Part I Stan Ulam—The Man, His Life, His Style

Esquisse by <i>Françoise Ulam</i>	6
Vita — <i>Excerpts from Adventures of a Mathematician</i> by <i>S. M. Ulam</i>	8
The Lost Café by <i>Gian-Carlo Rota</i>	23
From Above the Fray by <i>Carson Mark</i>	33

Part II The Ulam Legacy—Interdisciplinary Approaches

MATHEMATICS	36
The Spirit of Play—A Memoir for Stan Ulam by <i>David Hawkins</i>	39
Probability and Nonlinear Systems by <i>R. Daniel Mauldin</i>	52
Part I: Introduction <i>Excerpts from The Scottish Book</i>	
Part II: A Tutorial on Probability, Measure, and the Laws of Large Numbers Cantor's Middle-Third Set	
Part III: Probabilistic Approaches to Nonlinear Problems	
Problem 1. Energy Redistribution: An Exact Solution to a Nonlinear, Many-Particle System	
Problem 2. Geometry, Invariant Measures, and Dynamical Systems	
Poincaré's Proof of the Recurrence Theorem	
Problem 3. Random Homeomorphisms	
Iteration of Maps, Strange Attractors, and Number Theory—An Ulamian Potpourri by <i>Paul R. Stein</i>	91
Learning from Ulam: Measurable Cardinals, Ergodicity, and Biomathematics by <i>Jan Mycielski</i>	107
The Existence and Significance of Ergodic Transformations— <i>Excerpts from the Introduction to Oxtoby and Ulam's "Measure-Preserving Homeomorphisms and Metrical Transitivity"</i>	
A Similarity Measure for Graphs—Reflections on a Theme of Ulam by <i>Ronald L. Graham</i>	114
PHYSICS	122
The Beginning of the Monte Carlo Method by <i>N. Metropolis</i>	125
Stan Ulam, John von Neumann, and the Monte Carlo Method by <i>Roger Eckhardt</i>	131
Random-Number Generators by <i>Tony Warnock</i>	
Monte Carlo at Work by <i>Gary D. Doolen and John Hendricks</i>	
Early Work in Numerical Hydrodynamics by <i>Francis H. Harlow</i>	144

217 362

STANISLAW ULAM 1909 – 1984

Instabilities and Turbulence by <i>Didier Besnard, Francis H. Harlow, Norman L. Johnson, Rick Rauenzahn, and Jonathan Wolfe</i>	145
Reynolds Number	
Reynolds Number Revisited	
Discrete Fluids by <i>Brosi Hasslacher</i>	175
Part I: Background	
The Continuum Argument	
The Hilbert Contraction	
Part II: The Simple Hexagonal Model: Theory and Simulations	
Calculations Using Lattice Gas Techniques	
by <i>Tsutomu Shimomura, Gary Doolen, Brosi Hasslacher, and Castor Fu</i>	
Part III: The Promise of Lattice Gas Methods	
Reynolds Number and Lattice Gas Calculations	
Nonlinear Science—From Paradigms to Practicalities by <i>David K. Campbell</i>	218
The Simple but Nonlinear Pendulum	
Solitons in the Sine-Gordon Equation	
Hamiltonian Chaos and Statistical Mechanics	
The Ergodic Hypothesis: A Complicated Problem of Mathematics and Physics by <i>Adrian Patrascioiu</i>	263
The FPU Problem: <i>Excerpts from “Studies of Nonlinear Problems” by Fermi, Pasta, and Ulam</i>	
Does Equipartition of Energy Occur in Nonlinear Continuous Systems?	
BIOLOGY	280
Reflections on the Brain’s Attempts To Understand Itself by <i>S. M. Ulam</i>	283
An Ulam Distance by <i>William A. Beyer</i>	
Sequence Analysis—Contributions by Ulam to Molecular Genetics by <i>Walter B. Goad</i>	288
Part III The Ulam Touch—Unpublished Items	
A Memorable Memo by <i>J. Carson Mark and S. M. Ulam</i>	294
Sub Rosa—A Trialogue by <i>S. M. Ulam</i>	295
Conversations with Rota transcribed and edited by <i>Françoise Ulam</i>	300
The Publications of Stanislaw M. Ulam	313

The staff of Los Alamos Science is deeply indebted to Françoise Ulam for her help on this issue. She generously opened Stan’s files to us and gave advice and moral support whenever she was called upon. Her unfailing kindness and patience added a special element to the privilege and challenge of working on this volume.
