processes	224
Glossary	231
<b>Appendix C: Yield response</b>	236
Introduction	236
Traditional crops under irrigation	237
New varieties	242
Yield response without irrigation	246
Weather effects	248
<b>Appendix D: Estimating zones of flexible response</b>	253
<b>Appendix E: Coefficients and other data for the Punjab model</b>	256
<b>Appendix F: Model-generated measures of economic activity</b>	274
Notes	299
Bibliography	310
Index	322
