PREFACE	5
ABBREVIATIONS	9
INTRODUCTION	11
I. PHONEMIC OPPOSITIONS BASED ON TONE FEATURES	17
A. The dynamics of timbre oppositions in the OE vowel system	17
1. The appearance of the opposition of timbre gliding in the subsystem of tense (long) vowel phonemes	17
2. The extension of the opposition of timbre gliding to the subsystem of lax (short) vowel phonemes by breaking	18
3. Palatalization and velar umlaut as additional sources of phonemes with timbre gliding	22
4. Palatal umlaut as a stage in the extension of the opposition of timbre gliding	23
5. The general rearrangement of timbre oppositions in Late OE	28
6. Summary	33
B. The rearrangement of the localization opposition in the OE consonant system	34
1. The split in the back consonants and its links with the rearrangements in timbre oppositions	34
II. PHONEMIC OPPOSITIONS BASED ON SONORITY AND PROTENSITY FEATURES ..	38
A. The oppositions of tenseness (length) in OE vowels and consonants ...	38
1. The phonological interpretation of protensity features	38
2. The establishment of tenseness oppositions in OE vowels and conso- nants and the distributional properties of tense phonemes	40
3. Vowel lengthening before certain consonant clusters as the final stage in the extension of tenseness oppositions in OE	44

B.	The rearrangement in the system of phonemic oppositions in Early ME	47
1.	The replacement of the consonantal oppositions of tenseness and voice by the opposition of fused tenseness	47
2.	The replacement of the opposition of vocalic tenseness by the new opposition of abruptness	53
C.	The evolution of the opposition of vocalic abruptness in ME and MnE	56
1.	The rearrangement in the ME system of vowel phonemes and in their distribution	56
2.	Vocalization of certain consonants and the emergence of non-abrupt gliding phonemes	61
3.	The Great Vowel Shift	63
4.	The formation of the MnE vowel system	66
D.	Summary	72
III.	ON FUNCTIONAL FACTORS IN THE DYNAMICS OF THE ENGLISH PHONOLOGICAL SYSTEM	74
A.	The construction of English phonetic words	74
1.	The primaries	74
a.	Onsets	75
b.	Peaks	77
c.	Codas	77
2.	Relations between primaries	79
3.	The constructional potential and its realization	80
B.	Quantitative relations between the lexical and phonic tiers in the macro-system of language	81
1.	On the relationship between the constructional potential and its realization	81
2.	A mathematical model for the realization of the constructional potential	84
C.	The functional determination of the numerical composition of the phonological system as a factor in its dynamics	87
