Contents

Introduction .................................................................................................................. VII

1 Risk Level Control in Ecological-Economic Systems ............................................ 1
   1.1 Environmental and Anthropogenic Risks ......................................................... 1
   1.2 Risk Level Assessment Methods ...................................................................... 6
   1.3 Optimization Mechanisms for Risk Level Reduction Programs .................... 7

2 Control Mechanisms at the Level of Industrial Enterprises ............................. 25
   2.1 Penalty Mechanisms ...................................................................................... 27
   2.2 Risk Payment Mechanisms .......................................................................... 37
   2.3 Financing Mechanisms for Risk Level Reduction ......................................... 43
   2.4 Costs Compensation Mechanisms for Risk Level Reduction ....................... 44
   2.5 Insurance Mechanisms ............................................................................... 53
   2.6 Audit Mechanisms ...................................................................................... 60
   2.7 Mechanisms for Expected Losses Reduction ................................................. 63

3 Control Mechanisms at the Level of Regional Authorities .............................. 71
   3.1 Control Model for Regional Environmental Safety Level .............................. 71
   3.2 Risk Payment Mechanisms .......................................................................... 79
   3.3 Financing Mechanisms for Risk Level Reduction ......................................... 83
   3.4 Costs Compensation Mechanisms for Risk Level Reduction ....................... 85
   3.5 Sales Mechanisms for Risk Level Quotas .................................................... 87
   3.6 Insurance Mechanisms ............................................................................... 94
   3.7 Economic Motivation Mechanisms ............................................................. 105
   3.8 Mechanisms for Authorities’ Interests Coordination .................................... 111

4 Simulation Models for Control Mechanisms in Ecological-Economic Systems .. 117
   4.1 Gaming Simulation of Control Mechanisms .................................................. 117
   4.2 Risk Payment Mechanisms: A Simulation Game .......................................... 120

Burkov, Vladimir N.
Control mechanisms for ecological-economic systems
2015
4.3 Incentive Mechanisms for Risk Level Reduction: A Simulation Game .......................... 128
4.4 Financing Mechanisms for Risk Level Reduction: A Simulation Game ........................ 132
4.5 Costs Compensation Mechanisms for Risk Level Reduction: A Simulation Game .......... 145
4.6 Sales Mechanisms for Risk Level Quotas: A Simulation Game ................................. 148

Conclusion .......................................................................................................................... 155

Appendix. Basic Symbols and Abbreviations .................................................................... 157
