A. Introduction

V.I. MATKOVICH	1
----------------------	---

B. Considerations of Theoretical Interest

I. The Electronic Structure of Boron Compounds G.V. SAMSONOV and B.A. KOVENS KAYA	5
II. The Nature of the Chemical Bond in Borides G.V. SAMSONOV and B.A. KOVENS KAYA	19
III. The Electronic Structures of the Hexaborides and the Diborides P.G. PERKINS (With 15 Figures)	31
IV. Boron and Aluminum Dodecaboride as the Specific Type of Hopping Conduction Materials A.A. BEREZIN, O.A. GOLIKOVA, V.R. ZAITSEV, M.M. KAZANIN, V.M. ORLOV, and E.N. TKALENKO (With 8 Figures)	52
V. Electron Paramagnetic Resonance (EPR) in Boron Nitride, Boron and Boron Carbide D. GEIST (With 6 Figures)	65
VI. Structural Determinants in the Higher Borides V.I. MATKOVICH and J. ECONOMY (With 11 Figures)	78
VII. Crystal Chemistry of Higher Borides V.I. MATKOVICH and J. ECONOMY (With 8 Figures)	96
VIII. Tetragonal Boron-I and Its Derivatives H.J. BECHER and R. MATTES (With 1 Figure)	107
IX. Compounds Based on Octahedral B ₆ Units: Hexaborides and Tetra- borides J. ETOURNEAU, J.-P. MERCURIO, and P. HAGENMULLER (With 16 Figures)	115
X. Crystal Chemistry of Boron and of Some Boron-Rich Phases; Prepa- ration of Boron Modifications R. NASLAIN (With 28 Figures)	139

C. Preparations and Properties

I. Chemical Properties of Boron J. CUEILLERON and F. THEVENOT	203
--	-----

II.	Methods of Preparation of Amorphous Boron A.F. ZHIGACH and D.C. STASINEVICH	214
III.	Methods of Preparation of α -Rhombohedral Boron JA.A. UGAI and N.E. SOLOVIEV (With 7 Figures)	227
IV.	Characterization of Localized States in β -Rhombohedral Boron M. PRUDENZIATI (With 8 Figures)	241
V.	Alkali Metal Borides R. NASLAIN, J. ETOURNEAU, and P. HAGENMULLER (With 19 Figures)	262
VI.	Ib and IIb Subgroup Borides V.N. GURIN and M.M. KORSUKOVA (With 4 Figures)	293
VII.	Borides of the IVb Group G.N. MAKARENKO (With 10 Figures)	310
VIII.	Borides of Group VIb Elements G.L. GAL'CHENKO, E.G. LAVUT, E.A. LAVUT, and L.M. VIDAVSKY.	331
IX.	Transition Metal Borides T. LUNDSTRÖM (With 7 Figures)	351
X.	Single-Crystal Refractory Borides of Transition Metals V.N. GURIN and V.S. SINELNIKOVA (With 1 Figure)	377
XI.	Properties and Uses of Diborides J. CASTAING and P. COSTA (With 5 Figures)	390
XII.	Ternary Metal Borides H. NOWOTNY and P. ROGL (With 6 Figures)	413
XIII.	Rare Earth-Boron Phase Equilibria K.E. SPEAR (With 18 Figures)	439
XIV.	Metallic Borides: Preparation of Solid Bodies-Sintering Methods and Properties of Solid Bodies H. PASTOR	457
XV.	Magnetic Properties of Borides K.H.J. BUSCHOW (With 11 Figures)	494

D. Special Applications

I.	Chemical Vapor Deposition of Boron Filament V. KRUKONIS (With 26 Figures)	517
II.	Boron Carbide Fibers from Carbon Fibers W.D. SMITH (With 7 Figures)	541
III.	Boron Nitride Fibers J. ECONOMY and R. LIN (With 9 Figures)	552
IV.	Reinforcing Properties of AlB_2 Flakes L.C. WOHRER and A.A. WOSILAIT (With 12 Figures)	565

V.	Amorphous Boron Films	
	K. MOORJANI and C. FELDMAN (With 6 Figures)	581
VI.	Boride Coatings	
	A.P. EPIK (With 2 Figures)	597
VII.	Nuclear Applications of Boron and the Borides	
	D.E. MAHAGIN and R.E. DAHL (With 9 Figures)	613
VIII.	Use of Boron Compounds in Lightweight Armor	
	M.L. WILKINS (With 11 Figures)	633
	<u>Subject Index</u>	649
