Preface	ix
1 The Estuary: its definition and geodynamic cycle	1
<i>R. W. Fairbridge</i>	
2 Physical factors: salinity, temperature, circulation, and mixing processes	37
<i>K. F. Bowden</i>	
3 Major and minor elements, chemical speciation in estuarine waters	71
<i>D. Dyrssen and M. Wedborg</i>	
4 Suspended matter in estuaries: adsorption and desorption processes	121
<i>J. C. Duinker</i>	
5 Sediment transport and sedimentation	153
<i>H. Postma</i>	
6 Sediment-water interactions and the geochemistry of interstitial waters	187
<i>B. J. Presley and J. H. Trefry</i>	
7 Nutrients, dissolved gases, and general biogeochemistry in estuaries	233
<i>S. R. Aston</i>	
8 Biotic aspects of the chemistry of estuaries	263
<i>W. J. Wolff</i>	
9 The carbon dioxide-calcium carbonate system in estuaries	296
<i>E. Olausson</i>	
10 Inorganic pollutants, particularly heavy metals in estuaries	307
<i>U. Förstner</i>	
11 Chlorinated hydrocarbons in estuaries	349
<i>L. Reutergårdh</i>	
12 Oil pollution of the marine environment—with an emphasis on estuarine studies	367
<i>S. R. Carlberg</i>	

13 Recovery and decontamination of estuaries	403
<i>I. Cato, I. Olsson, and R. Rosenberg</i>	
Subject Index	441
Systematic Index	448
Index of estuaries, rivers, and bays	450
