

Contents

Preface to the Second Edition	xiii
Preface to the First Edition	xv
Chapter 1. Introduction	1
1. What Is Technological Forecasting?	1
2. Why Forecast Technology?	4
3. Alternatives to Forecasting	5
4. Will It Come True?	8
5. Stages of Innovation	9
6. Remainder of the Book	11
References	12
For Further Reference	12
Problems	12
Chapter 2. Delphi	14
1. Introduction	14
2. Advantages of Committees	15
3. Disadvantages of Committees	15
4. The Delphi Procedure	16
5. Conducting a Delphi Sequence	17
6. Variations on Delphi	20
7. Delphi as a Group Process	22
8. The Precision of Delphi	24
9. The Reliability of Delphi	25
10. Selecting Delphi Panel Members	26
11. Guidelines for Conducting a Delphi Sequence	29
12. Constructing Delphi Event Statements	33
13. Summary	35

References	36
For Further Reference	36
Problems	36
Chapter 3. Forecasting by Analogy	39
1. Introduction	39
2. Problems of Analogies	39
3. Dimensions of Analogies	40
4. Deviations from a Formal Analogy	49
5. Summary	50
References	51
Problems	51
Chapter 4. Growth Curves	53
1. Introduction	53
2. Substitution Curves	54
3. The Pearl Curve	57
4. The Gompertz Curve	58
5. Choosing the Proper Growth Curve	58
6. The Base 10 Pearl Curve	59
7. The Fisher-Pry Curve	60
8. Estimating the Upper Limit to a Growth Curve	61
9. Selecting Variables for Substitution Curves	62
10. An Example of a Forecast	63
References	66
For Further Reference	67
Problems	67
Chapter 5. Trend Extrapolation	69
1. Introduction	69
2. Exponential Trends	70
3. An Example of a Forecast	73
4. A Model for Exponential Growth	73
5. Nonexponential Growth	79
6. Qualitative Trends	81
7. A Behavioral Technology	81
8. Summary	84
References	84
For Further Reference	85
Problems	85
Chapter 6. Measures of Technology	86
1. Introduction	86
2. Scoring Models	88
3. Constrained Scoring Models	93

4. Planar Tradeoff Surfaces	94
References	97
Problem	97
Chapter 7. Correlation Methods	98
1. Introduction	98
2. Lead-Lag Correlation	98
3. Technological Progress Function	103
4. Maximum Installation Size	104
5. Correlation with Economic Factors	106
References	108
Problems	109
Chapter 8. Causal Models	110
1. Introduction	110
2. Technology-Only Models	111
3. A Technoeconomic Model	117
4. A Simulation Model	121
5. Summary	126
References	127
For Further Reference	127
Problems	127
Chapter 9. Forecasting Breakthroughs	129
1. Introduction	129
2. Examples of Breakthroughs	130
A. Atomic Energy	130
B. The Transistor	133
C. Penicillin	133
3. Monitoring for Breakthroughs	134
4. Where to Look for Signals	136
5. An Example	138
6. Summary	142
References	142
For Further Reference	143
Problems	143
Chapter 10. Combining Forecasts	145
1. Introduction	145
2. Trend and Growth Curves	145
3. Trend and Analogy	146
4. Components and Aggregates	147
5. Scenarios	148
6. Cross Impact Models	150
7. Summary	155

Reference	155
For Further Reference	155
Problems	156
Chapter 11. Normative Methods	159
1. Introduction	159
2. Relevance Trees	159
3. Morphological Models	163
4. Mission Flow Diagrams	165
5. Summary	167
Reference	168
For Further Reference	168
Problems	169
Chapter 12. Planning and Decision Making	171
1. Introduction	171
2. The Purpose of Planning	172
3. The Role of the Forecast	174
4. Decision Making	175
5. Summary	177
Problems	177
Chapter 13. Technological Forecasting for Research and Development Planning	178
1. Introduction	178
2. Research	179
3. Technology Advancement	182
4. Product Development	184
5. Testing and Evaluation	187
6. Summary	189
For Further Reference	189
Problems	190
Chapter 14. Technological Forecasting in Business Decision	192
1. Introduction	192
2. What Business Are We In?	193
3. Business Planning for Technological Change	195
4. Secondary Impacts	199
5. Summary	200
For Further Reference	200
Problems	201

Chapter 15. Technological Forecasting in Government Planning	202
1. Introduction	202
2. Internal Operations of Government	202
3. Regulatory Agencies	204
4. Public Goods	207
5. Changes in the Form of Government	210
6. Summary	212
For Further Reference	212
Problems	213
Chapter 16. Technology Assessment	215
1. Introduction	215
2. Some Historical Cases	216
3. The Role of Technological Forecasting	221
4. An Example	222
5. Summary	224
For Further Reference	225
Problems	225
Chapter 17. Some Common Forecasting Mistakes	226
1. Introduction	226
2. Environmental Factors That Affect Forecasts	229
3. Personal Factors That Affect Forecasts	235
4. Core Assumptions	240
5. Summary	246
References	247
Problems	247
Chapter 18. Evaluating Forecasts as Decision Information	250
1. Introduction	250
2. The Interrogation Model	251
3. Summary	259
Problems	259
Chapter 19. Presenting the Forecast	261
1. Introduction	261
2. Making the Forecast Useful	262
3. Making the Forecast Credible	271
4. A Checklist for Forecasts	278
5. Summary	281
References	282
For Further Reference	282
Problems	282

Appendix 1. Regression Analysis of Time Series	285
1. Introduction	285
2. Statistical Analysis	286
3. Simple Regression	299
4. Parabolic Regression	312
5. Multiple Linear Regression	318
6. Summary	326
References	326
Problems	327
Appendix 2. Statistical Tables	329
Appendix 3. Historical Data Tables	333
Appendix 4. Computer Programs	373
1. Introduction	373
2. KSIM	373
3. Growth	376
4. Regress	379
Index	383
