

CONTENTS

Preface	viii
1 General Introduction	1
1.1 Argument-Verb Dependencies	1
1.2 Working Memory	3
1.3 Argument-Verb Dependencies and Working Memory	6
1.4 Open Issues	9
2 General Methodology	13
2.1 Magnetic Resonance Imaging	13
2.1.1 Functional Magnetic Resonance Imaging	13
2.1.2 Voxel-Based Morphometry	15
2.1.3 Diffusion-Weighted Imaging and Diffusion-Tensor Imaging	17
2.2 Electroencephalography	20
2.2.1 Event-Related Brain Potentials	20
2.2.2 Time-Frequency Analysis	22
2.2.3 Source Localization	24
2.3 Experimental Paradigm	25
2.3.1 Linguistic Considerations	26
2.3.2 Psycholinguistic Considerations	27
2.3.3 Psychological Considerations	28

2.3.4	General Hypotheses	29
3	Behavioral Study	31
3.1	Introduction	31
3.2	Methods	32
3.2.1	Participants	32
3.2.2	Materials	33
3.2.3	Procedure	33
3.3	Data Analysis	33
3.4	Results	34
3.5	Discussion	36
4	Magnetic-Resonance-Imaging Study	39
4.1	Introduction	39
4.2	Methods	42
4.2.1	Participants	42
4.2.2	Working-Memory Test	42
4.2.3	Materials	42
4.2.4	Procedure	43
4.2.5	Magnetic-Resonance-Imaging Data Acquisition	43
4.2.6	Data Analysis	44
4.2.6.1	Behavioral Data	44
4.2.6.2	Functional-Magnetic-Resonance-Imaging Data	45
4.2.6.3	Correlation Analysis	45
4.2.6.4	Voxel-Based Morphometry	46
4.2.6.5	Diffusion-Tensor Imaging and Fractional Anisotropy	47
4.3	Results	48
4.3.1	Behavioral Results	48
4.3.2	Functional-Magnetic-Resonance-Imaging Results	49
4.3.3	Voxel-Based-Morphometry Results	51

4.3.4 Diffusion-Tensor-Imaging and Fractional-Anisotropy Results 53

4.4 Discussion 54

4.4.1 Behavioral Results 54

4.4.2 Functional-Magnetic-Resonance-Imaging Results 55

 4.4.2.1 The Left Inferior Frontal Gyrus Activates for Reordering 56

 4.4.2.2 The Left Temporo-Parietal Region Activates for Storage 59

4.4.3 Individual Differences: Asymmetry of the Inferior Frontal Gyrus 61

4.4.4 Diffusion-Tensor-Imaging and Fractional-Anisotropy Results 64

4.5 Conclusion 67

5 Patient Study 69

5.1 Introduction 69

5.2 Methods 71

 5.2.1 Participants 71

 5.2.2 Working-Memory Test Battery 72

 5.2.3 Materials 72

 5.2.4 Procedure 72

 5.2.5 Magnetic-Resonance-Imaging Data Acquisition 73

 5.2.6 Data Analysis 74

 5.2.6.1 Working-Memory Test Battery 74

 5.2.6.2 Behavioral Data 74

 5.2.6.3 Diffusion-Tensor Imaging 74

5.3 Results 75

 5.3.1 Working-Memory Results 75

 5.3.2 Sentence-Processing Results 76

 5.3.3 Diffusion-Tensor-Imaging Results 77

5.4 Discussion 78

5.5 Conclusion 80

6 Electroencephalography Study 83

6.1	Introduction	83
6.2	Methods	86
6.2.1	Participants	86
6.2.2	Materials	86
6.2.3	Procedure	86
6.2.4	Data Analysis	88
6.2.5	Source Localization	89
6.2.6	Correlation Analysis	89
6.3	Results	90
6.3.1	Behavioral Results	90
6.3.2	Time–Frequency Results	90
6.3.3	Source Localization of Alpha Activity: Results	91
6.3.4	Results of the Correlation Analysis	93
6.4	Discussion	93
6.5	Conclusion	98
7	Combined Analyses	101
7.1	Introduction	101
7.2	Methods	105
7.2.1	Participants	105
7.2.2	Materials	105
7.2.3	Procedure	106
7.2.4	Data Acquisition	107
7.2.5	Data Analysis	107
7.2.6	Combined Analyses in Sensor and Source Space	107
7.3	Results	109
7.3.1	Behavioral Results	109
7.3.2	Combined Analyses	109
7.4	Discussion	112
7.4.1	Behavioral Data	112

7.4.2	Combined Analyses	112
7.5	Conclusion	117
8	General Discussion	119
8.1	Summary of Experimental Findings	119
8.2	The Inferior Frontal Gyrus: Reordering, Rehearsal, or Both?	122
8.3	The Temporo-Parietal Region: Storage, Retrieval, or Both?	125
8.4	The Dorsal Tract: Syntax, Working Memory, or Both?	129
9	Towards a Testable Framework	135
9.1	Reordering: Beyond Sentence Processing	137
9.2	The Inferior Parietal Cortex: Beyond Working Memory	138
9.3	Disentangling Reordering and Rehearsal	139
9.4	Brain Oscillations and Fronto-Temporal Connectivity	140
	References	143
	List of Figures	185
	List of Tables	189
	Abbreviations	191
	Appendix A Stimuli from Behavioral, fMRI and EEG Studies	A-1
	Appendix B Stimuli from Patient Study	B-7
	Appendix C Fillers from Behavioral Study	C-13
	Appendix D Fillers from Behavioral and MRI Studies	D-19
