

C O N T E N T S

Editor's Introduction 5

1. Introduction 7

2. Elementary Regression Theory and Social Science Practice 12
An Example 17

3. Statistical Properties of Regression Estimates 30
Consistency of Regression Coefficients 35

4. Sampling Distributions of Regression Coefficients 37
Interpretation of Confidence Intervals 41
Comparing Substantive and Statistical Significance 46

5. Choosing a Specification 51
Functional Forms 56
Variable Selection and R^2 58
Other Measures of Goodness of Fit 61

6. The Importance of a Variable 68
Theoretical Importance 68
Level Importance 71
Dispersion Importance 73

7. Conclusion 77

Appendix: Proof of the Consistency Result for Regression 80

Notes 82
