Contents

1 Introduction 1
1.1 Why Do We Need Nonlinear Models? 1
1.2 Content of the Book 2
1.3 Some Examples of Time Series 4
1.4 Some Simulated Time Series 12
References 21

2 Nonlinear Time Series Models 23
2.1 Some Probabilistic Aspects of Nonlinear Processes 23
2.1.1 Linear Representations and Linear Models 23
2.1.2 Linear and Nonlinear Optimal Predictions 25
2.1.3 Nonlinear Representations 32
2.1.4 Sensitive Dependence on Initial Conditions, Lyapunov Exponents 40
2.1.5 Limit Cycles 45
2.1.6 Time Reversibility 47
2.1.7 Invertibility 48
2.2 A Selection of Nonlinear Time Series Models 48
2.2.1 Parametric Models for the Conditional Mean 49
2.2.2 Exponential Autoregressive Models 56
2.2.3 Polynomial-Type Models 57
2.2.4 Bilinear Models 57
2.2.5 Parametric Models for the Conditional Variance 63
2.2.6 Mixed Models for the Conditional Mean and Variance 72
2.2.7 Generalized State Space Models 74
2.2.8 Max-Stable Moving Average Processes 83
2.2.9 Nonparametric Methods 84
References 87

3 Extremes of Nonlinear Time Series 91
3.1 Tail Behavior 91
3.1.1 Extreme Value Theory 92
3.1.2 Tail Behavior of Linear Processes 94
3.1.3 Bivariate Regular Variation and the Coefficient of Tail Dependence 97
3.2 Connection Between Nonlinearity and Heavy Tails 99
3.2.1 Extremal Properties of Certain Types of Nonlinear Difference Equations 101
3.2.2 Tails of Bilinear Processes 108
3.2.3 The Relation Between the Extremes of Finite-Order Volterra Series and Bilinear Processes 110
3.3 Linear Models at the Presence of Heavy Tails 115
References 118

4 Inference for Nonlinear Time Series Models 121
4.1 Identification of Nonlinearity 121
4.1.1 Graphical Methods and Other Informal Tests for Types of Nonlinearity 122
4.1.2 Statistical Tests for Linearity and Gaussianity 124
4.2 Checking for Stationarity and Invertibility 128
4.3 Tail Index Estimation 133
4.4 Methods of Inference 137
4.4.1 Least Squares and Likelihood Methods 137
4.4.2 Estimating Functions 141
4.4.3 Composite Likelihood Methods 160
4.5 Bayesian Methods 165
4.5.1 Simulation-Based Methods 166
4.5.2 Sequential MCMC Methods for Generalized State Space Models 174
4.6 Parameter Estimation for GARCH-Type Processes 178
4.6.1 Conditional Maximum Likelihood 179
4.6.2 Whittle Estimation 184
4.6.3 Bayesian Approach 188
References 193

5 Models for Integer-Valued Time Series 199
5.1 Introduction 199
5.2 Integer-Valued ARMA Models 203
5.2.1 INAR(1) Model 204
5.2.2 INAR(p) Model 211
5.2.3 INMA(q) Model 214
5.3 Parameter Estimation 216
5.3.1 Moment-Based Estimators 216
5.3.2 Conditional Least Squares 218

5.3.3 Conditional Maximum Likelihood Estimation 220
5.3.4 Bayesian Approach 223
5.4 Model Selection 226
5.5 Extremal Behavior 230
5.5.1 Some Extensions 235
