

Contents

List of Tables.....	xiii
List of Figures.....	xv
Series Preface.....	xxv
Foreword.....	xxvii
Preface.....	xxxix
Acknowledgments.....	xxxv
Author.....	xxxix

Part I

Overview

Chapter 1

Introduction.....	3
Coastal Ecosystems.....	7
Ecosystem Research.....	8
Studies in the Northeast Gulf of Mexico.....	13

Chapter 2

Methods.....	15
--------------	----

Part II

Long-Term Habit at Conditions

Chapter 3

Regional Background.....	23
--------------------------	----

Chapter 4

Rainfall and River Flows: Long-Term Changes.....	29
--	----

Chapter 5

Nutrient Loading: Natural versus Anthropogenic Inputs.....	39
--	----

Chapter 6

Dredged Passes to the Gulf: Comparative Effects.....	45
Methods.....	47
Stratification Comparisons: Dissolved Oxygen.....	47
Biological Impacts.....	54

Part III

Trophic Response to Long-Term Climate Changes

Chapter 7

Climatological Impacts on Gulf Estuaries.....	63
Apalachee Bay	63
Background	63
Rainfall and River Flows	68
Climatological Conditions and Nutrient Loading	70
Trends of Water Quality	70
Climatic Effects on Phytoplankton	74
Submerged Aquatic Vegetation.....	85
Fishes.....	94
Invertebrates	99
Conclusions	101
Apalachicola Estuary	106
Background	106
River–Bay Linkages.....	113
Population Distributions in the Bay	116
Rainfall and River Flows	119
Oysters.....	121
Fishes and Invertebrates	128
Long-Term Drought Effects on Bay Fisheries.....	134
Conclusions	136
Perdido Estuary.....	137
Background	137
Physical Structure of Perdido Estuary	142
River Flows.....	143
Salinity Stratification and Dissolved Oxygen	144
Effects of Climate on Nutrient Loading.....	146
Nutrient Limitation Experiments	150
Climatological Control of Plankton Blooms.....	151
Secondary Productivity and Trophic Organization	168
<i>Mediomastus ambiseta</i>	171
<i>Streblospio benedicti</i>	173
<i>Callinectes sapidus</i>	176
<i>Leiostomus xanthurus</i>	176
<i>Micropogonias undulatus</i>	176
<i>Rangia cuneata</i>	176
Conclusions	187

Part IV

Impacts of Anthropogenic Nutrient Loading

Chapter 8

Estuarine Response to Urban Nutrient Loading.....	195
Choctawhatchee Estuary.....	195
Background	195
River Flow and Nutrient Loading	198

Salinity Stratification and Dissolved Oxygen	198
Sediment and Water Quality Factors	199
Plankton Distributions.....	201
Infaunal Macroinvertebrates and Fishes	204
Discussion.....	206
Pensacola Estuary	209
Background	209
River Flows and Nutrient Loading.....	213
Sediment and Water Quality	213
Salinity Stratification and Dissolved Oxygen	215
Chlorophyll <i>a</i>	217
Plankton Assemblages and Blooms	219
Animal Population Distribution and Trophic Organization.....	220
Statistical Analyses	224
Discussion.....	228

Part V

Comparative Analysis of Gulf Ecosystems

Chapter 9

Trophic Organization.....	233
Interacting Processes.....	233
Background	233
Sediment Comparisons	235
Salinity/Depth Relationships.....	238
Comparison of FII Trophic Indices.....	240
Apalachicola Model	251

Part VI

Information Dissemination

Chapter 10

Omission and Misrepresentation by Regional News Media.....	265
--	-----

Part VII

Closing

Conclusions	287
Appendix A: Field/Laboratory Methods Used for the CARRMA Studies (1970–2012)	293
Appendix B: Statistical Analyses Used in the Long-Term Studies of the NE Gulf of Mexico (1970–2012)	343
Appendix C: Lists of Species of Plants and Animals Taken in the Various River–Bay Systems in the NE Gulf of Mexico	351
Appendix D: Personnel Involved in the Perdido Study (1988–2007).....	425
Appendix E: Final Recommended Order, Lane et al. vs International Paper and FDEP, Bram D. E. Canter, Presiding (2007)	429
References.....	461
Index	515
