

## *Contents*

<i>Preface</i> . . . . .	v
<b>Chapter I. Aromaticity and aromatic character</b> . . . . .	1
Introduction . . . . .	1
The development of the concept of aromaticity . . . . .	1
Molecular orbital theory and aromaticity . . . . .	6
A note on the representation of non-benzenoid aromatic compounds . . . . .	10
Coda – aromaticity, aromatic compounds and aromatic character. . . . .	11
References . . . . .	14
<b>Chapter II. Derivatives of cyclopropene</b> . . . . .	16
Introduction . . . . .	16
Preparation of cyclopropenium salts . . . . .	18
Properties of cyclopropenium salts . . . . .	20
(a) Solubility . . . . .	20
(b) Spectra . . . . .	20
(c) pK Values and stability . . . . .	21
(d) Action of nucleophiles . . . . .	22
(e) Reduction . . . . .	23
(f) Reaction with azides and diazo-compounds . . . . .	23
(g) Formation of metal complexes . . . . .	24
Preparation of cyclopropenone derivatives. . . . .	24
Properties of cyclopropenones . . . . .	26
(a) Dipole moments . . . . .	26
(b) Spectra . . . . .	26
(c) Action of acid . . . . .	26
(d) Action of alkali . . . . .	27
(e) Thermal decomposition . . . . .	27
(f) Reduction of cyclopropenones . . . . .	28
(g) Other reactions of cyclopropenones . . . . .	28
Quinocyclopropenes . . . . .	29
Methylene cyclopropenes . . . . .	31
Calicenes . . . . .	33
References . . . . .	33
<b>Chapter III. Derivatives of cyclobutadiene</b> . . . . .	35
Introduction . . . . .	35
Metal complexes of cyclobutadiene . . . . .	38
Cyclobutenium salts . . . . .	40
Cyclobutene-3,4-diones . . . . .	41
Benzocyclobutadiene . . . . .	42
Biphenylene . . . . .	45
Preparation of biphenylene . . . . .	45
Structure of biphenylene . . . . .	46
Ultra-violet spectra of biphenylenes . . . . .	47
Properties of biphenylene . . . . .	47

Benzobiphenylenes . . . . .	50
Comparison of benzocyclobutadienes and biphenylenes . . . . .	51
References . . . . .	51
Chapter IV. <i>Derivatives of cyclopentadiene</i> . . . . .	55
Introduction . . . . .	55
Cyclopentadienide salts . . . . .	57
Preparation . . . . .	57
Properties of cyclopentadienide salts . . . . .	57
Chemical reactions of cyclopentadienide salts . . . . .	58
Substituted cyclopentadienide salts . . . . .	59
Salts derived from indene, fluorene, etc. . . . .	60
Diazocyclopentadienes . . . . .	61
Preparation . . . . .	61
Spectra of diazocyclopentadienes . . . . .	62
Chemical reactions of diazocyclopentadiene . . . . .	63
Other cyclopentadienylides . . . . .	66
Preparation . . . . .	66
Physical properties . . . . .	66
Spectra . . . . .	67
Stability . . . . .	68
Chemical reactions . . . . .	68
Indenylides and fluorenylides . . . . .	69
Indenylides . . . . .	69
9-Diazofluorene . . . . .	69
Other fluorenylides . . . . .	72
Cyclopentadienylidene derivatives . . . . .	75
Preparation . . . . .	75
Properties of cyclopentadienylidenedihydropyridines . . . . .	78
Properties of cyclopentadienylidene pyrans . . . . .	78
Other cyclopentadienylidene derivatives . . . . .	79
Indenylidene and fluorenylidene derivatives . . . . .	79
Sesquifulvalenes . . . . .	80
Fulvenes . . . . .	81
Preparation . . . . .	81
Structure of fulvenes . . . . .	81
Spectra of fulvenes . . . . .	82
Chemical reactions . . . . .	83
Fulvenes with nitrogen or oxygen atoms attached to the 6-carbon atom . . . . .	84
Ferrocene . . . . .	86
Preparation . . . . .	87
Structure . . . . .	88
Stereochemistry of ferrocene derivatives . . . . .	88
Chemical properties of ferrocene . . . . .	89
Electrophilic substitution reactions . . . . .	90
Analogues of ferrocene . . . . .	91
References . . . . .	92
Chapter V. <i>Tropylium salts</i> . . . . .	98
Introduction . . . . .	98
Preparation of tropylium salts . . . . .	98
(a) From cycloheptatriene . . . . .	98

(b) From cycloheptatrienecarboxylic acid . . . . .	99
(c) From benzene and halocarbenes . . . . .	100
(d) From cyclooctatetraene . . . . .	101
(e) From tropyl (cycloheptatrienyl) compounds . . . . .	101
(f) Other methods of formation . . . . .	102
Structure of the tropylum ion . . . . .	103
Spectra . . . . .	104
Properties of tropylum salts . . . . .	104
Chemical reactions of tropylum salts . . . . .	105
(a) Reduction . . . . .	105
(b) Oxidation . . . . .	106
(c) Reaction with nucleophilic reagents . . . . .	107
(d) Attempted electrophilic substitution of the tropylum ion . . . . .	112
(e) Reactions of the alkyl groups in alkyltropylum salts . . . . .	112
Metal complexes . . . . .	113
Benzotropylum salts . . . . .	113
References . . . . .	114
 Chapter VI. <i>Tropones, tropolones and related compounds</i> . . . . .	117
Introduction . . . . .	117
Preparation of tropones . . . . .	122
(a) From benzene derivatives . . . . .	122
(b) From cycloheptanone and cycloheptenone . . . . .	124
(c) From tropinone derivatives . . . . .	125
(d) From cycloheptatriene . . . . .	126
(e) From tropylum salts . . . . .	126
Preparation of tropolones . . . . .	126
(a) From cycloheptanone and its derivatives . . . . .	127
(b) From benzene and other benzenoid compounds . . . . .	127
(c) From tropone . . . . .	128
(d) From cyclopentadiene . . . . .	129
Structure of tropone and tropolone . . . . .	129
Spectra . . . . .	131
(a) Tropones . . . . .	131
(b) Tropolones . . . . .	132
Properties of tropones . . . . .	133
(a) Reactions of the carbonyl group . . . . .	133
(b) Addition reactions . . . . .	134
(c) Substitution reactions . . . . .	135
(d) Replacement reactions of substituent groups . . . . .	136
(e) Rearrangement reactions . . . . .	138
Properties of tropolones . . . . .	139
(a) Oxidation . . . . .	139
(b) Reduction . . . . .	140
(c) Reactions of the carbonyl group . . . . .	141
(d) Reactions of the hydroxyl group . . . . .	141
(e) Addition reactions . . . . .	142
(f) Electrophilic substitution reactions . . . . .	143
(i) Halogenation . . . . .	143
(ii) Nitration . . . . .	143
(iii) Sulphonation . . . . .	144

(iv) Azo-coupling . . . . .	144
(v) Alkylation and acylation . . . . .	144
(vi) Nitrosation . . . . .	144
(vii) Reimer-Tiemann reaction . . . . .	144
(viii) Hydroxymethylation and aminomethylation. . . . .	144
(g) Replacement reactions of substituent groups . . . . .	145
(h) Rearrangement reactions . . . . .	146
<b>3- and 4-Hydroxytropones</b> . . . . .	147
Thiotropolones, aminothiotropones and aminoiminocycloheptatrienes . . . . .	150
<b>Benzotropones and benzotropolones</b> . . . . .	151
Preparation . . . . .	151
Properties of benzotropones . . . . .	151
Properties of benzotropolones . . . . .	152
<b>Heptafulvenes</b> . . . . .	153
References . . . . .	155
<b>Chapter VII. Medium and large ring compounds</b> . . . . .	162
Cyclooctatetraenides . . . . .	162
Cyclononatetraenides . . . . .	163
Annulenes . . . . .	165
Preparation of annulenes . . . . .	167
N.M.R. spectra and aromaticity of annulenes . . . . .	170
U.V. spectra . . . . .	172
X-ray crystallographic analysis . . . . .	172
Chemical properties . . . . .	173
Dehydroannulenes . . . . .	174
Bridged ring annulenes . . . . .	176
References . . . . .	179
<b>Chapter VIII. Polycyclic compounds</b> . . . . .	181
Introduction . . . . .	181
Azulenes . . . . .	182
Syntheses of azulenes . . . . .	183
Syntheses not involving dehydrogenation . . . . .	187
Structure of azulene . . . . .	190
Reactions of azulenes . . . . .	194
(a) Addition reactions; reduction and oxidation . . . . .	194
(b) Substitution reactions . . . . .	195
(i) Electrophilic substitution . . . . .	195
(ii) Nucleophilic substitution . . . . .	198
(iii) Radical substitution . . . . .	200
(c) Rearrangement reactions . . . . .	201
Spectra of azulenes . . . . .	201
Sesquifulvalenes . . . . .	203
Calicenes . . . . .	204
Pentalenes . . . . .	205
Heptalenes . . . . .	208
General comments on polycyclic non-benzenoid aromatic hydrocarbons . . . . .	209
References . . . . .	212
<b>Subject Index</b> . . . . .	217
