

# Correlations, Entanglement and Quantum Phases in Low-Dimensional Frustrated Spin Systems

Dissertation

Daniel Sellmann

Vom Fachbereich Physik der Technischen Universität Kaiserslautern  
zur Erlangung des akademischen Grades "Doktor der  
Naturwissenschaften" genehmigte Dissertation.

Betreuer: Prof. Dr. Sebastian Eggert  
Zweitgutachter: Prof. Dr. Michael Fleischhauer

Datum der wissenschaftlichen Ausprache: 12.12.2014

D 386

# Contents

<b>Introduction</b>	<b>11</b>
<b>I Background</b>	<b>13</b>
<b>1 Quantum Phase Transitions</b>	<b>15</b>
1.1 Examples . . . . .	16
1.2 Statistical Mechanics Description . . . . .	17
1.3 Symmetry, Order Parameter and Landau Theory . . . . .	18
1.4 Quantum Phase Transitions . . . . .	20
1.5 Spin Liquid: A Topological Phase . . . . .	22
<b>2 Spin Models of Magnetic Materials</b>	<b>23</b>
2.1 The Ising Model . . . . .	24
2.1.1 The Ising Model in One Dimension . . . . .	25
2.1.2 The Ising Model in Two Dimensions and a First Look at Frustration . . . . .	27
2.2 The Heisenberg Model . . . . .	28
2.2.1 One Dimensional Heisenberg Model and Jordan Wigner Transformation . . . . .	29
2.2.2 Phase Diagram of the Heisenberg Chain . . . . .	30
2.2.3 The Case $\Delta = 0$ and a Check of Correlation Functions . . . . .	31
2.3 The Frustrated Heisenberg Model . . . . .	32
2.4 Towards two Dimensions: Spin Ladders . . . . .	33
2.4.1 Phases of the Cross Coupled Ladder . . . . .	34
<b>3 Entanglement and Quantum Correlations</b>	<b>37</b>
3.1 Introduction . . . . .	37
3.2 Entropy in Information Theory . . . . .	39

3.3	Measures of Entanglement . . . . .	41
3.3.1	Entanglement Entropy . . . . .	41
3.3.2	Concurrence . . . . .	42
3.3.3	First Example . . . . .	42
3.3.4	Second Example . . . . .	45
3.4	Quantum Discord . . . . .	47
3.4.1	Definition . . . . .	47
3.4.2	Example . . . . .	48
3.5	Entanglement in Spin Models . . . . .	50
3.6	Entanglement and Quantum Phase Transitions . . . . .	50
3.7	Topological Entanglement Entropy . . . . .	51
<b>4</b>	<b>The Density Matrix Renormalization Group</b>	<b>53</b>
4.1	Motivation . . . . .	54
4.2	The Method . . . . .	55
4.2.1	The Infinite Size Algorithm . . . . .	55
4.2.2	The Finite Size Algorithm . . . . .	57
4.3	Computational Complexity and Boundary Conditions . . . . .	58
4.4	DMRG in Two Dimensions . . . . .	59
4.5	Details of the Implementation . . . . .	61
4.5.1	Computational Linear Algebra . . . . .	62
4.5.2	Diagonalization of the Superblock Hamiltonian . . . . .	62
4.5.3	Symmetries . . . . .	63
4.5.4	Example for the Usage of Symmetries . . . . .	64
4.5.5	Kronecker Product for Block Operators . . . . .	65
4.5.6	Example of Superblock Diagonalization . . . . .	67
4.5.7	Parallelization . . . . .	69
<b>II</b>	<b>Results</b>	<b>71</b>
<b>5</b>	<b>Spin Ladders with Enlarged Unit Cells</b>	<b>73</b>
5.1	Analytical Method . . . . .	74
5.2	How to Find the Dimer phase Numerically . . . . .	75
5.2.1	Order Parameter . . . . .	76
5.2.2	Entanglement Measures . . . . .	77

---

5.3	Phase Diagram . . . . .	77
5.4	The $J_1 - J_2$ Square Antiferromagnet . . . . .	82
5.5	A New Gapless Phase? . . . . .	85
5.6	Summary and Outlook . . . . .	89
<b>6</b>	<b>The Heisenberg Model on the Triangular Lattice</b>	<b>91</b>
6.1	Motivation . . . . .	92
6.1.1	Spins . . . . .	92
6.1.2	Bosons . . . . .	93
6.2	Holstein Primakoff Transformation . . . . .	93
6.3	Classical Analysis . . . . .	95
6.4	Exact Solutions . . . . .	102
6.5	How to Get the Phase Diagram for the Quantum Case . . . . .	103
6.5.1	DMRG . . . . .	104
6.6	Quantum Analysis . . . . .	106
6.6.1	The Case $J/J_z = 1$ . . . . .	106
6.6.2	Strong Coupling Region . . . . .	107
6.6.3	The Transition Line to the Umbrella Phase . . . . .	108
6.7	Complete Phase Diagram . . . . .	110
6.8	Summary and Outlook . . . . .	112
<b>7</b>	<b>Frustration in One Dimension: Dzyaloshinskii-Moria Interaction</b>	<b>115</b>
7.1	Model . . . . .	115
7.2	Classical Solution . . . . .	116
7.3	Investigation using DMRG . . . . .	119
7.3.1	Quantum Discord for the XXZ Chain . . . . .	120
7.3.2	Level Crossings . . . . .	122
7.3.3	The Transition Line between Neel Z and Neel Y Phase . . . . .	123
7.4	Summary, Conclusions and Outlook . . . . .	124
<b>A</b>	<b>Comparison of DMRG Data to Exact Results and Finite Size Scaling</b>	<b>125</b>
A.1	Comparison of Energies for the XX Model . . . . .	125
A.2	Finite Size Scaling of the Energy . . . . .	126
A.3	Check of Pair Correlation Functions . . . . .	128
<b>B</b>	<b>Perfomance Data &amp; Scalability</b>	<b>129</b>
<b>C</b>	<b>Bibliography</b>	<b>131</b>
