

# Contents

<b>I. Examples and basic definitions</b>	1
§1. Incidence structures and incidence matrices	1
§2. Block designs and examples from affine and projective geometry	6
§3. $t$ -designs, Steiner systems and configurations	15
§4. Isomorphisms, duality and correlations	20
§5. Partitions of the block set and resolvability	24
§6. Divisible incidence structures	32
§7. Transversal designs and nets	37
§8. Subspaces	44
§9. Hadamard designs	50
<b>II. Combinatorial analysis of designs</b>	62
§1. Basics	62
§2. Fisher's inequality for pairwise balanced designs	64
§3. Symmetric designs	77
§4. The Bruck–Ryser–Chowla theorem	89
§5. Balanced incidence structures with balanced duals	96
§6. Generalisations of Fisher's inequality and intersection numbers	101
§7. Extensions of designs	111
§8. Affine designs	123
§9. Strongly regular graphs	136
§10. The Hall–Connor theorem	146
§11. Designs and codes	152

<b>III. Groups and designs</b> . . . . .	162
§1. Introduction . . . . .	162
§2. Incidence morphisms . . . . .	163
§3. Permutation groups . . . . .	167
§4. Applications to incidence structures . . . . .	173
§5. Examples from classical geometry . . . . .	184
§6. Constructions of $t$ -designs from groups . . . . .	190
§7. Extensions of groups . . . . .	198
§8. Construction of $t$ -designs from base blocks . . . . .	206
§9. Cyclic $t$ -designs . . . . .	218
§10. Cayley graphs . . . . .	225
<b>IV. Witt designs and Mathieu groups</b> . . . . .	234
§1. The existence of the Witt designs . . . . .	234
§2. The uniqueness of the small Witt designs . . . . .	237
§3. The little Mathieu groups . . . . .	243
§4. Properties of the large Witt design $S(5, 8; 24)$ . . . . .	244
§5. Some simple groups . . . . .	252
§6. Witt's construction of the Mathieu groups and Witt designs . . . . .	259
§7. Hussain structures and the uniqueness of $S_2(3, 6; 12)$ . . . . .	262
§8. The Higman–Sims group . . . . .	270
<b>V. Highly transitive groups</b> . . . . .	277
§1. Sharply $t$ -transitive groups . . . . .	277
§2. $t$ -homogeneous groups . . . . .	283
§3. Concluding remarks: $t$ -transitive groups . . . . .	291
<b>VI. Difference sets and regular symmetric designs</b> . . . . .	297
§1. Basic facts . . . . .	298
§2. Multipliers . . . . .	303
§3. Group rings and characters . . . . .	311
§4. Multiplier theorems . . . . .	319
§5. Difference lists . . . . .	330
§6. The Mann test and Wilbrink's theorem . . . . .	335
§7. Planar difference sets . . . . .	344
§8. Paley–Hadamard difference sets and cyclotomy . . . . .	353
§9. Some difference sets with $\gcd(v, n) > 1$ . . . . .	363
§10. Relative difference sets and building sets . . . . .	369

§11. Extended building sets and difference sets . . . . .	382
§12. Constructions for Hadamard and Chen difference sets . . . . .	388
§13. Some applications of algebraic number theory . . . . .	410
§14. Further non-existence results . . . . .	419
§15. Characters and cyclotomic fields . . . . .	435
§16. Schmidt's exponent bound . . . . .	441
§17. Difference sets with Singer parameters . . . . .	455
<b>VII. Difference families . . . . .</b>	<b>468</b>
§1. Basic facts . . . . .	468
§2. Multipliers . . . . .	472
§3. More examples . . . . .	476
§4. Triple systems . . . . .	481
§5. Some difference families in Galois fields . . . . .	488
§6. Blocks with evenly distributed differences . . . . .	499
§7. Some more special block designs . . . . .	502
§8. Proof of Wilson's theorem . . . . .	509
<b>VIII. Further direct constructions . . . . .</b>	<b>520</b>
§1. Pure and mixed differences . . . . .	520
§2. Applications to the construction of resolvable block designs . . . . .	528
§3. A difference construction for transversal designs . . . . .	531
§4. Further constructions for transversal designs . . . . .	544
§5. Some constructions using projective planes . . . . .	564
§6. $t$ -designs constructed from graphs . . . . .	584
§7. The existence of $t$ -designs for large values of $\lambda$ . . . . .	588
§8. Higher resolvability of $t$ -designs . . . . .	595
§9. Infinite $t$ -designs . . . . .	598
§10. Cyclic Steiner quadruple systems . . . . .	600
Notation and symbols . . . . .	1005
Bibliography . . . . .	1013
Index . . . . .	1093
