

Contents

The Biosaline Concept	1
J.C. Aller and O.R. Zaborsky	
Feed and Food from Desert Environments	17
J.A. Bassham	
Salt Tolerance of Plants: Strategies of Biological Systems	47
D.W. Rains	
The Potential of Native Plants for Food, Fiber and Fuel in Arid Regions	69
W.G. McGinnies	
Production of Food Crops and Other Biomass by Seawater Culture	77
E. Epstein, R.W. Kingsbury, J.D. Norlyn, and D.W. Rush	
Natural Halophytes as a Potential Resource for New Salt-Tolerant Crops: Some Progress and Prospects	101
G.F. Somers	
Silviculture with Saline Water	117
H.J. Teas	
Biochemical Control of Photosynthetic Carbon Assimilation in Marine Organisms for Food and Feed Production	163
C.C. Black, Jr.	
Biosaline Research: The Use of Photosynthetic Marine Organisms in Food and Feed Production	177
A. Mitsui	

Salt Tolerance in Microorganisms	217
J.K. Lanyi	
Prospects for Farming the Open Ocean	235
H.A. Wilcox	
Aquaculture of Animal Species	261
S.I. Doroshov, F.S. Conte and W.H. Clark, Jr.	
Biological Waste Treatment at Elevated Temperatures and Salinities	285
W.J. Oswald and J.R. Benemann	
Chemicals and Fuels from Semi-Arid Zone Biomass	309
J.R. Benemann	
Enzyme Technology: Potential Benefits of Biosaline Organisms	333
R.W. Coughlin and O.R. Zaborsky	
Potential for Genetic Engineering for Salt Tolerance	361
J. Mielenz, K. Andersen, R. Tait and R.C. Valentine	
Ecological Consideration of Biosaline Resource Utilization	371
J.L. Gallagher	
Index	379
