

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Motivation and Previous Related Works .....	1
1.2	Our Results .....	3
1.3	Application: Compactifications of the Universal Jacobian .....	10
1.4	Open Problems .....	12
1.5	Outline of the Manuscript.....	13
1.6	Conventions .....	15
<b>2</b>	<b>Singular Curves</b> .....	17
2.1	Stable, $p$ -Stable and $wp$ -Stable Curves.....	17
2.2	Quasi- $wp$ -Stable Curves and $wp$ -Stable Reduction.....	22
<b>3</b>	<b>Combinatorial Results</b> .....	27
3.1	Balanced Multidegree and the Degree Class Group .....	27
3.2	Stably and Strictly Balanced Multidegrees on Quasi- $wp$ -Stable Curves .....	35
<b>4</b>	<b>Preliminaries on GIT</b> .....	45
4.1	Hilbert and Chow Schemes of Curves.....	45
4.2	Hilbert-Mumford Numerical Criterion for $m$ -Hilbert and Chow (Semi)stability .....	47
4.3	Basins of Attraction .....	54
4.4	Flat Limits and Gröbner Bases .....	55
4.5	The Parabolic Group .....	57
4.6	Stability of Smooth Curves and Potential Stability .....	59
<b>5</b>	<b>Potential Pseudo-Stability Theorem</b> .....	61
5.1	Balanced Line Bundles and Quasi- $wp$ -Stable Curves .....	71
<b>6</b>	<b>Stabilizer Subgroups</b> .....	73
<b>7</b>	<b>Behavior at the Extremes of the Basic Inequality</b> .....	81
7.1	Closure of Orbits .....	85

<b>8</b>	<b>A Criterion of Stability for Tails</b> .....	91
<b>9</b>	<b>Elliptic Tails and Tacnodes with a Line</b> .....	107
<b>10</b>	<b>A Stratification of the Semistable Locus</b> .....	117
	10.1 Specializations of Strata .....	118
	10.2 A Completeness Result .....	123
<b>11</b>	<b>Semistable, Polystable and Stable Points (Part I)</b> .....	131
<b>12</b>	<b>Stability of Elliptic Tails</b> .....	141
<b>13</b>	<b>Semistable, Polystable and Stable Points (Part II)</b> .....	149
<b>14</b>	<b>Geometric Properties of the GIT Quotient</b> .....	155
<b>15</b>	<b>Extra Components of the GIT Quotient</b> .....	167
<b>16</b>	<b>Compactifications of the Universal Jacobian</b> .....	171
	16.1 Caporaso's Compactification .....	171
	16.2 Two New Compactifications of the Universal Jacobian Stack $\mathcal{J}_{d,g}$ .....	173
	16.3 Existence of Moduli Spaces for $\overline{\mathcal{J}}_{d,g}^{\text{ps}}$ and $\overline{\mathcal{J}}_{d,g}^{\text{wp}}$ .....	179
	16.4 An Alternative Description of $\overline{\mathcal{J}}_{d,g}$ , $\overline{\mathcal{J}}_{d,g}^{\text{ps}}$ and $\overline{\mathcal{J}}_{d,g}^{\text{wp}}$ .....	182
<b>17</b>	<b>Appendix: Positivity Properties of Balanced Line Bundles</b> .....	197
	<b>References</b> .....	205
	<b>Index</b> .....	209
