Editor's Statement	xiii
Section Editor's Foreword	xv
Preface	xvii
Chapter 1 Words, by Dominique Perrin	1
1.0 Introduction	1
1.1 Free Monoids and Words	1
1.2 Submonoids and Morphisms	4
1.3 Conjugacy	7
1.4 Formal Series	11
Notes	13
Problems	13
Chapter 2 Square-Free Words and Idempotent Semigroups, by Jean Berstel and Christophe Reutenauer	18
2.0 Introduction	18
2.1 Preliminaries	19
2.2 The Infinite Word of Thue–Morse	23
2.3 Infinite Square-Free Words	26
2.4 Idempotent Semigroups	31
Notes	35
Problems	37
Chapter 3 Van der Waerden's Theorem, by Jean Eric Pin	39
3.0 Introduction	39
3.1 Classical Formulations	39
3.2 A Combinatorial Proof of van der Waerden's Theorem	41
3.3 Application to the Free Monoid	44
3.4 A Topological Proof of van der Waerden's Theorem	45
3.5 Further Results and Problems	48
Notes	52
Problems	53

Chapter 4	Repetitive Mappings and Morphisms, by Giuseppe Pirillo	55
4.0	Introduction	55
4.1	Repetitive Mappings	55
4.2	Repetitive Morphisms	58
4.3	Repetitive Semigroups	60
	Problems	61
Chapter 5	Factorizations of Free Monoids, by Dominique Perrin	63
5.0	Introduction	63
5.1	Lyndon Words	64
5.2	Bisections of Free Monoids	68
5.3	Free Lie Algebras	76
5.4	The Theorem of Factorizations	92
	Notes	98
	Problems	99
Chapter 6	Subwords, by Jacques Sakarovitch and Imre Simon	105
6.0	Introduction	105
6.1	The Division Ordering	106
6.2	Comparing the Subwords	109
6.3	Counting the Subwords	121
	Problems	134
Chapter 7	Unavoidable Regularities in Words and Algebras with Polynomial Identities, by Christophe Reutenauer	145
7.0	Introduction	145
7.1	Some Combinatorial Results	145
7.2	Algebras with Polynomial Identities	149
7.3	Consequences	151
	Notes	152
	Problems	153
Chapter 8	The Critical Factorization Theorem, by Marcel Paul Schützenberger	155
8.1	Preliminaries	155
8.2	The Critical Factorization Theorem	156
8.3	An Application	161
	Notes	163
Chapter 9	Equations in Words, by Christian Choffrut	164
9.0	Introduction	164
9.1	Preliminaries	165

9.2	A Classical Equation: $(x^n y^m, z^p)$	166
9.3	Equations in Three Unknowns	170
9.4	Rank of an Equation	171
9.5	Fundamental Solutions	173
9.6	The Graph Associated with an Equation	177
9.7	Quadratic Equations	179
9.8	Related Theories	180
9.9	Problems	182
Chapter 10	Rearrangements of Words, by Dominique Foata	186
10.1	Preliminaries	186
10.2	The First Fundamental Transformation	187
10.3	The Flow Monoid	191
10.4	The Circuit Monoid	195
10.5	The First Fundamental Transformation for Arbitrary Words	199
10.6	The Second Fundamental Transformation	202
10.7	The Sparre-Andersen Equivalence Principle	205
	Notes	209
	Problems	210
Chapter 11	Words and Trees, by Robert Cori	215
11.0	Introduction	215
11.1	Trees and Plane Trees	216
11.2	Trees and Parenthesis Systems	218
11.3	Lukaciewicz Language	221
11.4	Lagrange Formula	223
	Problems	227
	Bibliography	230
	Index	237
