

## CONTENTS

PREFACE TO THE SERIES . . . . .	iii
PREFACE TO VOLUME 8 . . . . .	v
CONTRIBUTORS . . . . .	xi
CONTENTS OF OTHER VOLUMES . . . . .	xiii

### Chapter 1

X-RAY STRUCTURAL STUDIES OF METAL-NUCLEOSIDE AND METAL-NUCLEOTIDE COMPLEXES . . . . .	1
------------------------------------------------------------------------------------------	---

Robert W. Gellert and Robert Bau

1. Introduction . . . . .	2
2. Metal Complexes of Nucleosides . . . . .	4
3. Metal Complexes of Nucleotides . . . . .	12
4. Dinucleotides and Transfer RNA . . . . .	29
5. Summary and Conclusions . . . . .	37
Abbreviations . . . . .	48
References . . . . .	49

### Chapter 2

INTERACTIONS BETWEEN METAL IONS AND NUCLEIC BASES, NUCLEOSIDES, AND NUCLEOTIDES IN SOLUTION . . . . .	57
----------------------------------------------------------------------------------------------------------	----

R. Bruce Martin and Yitbarek H. Mariam

1. Introduction . . . . .	58
2. Proton Binding Sites of Nucleic Bases . . . . .	62
3. Factors that Influence Metal Ion Binding Sites . . . . .	64
4. Primary Amino (-NH <sub>2</sub> ) Groups Are Not Binding Sites . . . . .	75

5. Metal Ion Binding to Nucleic Bases, 1-Alkylpyrimidines, 9-Alkylpurines, and Nucleosides . . . . .	76
6. Ring Carbons as Binding Sites . . . . .	85
7. Appraisal of NMR Relaxation Methods as a Probe of Binding Sites . . . . .	86
8. Ribose Metal Ion Binding . . . . .	91
9. Anti Conformation Is Favored by the Glycosyl Bond . . . . .	93
10. Metal Ion Binding to Nucleotides . . . . .	95
Addendum . . . . .	113
References . . . . .	114

### Chapter 3

THE AMBIVALENT PROPERTIES OF SOME BASE-MODIFIED NUCLEOTIDES . .	125
-----------------------------------------------------------------	-----

Helmut Sigel

1. Introduction . . . . .	126
2. Adenosine N(1)-Oxide Nucleotides . . . . .	128
3. Inosine N(1)-Oxide Nucleotides . . . . .	139
4. Potential Ambivalent Properties of a Nucleotide and the Formation of Mixed-Ligand Complexes . . . . .	146
5. Other Base-Modified Nucleotides with Possible Ambivalent Properties . . . . .	149
6. Conclusions . . . . .	151
Abbreviations and Definitions . . . . .	152
References . . . . .	154

### Chapter 4

HEAVY METAL LABELING OF NUCLEOTIDES AND POLYNUCLEOTIDES FOR ELECTRON MICROSCOPY STUDIES . . . . .	159
---------------------------------------------------------------------------------------------------	-----

Thomas R. Jack

1. Introduction . . . . .	160
2. The Electron Microscope . . . . .	161
3. Chemistry . . . . .	166

4. Sequencing by Electron Microscopy . . . . .	176
5. Conclusion . . . . .	178
References . . . . .	180

## Chapter 5

MACROMOLECULES OF BIOLOGICAL INTEREST IN COMPLEX FORMATION . . . . .	183
-------------------------------------------------------------------------	-----

S. L. Davydova

1. Introduction . . . . .	184
2. Complex Formation with Macromolecules of Nucleic Acids and Polypeptides . . . . .	185
3. Specificity of Macromolecule-Metal Ion Interactions . . . . .	198
4. Conclusion . . . . .	202
References . . . . .	203

AUTHOR INDEX . . . . .	207
------------------------	-----

SUBJECT INDEX . . . . .	221
-------------------------	-----
