Contents

Appendix of Sources xi

Volume I

1. An Orientation to Applied Statistical Modeling in the Social Sciences 1
Salvatore Babones

1. Variables and Colinearity

2. Explaining Interstate Conflict and War: What Should Be Controlled For? 27
James Lee Ray
3. The Moderator–Mediator Variable Distinction in Social Psychological Research: Conceptual, Strategic, and Statistical Considerations 53
Reuben M. Baron and David A. Kenny
4. Understanding and Using Mediators and Moderators 75
Amery D. Wu and Bruno D. Zumbo
5. Collinearity, Power, and Interpretation of Multiple Regression Analysis 107
Charlotte H. Mason and William D. Perreault, Jr
6. A Caution Regarding Rules of Thumb for Variance Inflation Factors 135
Robert M. O'Brien
7. What to Do (and Not Do) with Multicollinearity in State Politics Research 153
Kevin Arceneaux and Gregory A. Huber

2. Interaction Models

8. Theory Building and the Statistical Concept of Interaction 175
Hubert M. Blalock, Jr
9. Testing for Interaction in Multiple Regression 185
Paul D. Allison
10. In Defense of Multiplicative Terms in Multiple Regression Equations 197
Robert J. Friedrich
11. Hypothesis Testing and Multiplicative Interaction Terms 233
Bear F. Braumoeller
12. Understanding Interaction Models: Improving Empirical Analyses 247
Thomas Brambor, William Roberts Clark and Matt Golder

3. Multilevel Models

13. Modeling Multilevel Data Structures 275
Marco R. Steenbergen and Bradford S. Jones
14. Multilevel Models: Methods and Substance 311
Thomas A. DiPrete and Jerry D. Forristal
15. Multilevel Analysis in Public Health Research 339
Ana V. Diez-Roux
16. Multilevel Modeling: A Review of Methodological Issues and Applications 363
Robert F. Dedrick, John M. Ferron, Melinda R. Hess, Kristine Y. Hogarty, Jeffrey D. Kromrey, Thomas R. Lang, John D. Niles and Reginald S. Lee
17. Sufficient Sample Sizes for Multilevel Modeling 401
Cora J.M. Maas and Joop J. Hox

Volume II

4. Models for Panel Data

18. Panel Models in Sociological Research: Theory into Practice 3
Charles N. Halaby
19. Problems with Repeated Measures Analysis: Demonstration with a Study of the Diversification and Performance Relationship 45
Donald D. Bergh
20. Modeling Error in Quantitative Macro-comparative Research 63
Salvatore J. Babones
21. Advances in Analysis of Longitudinal Data 97
Robert D. Gibbons, Donald Hedeker and Stephen DuToit

5. Time Series Cross-Sectional Analysis

22. What to Do (and Not to Do) with Time-Series Cross-Section Data 139
Nathaniel Beck and Jonathan N. Katz
23. Sense and Sensitivity in Pooled Analysis of Political Data 167
Bernhard Kittel
24. Dirty Pool 195
Donald P. Green, Soo Yeon Kim and David H. Yoon
25. Time-Series–Cross-Section Data: What Have We Learned in the Past Few Years? 225
Nathaniel Beck
26. A Lot More to Do: The Sensitivity of Time-Series Cross-Section Analyses to Simple Alternative Specifications 249
Sven E. Wilson and Daniel M. Butler

6. Spatial Models

27. Spatial Autocorrelation: Trouble or New Paradigm? 279
Pierre Legendre
28. "The Problem of Spatial Autocorrelation" and Local Spatial Statistics 305
A. Stewart Fotheringham
29. Under the Hood: Issues in the Specification and Interpretation of Spatial Regression Models 313
Luc Anselin
30. Spatial Regression Models for Demographic Analysis 347
Guangqing Chi and Jun Zhu
31. Space Is More Than Geography: Using Spatial Econometrics in the Study of Political Economy 375
Nathaniel Beck, Kristian Skrede Gleditsch and Kyle Beardsley

Volume III

7. Logistic Regression

32. An Introduction to Logistic Regression Analysis and Reporting 3
Chao-Ying Joanne Peng, Kuk Lida Lee and Gary M. Ingersoll
33. A Tutorial in Logistic Regression 27
Alfred DeMaris
34. Logistic Regression: Description, Examples, and Comparisons 49
S. Philip Morgan and Jay D. Teachman
35. Binary Response Models: Logits, Probits and Semiparametrics 63
Joel L. Horowitz and N.E. Savin
36. Logistic Regression: Why We Cannot Do What We Think We Can Do, and What We Can Do about It 79
Carina Mood

8. Multinomial Logit

37. A Primer for Social Worker Researchers on How to Conduct a Multinomial Logistic Regression 107
Carrie J. Petrucci
38. Multinomial Probit and Multinomial Logit: A Comparison of Choice Models for Voting Research 127
Jay K. Dow and James W. Endersby
39. A Conceptual Framework for Ordered Logistic Regression Models 143
Andrew S. Fullerton

9. Poisson Regression

40. Analysis of Count Data Using Poisson Regression 187
M. Katherine Hutchinson and Matthew C. Holtman

41. The Analysis of Count Data: Overdispersion and Autocorrelation 203
David N. Barron
42. Negative Multinomial Regression Models for Clustered Event Counts 239
Guang Guo
43. A Comparison of Poisson, Negative Binomial, and Semiparametric Mixed Poisson Regression Models: With Empirical Applications to Criminal Careers Data 255
Kenneth C. Land, Patricia L. McCall and Daniel S. Nagin

10. Instrumental Variables

44. Instrumental Variables and the Search for Identification: From Supply and Demand to Natural Experiments 301
Joshua D. Angrist and Alan B. Krueger
45. Controlling for Endogeneity with Instrumental Variables in Strategic Management Research 319
Guilhem Bascle
46. Model Specification in Instrumental-Variables Regression 365
Thad Dunning
47. That Instrument Is Lousy! In Search of Agreement When Using Instrumental Variables Estimation in Substance Use Research 383
Michael T. French and Ioana Popovici

Volume IV

11. Structural Equation Modeling

48. Path Analysis: Sociological Examples 3
Otis Dudley Duncan
49. Structural Equation Models 25
William T. Bielby and Robert M. Hauser
50. Practical Issues in Structural Modeling 53
P.M. Bentler and Chih-Ping Chou
51. Total, Direct, and Indirect Effects in Structural Equation Models 83
Kenneth A. Bollen
52. Principles and Practice in Reporting Structural Equation Analyses 113
Roderick P. McDonald and Moon-Ho Ringo Ho
53. Instrumental Variables in Sociology and the Social Sciences 143
Kenneth A. Bollen

12. Latent Variable Models

54. Confirmatory Factor-Analytic Structures and the Theory Construction Process 195
Ronald S. Burt

55. Latent Variables in Psychology and the Social Sciences 241
Kenneth A. Bollen
56. Specification, Evaluation, and Interpretation of Structural Equation Models 273
Richard P. Bagozzi and Youjae Yi
57. Latent Variable Models under Misspecification: Two-Stage Least Squares (2SLS) and Maximum Likelihood (ML) Estimators 321
Kenneth A. Bollen, James B. Kirby, Patrick J. Curran, Pamela M. Paxton and Feinian Chen
58. The Fallacy of Formative Measurement 355
Jeffrey R. Edwards
