Preface	1
I Theoretical and Empirical Background	5
1 Language Processing	7
1.1 Functional Neurocognitive Architecture	7
1.1.1 Processing of Words in Speech	10
1.1.2 Processing of Pitch in Speech	13
1.2 Summary	14
2 Music Processing	15
2.1 Neurocognitive Models of Music Processing	15
2.1.1 A Model Based on Brain Lesions and Musical Disorder	15
2.1.2 A Model Based on Healthy Individuals	17
2.2 Functional Neurocognitive Architecture	19
2.2.1 Processing of Words in Music	19
2.2.2 Processing of Pitch in Music	22
2.3 Summary	25
3 Music and Language	27
3.1 A Double-Dissociation of Music and Language	27
3.2 A Model of Music and Language Processing	29
3.3 Word Processing in Music and Speech	30
3.4 Pitch Processing in Music and Speech	31
3.5 Rhythm Processing in Music and Speech	34
3.6 The Role of the Temporal Lobe	38
3.7 The Role of the Parietal Lobe	40
3.8 Summary	44

4	Song and Speech	45
4.1	Similarities and Differences between Song and Speech	46
4.2	Song and Speech in Production	48
4.3	Song and Speech in Perception	51
4.4	Summary	53
5	Deficits in Music Processing	55
5.1	Congenital Amusia	55
5.2	Acquired Amusia	58
5.3	Summary	62
6	Methods	63
6.1	Functional Magnetic Resonance Imaging (fMRI)	63
6.1.1	Multivariate Pattern Analysis (MVPA)	64
6.2	The Lesion Method	65
II	Experiments	67
7	Research Questions	69
8	Experiment 1 – fMRI Study – Perception of Song and Speech	71
8.1	Introduction	71
9	Experiment 1A – Behavioral Study	77
9.1	Methods	77
9.2	Results	81
9.3	Discussion	89
9.4	Conclusion	91
10	Experiment 1B – fMRI Study Part 1 – Direct Comparisons	93
10.1	Methods	94
10.1.1	Participants	94
10.1.2	Materials	94
10.1.3	Procedure	95
10.1.4	Data Analysis	96
10.2	Results	97
10.2.1	Direct Comparison of Sung and Spoken Sentences	97
10.2.2	Direct Comparison of Sung and Spoken Melodies	98
10.3	Discussion	98

10.3.1	Comparison of Song and Speech	100
10.3.2	Comparison of Prosody and Melody	102
10.4	Limitations of the Current Approach	104
10.5	Conclusion	105
11	Experiment 1B – fMRI Study Part 2 – Words and Pitch Patterns	107
11.1	Data Analysis	107
11.2	Results	109
11.2.1	Words in Song and Speech	109
11.2.2	Pitch Patterns in Song and Speech	110
11.2.3	Word and Pitch Processing in Vocal Stimuli	113
11.3	Discussion	113
11.4	Conclusion	120
11.5	Summary of Part 1 and Part 2	120
12	Experiment 2 – A Behavioral Approach on Lesions and Musical Disorder	125
12.1	Methods	127
12.1.1	Participants	127
12.1.2	Stimulus Material and Procedure	135
12.2	Results	137
12.2.1	Temporal Lobe Lesion Patients	137
12.2.2	Amusics	140
12.3	Discussion	141
12.4	Conclusion	146
13	General Discussion	147
13.1	Summary	154
13.2	Future Perspectives	154
A	Appendix	159
A.1	Stimulus Material	159
A.2	CD Index	159
	Bibliography	161
	List of Abbreviations	189
	List of Figures	191
	List of Tables	193
