

# Contents

Preface . . . . .	VII
Introduction . . . . .	1
1.1 Pre-separation techniques . . . . .	2
1.2 Post-separation techniques . . . . .	3
Background . . . . .	5
2.1 Chromatographic principles . . . . .	6
2.1.1 Adsorption . . . . .	6
2.1.2 Liquid-liquid partition . . . . .	8
2.1.3 Ion exchange . . . . .	11
2.1.4 Gel permeation . . . . .	15
2.1.5 Electrophoresis . . . . .	15
2.1.6 Affinity chromatography . . . . .	16
2.2 Spectrometry . . . . .	17
2.2.1 Absorption . . . . .	17
2.2.2 Fluorescence . . . . .	19
2.2.3 Radioactivity . . . . .	25
2.3 Direct measurement from solid surfaces . . . . .	29
2.3.1 Densitometry (transmittance) . . . . .	29
2.3.2 Diffuse reflectance . . . . .	30
2.3.3 Fluorimetry . . . . .	32
2.3.4 Radioactivity . . . . .	34
2.3.5 Error analysis . . . . .	35
2.4 Further reading . . . . .	38
2.4.1 Chromatographic principles . . . . .	38
2.4.2 Spectrometry . . . . .	38
2.4.3 Direct measurement from solid surfaces . . . . .	39
Instrumentation . . . . .	41
3.1 TLC equipment . . . . .	41
3.1.1 General . . . . .	41
3.1.2 Thin-layer plates . . . . .	42
3.1.3 Spotting devices . . . . .	45
3.1.4 Chromatography apparatus . . . . .	45
3.1.5 Detectors and chromatogram scanners . . . . .	48
3.1.6 Automated TLC . . . . .	60
3.2 HPLC equipment . . . . .	63
3.2.1 Chromatographs and accessories . . . . .	63
3.2.2 Detectors (commercial) . . . . .	87
3.2.3 Detectors (experimental) . . . . .	102
3.3 Further reading . . . . .	107
3.3.1 TLC: apparatus and techniques . . . . .	107
3.3.2 HPLC . . . . .	107

Applications . . . . .	111
4.1 UV–visible derivatization . . . . .	113
4.1.1 Biological analysis . . . . .	113
4.1.2 Pharmaceutical analysis . . . . .	133
4.1.3 Pesticides, pollutants and related compounds . . . . .	138
4.1.4 Metal chelates . . . . .	143
4.1.5 Miscellaneous . . . . .	146
4.2 Fluorimetric derivatization . . . . .	153
4.2.1 Biological analysis . . . . .	153
4.2.2 Drugs and pharmaceuticals . . . . .	173
4.2.3 Miscellaneous . . . . .	183
4.2.4 Pesticides and related compounds . . . . .	186
4.2.5 Metals . . . . .	200
4.3 Radiochemical derivatization . . . . .	203
4.3.1 Amino acids . . . . .	203
4.3.2 Thiol groups . . . . .	203
4.3.3 Acetylation with $^{14}\text{C}$ acetic anhydride . . . . .	204
4.4 Derivatization and mass spectrometry . . . . .	204
Subject index . . . . .	211
