| <b>Chapter 1 Preparation of Carbanions</b>          | <b>1</b>  |
| 1.1 Reaction of Alkyl and Aryl Halides with Metals, | 3         |
| 1.1.1 <i>Lithium</i> ,                              | 3         |
| 1.1.2 <i>Magnesium</i> ,                            | 4         |
| 1.1.3 <i>Zinc</i> ,                                 | 5         |
| 1.2 Alkali Metal Reduction of C–H Compounds,        | 5         |
| 1.3 Halogen–Metal and Metal–Metal Exchange,         | 6         |
| 1.4 Reaction of C–H Acids with Bases,               | 8         |
| 1.4.1 <i>Equilibrium Acidities</i> ,                | 8         |
| 1.4.2 <i>Kinetic Acidity</i> ,                      | 10        |
| 1.4.3 <i>Hydroxide Bases</i> ,                      | 11        |
| 1.4.4 <i>Alkoxide Bases</i> ,                       | 12        |
| 1.4.5 <i>Lithium Dialkylamides</i> ,                | 13        |
| 1.4.6 <i>Bistrimethylsilyamide Bases</i> ,          | 15        |
| 1.4.7 <i>Lithium and Magnesium Reagents</i> ,       | 15        |
| 1.4.8 <i>Miscellaneous Bases</i> ,                  | 17        |
| 1.5 Reduction of Unsaturated Compounds,             | 18        |
| <b>Chapter 2 General Reaction Types</b>             | <b>21</b> |
| 2.1 Protonation,                                    | 23        |
| 2.2 Alkylation of Carbanions,                       | 26        |
| 2.3 Phenylation of Carbanions,                      | 27        |
| 2.4 Acylation of Carbanions,                        | 28        |

|       |  |    |
|-------|--|----|
| 2.5   | Addition of Carbanions to Carbonyl Groups, Nitriles, and Imines, | 29 |
| 2.6   | Conjugate Addition of Carbanions,                                | 31 |
| 2.7   | Addition to Acetylenes and Dienes,                               | 35 |
| 2.8   | Oxidation of Carbanions,   | 37 |
| 2.9   | Miscellaneous Heteroatom Attachments,                            | 41 |
| 2.9.1 | <i>Halogenation</i> ,  | 41 |
| 2.9.2 | <i>Amination</i> ,   | 42 |
| 2.9.3 | <i>Sulfenylation</i> ,   | 42 |
| 2.9.4 | <i>Selenation</i> ,  | 44 |
| 2.9.5 | <i>Phosphorylation</i> ,   | 44 |

**Chapter 3 Carbanions Without Heteroatom Stabilization,** 47

|       |   |    |
|-------|---|----|
| 3.1   | Organolithium, Magnesium, and Sodium Reagents,        | 50 |
| 3.1.1 | <i>Alkylation</i> ,                                   | 50 |
| 3.1.2 | <i>Acylation</i> ,                                    | 53 |
| 3.1.3 | <i>Addition to C–O and C–N π Bonds</i> ,              | 56 |
| 3.2   | Organocadmium, Zinc, Rhodium, and Manganese Reagents, | 60 |
| 3.3   | Organocupper Reagents,                                | 63 |
| 3.3.1 | <i>Alkylation</i> ,                                   | 63 |
| 3.3.2 | <i>Acylation</i> ,                                    | 68 |
| 3.3.3 | <i>Conjugate Addition</i> ,                           | 69 |
| 3.4   | Acetylidy Anions,                                     | 76 |
| 3.5   | π-Allylnickel(I) Halides,                             | 79 |

**Chapter 4 Carbanions Stabilized by α-Heteroatoms** 81

|       |   |     |
|-------|---|-----|
| 4.1   | α-Halocarbanions,                                     | 83  |
| 4.2   | Carbanions Bearing α-Oxygen,                          | 86  |
| 4.3   | α-Thiocarbanions,                                     | 90  |
| 4.4   | Sulfoxide α-Carbanions,                               | 94  |
| 4.5   | Sulfone α-Carbanions,                                 | 97  |
| 4.5.1 | <i>Alkylation</i> ,                                   | 98  |
| 4.5.2 | <i>Acylation</i> ,                                    | 101 |
| 4.5.3 | <i>Addition</i> ,                                     | 101 |
| 4.5.4 | <i>Conjugate Addition</i> ,                           | 102 |
| 4.6   | Thioacetal Carbanions, Including Vinylogs and Oxides, | 103 |
| 4.7   | Selenide and Selenoxide α-Anions,                     | 110 |

|  |            |
|--|------------|
| 4.8 Sulfur Ylids,  | 111        |
| 4.9 Phosphorus Ylids,  | 115        |
| 4.9.1 <i>Addition—elimination</i> ,  | 116        |
| 4.9.2 <i>Alkylation</i> ,  | 119        |
| 4.9.3 <i>Acylation</i> ,   | 120        |
| 4.9.4 <i>Conjugate Addition</i> ,  | 121        |
| 4.10 Iminocarbanions,  | 123        |
| <b>Chapter 5 Carbanions Stabilized by <math>\pi</math> Conjugation with<br/>one Heteroatom</b> | <b>125</b> |
| 5.1 Ketone Enolate Anions,   | 128        |
| 5.1.1 <i>Alkylation</i> ,  | 129        |
| 5.1.2 <i>Acylation</i> ,   | 137        |
| 5.1.3 <i>Addition</i> ,  | 138        |
| 5.1.4 <i>Conjugate Addition</i> ,  | 141        |
| 5.2 Aldehyde Enolate Anions,   | 143        |
| 5.2.1 <i>Alkylation</i> ,  | 143        |
| 5.2.2 <i>Addition</i> ,  | 144        |
| 5.3 Ester Enolate Anions,  | 144        |
| 5.3.1 <i>Alkylation</i> ,  | 145        |
| 5.3.2 <i>Acylation</i> ,   | 148        |
| 5.3.3 <i>Addition</i> ,  | 151        |
| 5.3.4 <i>Conjugate Addition</i> ,  | 155        |
| 5.4 Carboxylic Acid $\alpha$ -Anions,  | 157        |
| 5.4.1 <i>Alkylation</i> ,  | 157        |
| 5.4.2 <i>Acylation</i> ,   | 158        |
| 5.4.3 <i>Addition</i> ,  | 159        |
| 5.5 Amide $\alpha$ -Anions,  | 161        |
| 5.5.1 <i>Alkylation</i> ,  | 161        |
| 5.5.2 <i>Acylation</i> ,   | 163        |
| 5.5.3 <i>Addition</i> ,  | 163        |
| 5.6 Nitrile $\alpha$ -Anions,  | 164        |
| 5.6.1 <i>Alkylation</i> ,  | 164        |
| 5.6.2 <i>Acylation</i> ,   | 167        |
| 5.6.3 <i>Addition</i> ,  | 168        |

|       |  |
|-------|--|
| 5.6.4 | <i>Conjugate Addition</i> , 169                                  |
| 5.7   | Imine $\alpha$ -Anions, 171                                      |
| 5.7.1 | <i>Alkylation</i> , 171  |
| 5.7.2 | <i>Acylation</i> , 173   |
| 5.7.3 | <i>Addition</i> , 174  |
| 5.8   | Hydrazone $\alpha$ -Anions, 175                                  |
| 5.8.1 | <i>Alkylation</i> , 175  |
| 5.8.2 | <i>Addition</i> , 176  |
| 5.8.3 | <i>Conjugate Addition</i> , 177                                  |
| 5.9   | Heterocyclic Analogs of Iminoester $\alpha$ -Enolate Anions, 177 |
| 5.9.1 | <i>Dihydro-1,3-Oxazines</i> , 177                                |
| 5.9.2 | <i>2-Thiazolines</i> , 180                                       |
| 5.9.3 | <i>2-Oxazolines</i> , 181  |
| 5.10  | Phosphonate Carbanions, 182                                      |

## Chapter 6 Carbanions Stabilized by $\pi$ Conjugation with Two Heteroatoms

189

|       |  |
|-------|--|
| 6.1   | Malonic Acid and Esters, 192                       |
| 6.1.1 | <i>Alkylation</i> , 192                            |
| 6.1.2 | <i>Acylation</i> , 194                             |
| 6.1.3 | <i>Addition—Elimination</i> , 196                  |
| 6.1.4 | <i>Conjugate Addition</i> , 197                    |
| 6.2   | $\beta$ -Keto Esters, 198                          |
| 6.2.1 | <i>Alkylation</i> , 198                            |
| 6.2.2 | <i>Acylation</i> , 202                             |
| 6.2.3 | <i>Addition</i> , 203                              |
| 6.2.4 | <i>Conjugate Addition</i> , 204                    |
| 6.3   | $\beta$ -Keto Aldehydes and Diketones, 205         |
| 6.3.1 | <i>Alkylation</i> , 205                            |
| 6.3.2 | <i>Addition</i> , 207                              |
| 6.3.3 | <i>Conjugate Addition</i> , 208                    |
| 6.4   | Activated Nitriles, 210                            |
| 6.5   | $\alpha$ -Nitro Carbanions (Nitronate Anions), 212 |

|                                   |                                 |
|-----------------------------------|---------------------------------|
| 6.5.1                             | <i>Alkylation</i> , 213         |
| 6.5.2                             | <i>Acylation</i> , 214          |
| 6.5.3                             | <i>Addition</i> , 214           |
| 6.5.4                             | <i>Conjugate Addition</i> , 215 |
| <b>References</b>                 | <b>217</b>                      |
| <b>Carbanion Equivalent Index</b> | <b>239</b>                      |
| <b>General Index</b>              | <b>243</b>                      |
