

# CONTENTS

1. The Global Copper Cycle	1
<i>Jerome O. Nriagu</i>	
2. The Distribution of Copper in Common Rocks and Ore Deposits	19
<i>Dennis P. Cox</i>	
3. Copper in the Atmosphere and Precipitation	43
<i>Jerome O. Nriagu</i>	
4. Copper in Natural Waters	77
<i>Edward A. Boyle</i>	
5. Aqueous Environmental Chemistry of Copper	89
<i>James O. Leckie and James A. Davis III</i>	
6. Removal of Copper from Wastewaters	123
<i>A. Netzer and S. Beszedits</i>	
7. Copper in Soils and Sediments	171
<i>Iain Thornton</i>	
8. Copper Retention by Soil/Sediment Components	217
<i>W. F. Pickering</i>	
9. Copper in Agricultural Crops	255
<i>Umesh C. Gupta</i>	

10.	Cycling of Copper in Woodland Ecosystems	289
	<i>Nicholas W. Lepp</i>	
11.	The Flow of Copper Through a Terrestrial Food Web	325
	<i>Wolfgang Wieser</i>	
12.	Copper Accumulations in Freshwater Biota	357
	<i>Pamela M. Stokes</i>	
13.	Copper Accumulations in Coastal and Marine Biota	383
	<i>Ronald Eisler</i>	
14.	Copper Contamination of Ecosystems Caused by Smelter Activities	451
	<i>Thomas C. Hutchison</i>	
	Index	503
