Preface to the Third Edition	ix
Preface to the Second Edition	xiii
Preface to the First Edition	xvii
I Prologue	1
1 Stylized Facts on Fiscal Policies and International Economic Interdependence	3
II Traditional Approaches	27
2 The Income-Expenditure Model: Fiscal Policies and the Determination of Output	29
3 The Mundell-Fleming Model: Deterministic Dynamics	65
4 The Mundell-Fleming Model: Stochastic Dynamics	131
Problems	147
III The Intertemporal Approach	153
5 The Two-Period Composite-Commodity World	155
6 The Two-Period Multiple-Good World	189

7	Current-Account Dynamics	207
	Problems	239
IV An Intertemporal Approach to Fiscal Policies in the World Economy 253		
8	Government Spending: Volume and Composition	255
9	Budget Deficits with Nondistortionary Taxes: The Pure Wealth Effect	311
10	An Exposition of the Two-Country Overlapping-Generations Model	339
11	Fundamental Relations in International Taxation	377
	Problems	401
V Economic Growth and International Convergence 407		
12	Exogenous Growth under International Capital and Labor Mobility	409
13	Endogenous Growth under International Capital and Labor Mobility	433
14	International Taxation and Exogenous Growth	447
15	International Taxation and Endogenous Growth	459
	Problems	477

VI Epilogue 483

16 Analytical Overview: Traditional versus Modern Approaches 485

17 Policy Overview: Current-Account Sustainability 509

18 History of Thought: Selected Bibliographical Notes 565

Notes 577

Selected References 591

Appendix: Computer Routines for Solving Stochastic Dynamic Models 619

Index 627
