*Preface vii*

<b>CHAPTER</b>	<b>1 Preliminaries</b>	<b>1</b>
	1-1 Elementary Set Theory	1
	1-2 Functions	12
	1-3 Linear Functions and Straight Lines	19
	1-4 Quadratic Functions	24
	1-5 Some Additional Types of Functions	30
	1-6 An Introduction to Exponential and Logarithmic Functions	37
	1-7 Inverse Functions and Composition of Functions	44
<b>CHAPTER</b>	<b>2 Limits</b>	<b>49</b>
	2-1 The Limit of a Function and Continuity	49
<b>CHAPTER</b>	<b>3 The Derivative</b>	<b>63</b>
	3-1 Definition of the Derivative	63
	3-2 Finding Derivatives	72
	3-3 Product and Quotient Rules	77
	3-4 Composition and the Chain Rule	82
	3-5 Higher Derivatives	88
<b>CHAPTER</b>	<b>4 Applications of the Derivative</b>	<b>91</b>
	4-1 Maxima and Minima	91
	4-2 The Second Derivative Test	105
	4-3 Implicit Differentiation	115
	4-4 Related Rates	121
	4-5 The Mean Value Theorem	126
	4-6 L'Hôpital's Rule	129
	4-7 Antiderivatives	133
<b>CHAPTER</b>	<b>5 The Integral</b>	<b>140</b>
	5-1 Area and the Definite Integral	140
	5-2 The Fundamental Theorem of Calculus	149
	5-3 Techniques of Integration I: Substitution	161
	5-4 Techniques of Integration II: Integration by Parts	164
	5-5 Techniques of Integration III: Partial Fractions	168
	5-6 Tables of Integrals	175
<b>CHAPTER</b>	<b>6 Applications of the Integral</b>	<b>180</b>
	6-1 Numerical Integration: Trapezoidal Rule	180
	6-2 Numerical Integration: Simpson's Rule	186
	6-3 Infinite Limits and Improper Integrals	189
	6-4 Volume and Work	194
	6-5 Probability	203
	6-6 Applications from Economics	210

<b>CHAPTER</b>	<b>7</b>	<b>Exponential and Logarithmic Functions</b>	<b>217</b>
	7-1	The Definition of the Natural Logarithm Function	217
	7-2	Properties of $y = \ln x$	221
	7-3	Definition of the Number $e$	226
	7-4	The Definition of the Exponential Function $y = \exp x$	229
	7-5	Properties of $y = e^x$	231
	7-6	Other Bases	234
<b>CHAPTER</b>	<b>8</b>	<b>Elementary Differential Equations</b>	<b>237</b>
	8-1	Differential Equations Revisited	237
	8-2	Separation of Variables	241
	8-3	Integrating Factors	247
<b>CHAPTER</b>	<b>9</b>	<b>Functions of Several Variables</b>	<b>253</b>
	9-1	Examples and Graphs	253
	9-2	Definition of a Function of Two Variables	259
	9-3	Limits and Continuity	267
	9-4	Partial Derivatives	271
	9-5	Maxima and Minima	277
	9-6	Lagrange Multipliers	286
	9-7	Double Integrals	296
	9-8	Method of Least Squares	304
<b>CHAPTER</b>	<b>10</b>	<b>Trigonometric Functions</b>	<b>311</b>
	10-1	Angles	311
	10-2	Definition of the Trigonometric Functions	315
	10-3	Graphs of the Trigonometric Functions	323
	10-4	Identities	326
	10-5	Derivatives of the Trigonometric Functions	332
	10-6	Integration of the Trigonometric Functions	339
	10-7	Techniques of Integration IV: Trigonometric Substitution	343
	10-8	Inverse Trigonometric Functions	346
	10-9	Applications	353
<b>APPENDIX</b>	<b>A</b>	<b>Basic Integration Formulas</b>	<b>362</b>
	<b>B</b>	<b>Tables of Natural Logarithms and the Exponential Function</b>	<b>365</b>
	<b>C</b>	<b>Mathematical Induction</b>	<b>373</b>
	<b>D</b>	<b>A Brief Review of Algebra</b>	<b>375</b>
		<b>CHAPTER TESTS</b>	<b>389</b>
		<b>SOLUTIONS TO SELECTED EXERCISES</b>	<b>395</b>
		<b>SELECTED BIBLIOGRAPHY</b>	<b>421</b>
		<b>INDEX</b>	<b>423</b>
