

TABLE OF CONTENTS

PREFACE	xiii
INTRODUCTION: SOME QUESTIONS FOR PHILOSOPHY OF TECHNOLOGY (Paul T. Durbin)	1
PART I / CAN TECHNOLOGICAL DEVELOPMENT BE REGULATED?	
EDMUND BYRNE / Can Government Regulate Technology?	17
ROBERT S. COHEN / Social Implications of Recent Technological Innovations	35
ALOIS HUNING / Technology and Human Rights	49
ALEX MICHALOS / Technology Assessment, Facts and Values	59
GÜNTER ROPOHL / A Critique of Technological Determinism	83
LANGDON WINNER / <i>Technē</i> and <i>Politeia</i> : The Technical Constitution of Society	97
PART II / TECHNOLOGY ASSESSMENT	
STANLEY R. CARPENTER / Technoaxiology: Appropriate Norms for Technology Assessment	115
HANS SACHSSE / What Is Alternative Technology?	137
FRIEDRICH RAPP / The Prospects for Technology Assessment	141
KRISTIN SHRADER-FRECHETTE / Technology Assessment and the Problem of Quantification	151
WALTHER CH. ZIMMERLI / Forecast, Value, and the Recent Phenomenon of Non-Acceptance: The Limits of a Philosophy of Technology Assessment	165

PART III / RESPONSIBILITIES TOWARD NATURE	
BERNARD GENDRON / The Viability of Environmental Ethics	187
HANS LENK / Notes on Extended Responsibility and Increased Technological Power	195
KLAUS MICHAEL MEYER-ABICH / What Sort of Technology Permits the Language of Nature? Conditions for Controlling Nature-Domination Constitutionally	211
PART IV / METAPHYSICAL AND HISTORICAL ISSUES	
DON IHDE / The Historical-Ontological Priority of Technology over Science	235
REINHART MAURER / The Origins of Modern Technology in Millenarianism	253
CARL MITCHAM / The Religious and Political Origins of Modern Technology	267
WOLFGANG SCHIRMACHER / From the Phenomenon to the Event of Technology: A Dialectical Approach to Heidegger's Phenomenology	275
JOSEPH MARGOLIS / Pragmatism, Transcendental Arguments, and the Technological	291
PART V / DIRECTIONS FOR PHILOSOPHY OF TECHNOLOGY	
ALWIN DIEMER / The Cultural Character of Technology	313
HANS HEINZ HOLZ / The Import of Social, Political, and Anthropological Considerations in an Adequate Philosophy of Technology	319
ELISABETH STRÖKER / Philosophy of Technology: Problems of a Philosophical Discipline	323
NAME INDEX	337

ANALYTICAL TABLE OF CONTENTS

(*Note: Where an author has not provided subheadings, these have been provided by the English-language editor and are enclosed in square brackets.*)

INTRODUCTION: SOME QUESTIONS FOR PHILOSOPHY OF TECHNOLOGY (Paul T. Durbin)	1
[i.] Philosophy of Science	3
[ii.] General Philosophy	6
[iii.] Some Lessons for Philosophy of Technology	9

PART I / CAN TECHNOLOGICAL DEVELOPMENT BE REGULATED?

CAN GOVERNMENT REGULATE TECHNOLOGY? (Edmund Byrne)	17
[i. Ineffective Regulative Legislation]	18
[ii. Defects in Regulatory System]	21
[iii. Possible Improvements]	23

SOCIAL IMPLICATIONS OF RECENT TECHNOLOGICAL INNOVATIONS (Robert S. Cohen)	35
[i. Species-Wide Effects: Continuity or Discontinuity?]	37
[ii. World-Wide Factors]	40
[iii. World-Wide Failures]	41
[iv. Recent Scientific/Technological Developments as World-Wide Problems]	41
[v. Threats to Culture and Democracy from Technological Elites]	45
[vi. Conclusion: Science and Technology Cannot Be Neutral]	46

TECHNOLOGY AND HUMAN RIGHTS (Alois Huning)	49
[i. Technology and Global Civilization]	49
[ii. Human Rights and Technology]	50
[iii. Recognition by Scientists and Engineers]	51

[iv. Human Rights Are Natural]	51
[v. Realization of Freedom through Technology if Directed by Human Rights]	53
[vi. Abstract Formulation Inadequate; Social Implementation]	53
[vii. Minimum Moral Obligation of Scientists and Engineers]	56
TECHNOLOGY ASSESSMENT, FACTS AND VALUES (Alex C. Michalos)	59
1. Introduction	59
2. Fact and Value: Ontology	60
3. Fact and Falsehood: Epistemology	62
4. From Ontology to Epistemology	63
5. From Ontology to Methodology	68
6. Theories of Value	71
7. Rational Decision-Making	79
8. Conclusion	81
A CRITIQUE OF TECHNOLOGICAL DETERMINISM (Günter Ropohl)	83
1. The Technopolitical Challenge	83
2. The Basic Problem	84
3. Technological Determinism and Its Variants	86
4. A Systems-Theoretical Solution of the Problem	87
5. Some Tentative Conclusions	91
TECHNE AND POLITEIA: THE TECHNICAL CONSTITUTION OF SOCIETY (Langdon Winner)	97
[i. Historical Link between <i>Technē</i> and Political Theory: Art of Statecraft]	97
[ii. Industrial Revolution as Form of Institutionalization: Freedom through Abundance]	99
[iii. <i>De Facto</i> Constitution of Sociotechnical Order]	101
[iv. Attempts to Regulate Technology]	103
[v. Efforts Do Not Set Limits for Technological Change]	105
[vi. No Consideration of Ends]	107
[vii. Example: Introduction of Photovoltaic Systems]	108
[viii. Conclusion: Modern Political Theory Must Criticize "Technical Constitution" of Society]	109

PART II / TECHNOLOGY ASSESSMENT

TECHNOAXIOLOGY: APPROPRIATE NORMS FOR TECHNOLOGY ASSESSMENT (Stanley R. Carpenter)	115
1. Introduction	115
2. Recent Assessments of Western Industrial Technology	117
3. The Evaluative Neutrality of TA	121
4. Uncriticized Assumptions of TA	124
5. Implications for Philosophy of Technology	127
6. Conclusion	130
COMMENT: WHAT IS ALTERNATIVE TECHNOLOGY? A REPLY TO PROFESSOR STANLEY CARPENTER (Hans Sachsse)	137
[i. Dissatisfaction with Technology: (1) Harms Associated with Technological Progress; (2) Dangers of Misuse of Technology; (3) Structure of Technology]	137
[ii. No Need for Alternative Technology]	139
THE PROSPECTS FOR TECHNOLOGY ASSESSMENT (Friedrich Rapp)	141
[i. Types of TA: Pretext, Neutral Decision Tool, Prescriptive-Categorical]	143
[ii. Problem with Pretext TA]	143
[iii. Questions about Decision-Making TA]	144
[iv. Rejection of Prescriptive-Categorical TA]	146
[v. Conclusion: TA Remains Indispensable]	149
TECHNOLOGY ASSESSMENT AND THE PROBLEM OF QUANTIFICATION (Kristin Shrader-Frechette)	151
1. Introduction	151
2. Arguments against Quantification	152
3. Arguments in favor of Quantification	154
4. Technology Assessments and the Failure to Quantify	155
5. Conclusion	159
FORECAST, VALUE, AND THE RECENT PHENOMENON OF NON-ACCEPTANCE: THE LIMITS OF A PHILOSOPHY OF TECHNOLOGY ASSESSMENT (Walther Ch. Zimmerli)	165
Introduction	165

1.	Technology Assessment or "Risk Analysis"?	166
2.	The Problem of Forecasting	169
3.	The Philosophy of History and Evolution	171
4.	The End of the Modern Age of Enlightenment	174
5.	Values, Norms, and the Justification of Norms	176
6.	"Defensive Ethics" and TA	178

PART III / RESPONSIBILITIES TOWARD NATURE

THE VIABILITY OF ENVIRONMENTAL ETHICS (Bernard Gendron) 187

[i.	Objections: Recognizing Rights of the Environment Philosophically Confused and Impractical]	187
[ii.	The Impracticality Objection]	188
[iii.	"Rights of Nature Makes No Sense" Refuted]	191
[iv.	Conclusion: Good Instrumental Reasons for Environment as End-in-Itself]	194

NOTES ON EXTENDED RESPONSIBILITY AND INCREASED TECHNOLOGICAL POWER (Hans Lenk) 195

[i.	Ethical Problems of Technological Progress]	195
[ii.	A Response to the Challenge (Jonas)]	198
[iii.	Extension of Social Responsibility to the Future of All of Nature]	201
[iv.	Consequences for Ethics]	202
[v.]	Summary and Applications	205

WHAT SORT OF TECHNOLOGY PERMITS THE LANGUAGE OF NATURE? CONDITIONS FOR CONTROLLING NATURE-DOMINATION CONSTITUTIONALLY (Klaus Michael Meyer-Abich) 211

1.	Absolutism in Man's Relation to Nature	213
2.	Laws of Nature and Laws of Justice; Humanity beyond Mankind	217
3.	Holistic Principles for a Humane Domination of Nature	224

PART IV / METAPHYSICAL AND HISTORICAL ISSUE

THE HISTORICAL-ONTOLOGICAL PRIORITY OF TECHNOLOGY OVER SCIENCE (Don Ihde) 235

I.	Introduction	235
----	--------------	-----

ANALYTICAL TABLE OF CONTENTS

xi

II. The Standard Theory	236
III. A Materialist Theory: Heidegger and White	238
IV. The Historical-Ontological Priority of Technology	244
V. Conclusion	250

THE ORIGINS OF MODERN TECHNOLOGY IN MILLENARIANISM (Reinhart Maurer) 253

I. Why the Philosophy and Theology of History Are Necessary for the Philosophy of Technology	253
II. A Current Example of the Use of Technology to Achieve Millenarian Goals	255
III. Christianity and Millenarianism	259
IV. Millenarianism and Scientific-Technical-Industrial-Economic Control of Nature	260
V. Criticism of Millenarianism	263

THE RELIGIOUS AND POLITICAL ORIGINS OF MODERN TECHNOLOGY (Carl Mitcham) 267

Introduction	267
[i.] Religious Origins I [Weber]	268
[ii.] Political Origins I [Strauss]	268
[iii.] Religious Origins II [White]	270
[iv.] Political Origins II [Mitcham]	271

FROM THE PHENOMENON TO THE EVENT OF TECHNOLOGY (A DIALECTICAL APPROACH TO HEIDEGGER'S PHENOMENOLOGY) (Wolfgang Schirmacher) 275

I. Inhuman Technology: Machines	277
II. Humane Technology: Cybernetic Art	282
III. Human Being: The Event of Technology	286

PRAGMATISM, TRANSCENDENTAL ARGUMENTS, AND THE TECHNOLOGICAL (Joseph Margolis) 291

I. [Heidegger Criticized by Contrast with Marx (But Also Correct: Particular Assessments of Technology Presuppose a General Assessment)]	292
II. [Survey of Contemporary Philosophy: General Convergence on <i>Praxis</i> and the Transcendental]	299

- III. [Theses: Transcendental Discoveries Possible within the Praxi-
cal-Technological; Repudiations of Philosophy (Rorty) or
Non-Relativity (Feyerabend, Kuhn) Are Premature] 302

PART V / DIRECTIONS FOR PHILOSOPHY OF TECHNOLOGY

THE CULTURAL CHARACTER OF TECHNOLOGY (Alwin Diemer)	313
(1) [Culture Defined; Framework of Horizon Structures]	314
(2) [Phenomenological Method]	315
(3) [Technology as Cultural Phenomenon]	316
(4) ["Third-World Problem"]	317
THE IMPORT OF SOCIAL, POLITICAL, AND ANTHROPOLOGI- CAL CONSIDERATIONS IN AN ADEQUATE PHILOSOPHY OF TECHNOLOGY (Hans Heinz Holz)	319
I. [Theses: Instrumental vs. Dialectical Reason; Modern Technol- ogy as Pervasive, But a Necessary Development]	319
II. [Presuppositions and Elaborations]	319
III. [Anthropology of Basic Needs Required]	321
PHILOSOPHY OF TECHNOLOGY: PROBLEMS OF A PHILO- SOPHICAL DISCIPLINE (Elisabeth Ströker)	323
[i. Why Philosophy of Technology is Undeveloped]	323
[ii. Complex Problematic of Philosophy of Technology]	324
[iii. Comparison of Technology/Technological Science with Na- ture/Natural Science]	327
[iv. Comparison of Natural Science with Technology]	328
[v. Technology and the Economy, Ethics, Politics, and Society; Matrix for Analysis]	331
[vi. Proposal: Need for Philosophical But Historically-Oriented Philosophy of Technology]	333
