

TABLE OF CONTENTS

EDITORIAL PREFACE	vii
PREFACE	xvii
ACKNOWLEDGMENTS	xxi
1. Introduction: Science in Its Social Setting	1
1. Snow on the Facts of the Matter	2
2. Our Feelings on the Matter	4
3. The Politics of the Matter	7
4. The Intellectual History of the Matter: Rationalism	9
5. The Intellectual History of the Matter: Romanticism	11
6. The New Rationalist Approach	14
2. The Present State of the Philosophy of Science	18
1. Frank and Surreptitious Change	20
2. The View Equating Science and Rationality	24
3. The Schools in Philosophy of Science	28
3. Was Wittgenstein Really Necessary?	33
1. The New Pseudo-Rationalism	33
2. The Techniques of Pseudo-Rationalism	37
3. The Ineffectiveness of Pseudo-Rationalism	43
4. Epistemology as an Aid to Science	45
1. Divorcing Science and Philosophy	45
2. The Need to Demarcate	50
3. Science and Philosophy Intertwined	51
Notes	54
5. Externalism	55
1. The Purely External	55
2. Internalism	58
3. Is Complete Internalism Possible?	62
Postscript by I. C. Jarvie	67
Note	67

6. The Autonomy of Science	68
1. Internalism and Externalism Again	68
2. Science as a Guild	70
3. Autonomy and Heteronomy Again	71
4. The Sociology of Science Again	73
7. The Legitimation of Science	77
1. Science as Autonomous	77
2. The Self-Regulation of Science	79
3. Democracy within Science	82
4. A New Approach to Legitimacy	83
8. Sociologism in Philosophy of Science	85
1. Digression: the Shocking and the Disarrayed	86
2. Digression Continued: Attitudes Concerning the Shocking	90
3. Husserl's Critique of Descartes	91
4. Husserl not so Radical	93
5. Husserl and Science	94
6. Polanyi's View of Science	96
7. Polanyi Versus Descartes	97
8. Polanyi's Traditionalism	98
9. What Non-Justificationism Amounts to	100
10. When is a Theory Non-Justificationist?	101
9. Revolutions in Science, Occasional or Permanent?	104
1. Three Views on Revolutions	104
2. Radicalism and Traditionalism	105
3. Are Old Men Conservative?	109
4. Are the Canons of Science Conservative?	111
5. Is Conservatism Temperamental or Intellectual?	114
6. The Advantage of Sensitivity to Problems	115
7. Revolution in Permanence	117
10. Cultural Lag in Science	119
1. Cultural Lags	119
2. Delays in Scientific Progress	121
3. The Hidden Injuries of Science	124
4. The Salieri Effect and the Workshop Mentality	127
11. Storage and Communication of Knowledge	132
1. Science as a System of Communications	132

2. Science as the Best of All Possible Worlds	134
3. The Inherent Ambiguity in the System	137
4. Some Obvious Proposals	139
12. The Economics of Scientific Publications	142
1. The Quality Market and the Mass-Market	142
2. New Products and Their Entry to the Market	145
3. Free Markets and Clearing-Houses	148
4. The Market in Reputation	150
5. The Question of Time-Lag Again	153
13. Revising the Referee System	156
1. The Economics of Publication Again	156
2. Criteria of Excellence	158
3. Revising the Referee System	161
14. Scientific Schools and Their Success	164
1. General	164
2. Sociological	168
3. The Myth of Unanimity	171
4. Rationality: Unanimity Versus Proliferation	175
5. Centers of Learning as Schools of Thought	178
6. Philosophy of Science as Empirical Sociology	180
7. How Methodology and Sociology Fuse	184
8. Living Up to One's Standards	187
9. Scientific Schools and Their Success	189
15. Genius in Science	192
1. Is Genius Really Necessary?	193
2. Paradigms of Genius in the Literature	195
3. The Romantic Theory of Science	200
4. The Romantic Scientific Leadership	202
5. Against Scientific Authority	204
6. Towards a Rational Theory of Genius	205
Notes	208
Bibliography	208
16. Scientists as Sleepwalkers	210
1. Between Luck and Wit	210
2. Science and Commonsense	214
3. <i>Apriorism</i> is Alive and Well	216

17. The Logic of Scientific Inquiry	223
1. Is Methodology Innate?	223
2. The Socratic Paradox of Learning	228
3. Common Sense Versus Methodology	233
18. The Choice of Scientific Problems	239
1. Activism and Passivism in Philosophy of Science	239
2. The Roots of the Authority of Science	243
3. The Choice of Theories Versus the Choice of Problems	249
19. Between Metaphysics and Methodology	253
1. Metaphysics as Hypothetical	253
2. Metaphysics as Heuristics	255
3. Metaphysics as Both Hypothetical and Heuristic	258
20. Research Project	262
1. What a Scientist Does and What He Says He Does	262
2. The Harm Caused by Inaccurate Reports	265
3. Evaluating Research Projects	269
21. The Methodology of Research Projects: A Sketch	273
1. The Missing Study of Research Projects	273
2. Buckets, Searchlights, and Powerhouses	274
3. Historians for Powerhouses, Positivists Against Them	276
4. The Pedigree Theory and the Hic Rhodos Theory	277
5. Is Methodology Ineffable or Rational?	279
6. The Rational Way to Assess Metaphysical Frameworks	280
7. Progressive and Degenerative Problem-Shifts	281
22. Continuity and Discontinuity in the History of Science	283
1. The Radicalist View of Science and Its History	283
2. Dialectics as a Reaction to Radicalism	288
3. Duhem's Theory of Science	290
4. The Cultural Background of Science	293
23. Three Views of the Renaissance of Science	300
1. The Radicalist View	301
2. The Conservative View	305
3. The Rise of New Ideas	308
4. Mysticism	311
5. The Possibility of Developing a Third View	314

6. Modified Intuitionism	315
7. The Demarcation of Science	317
8. The Renaissance Revolution of Science	319
Inserts	320
24. On Explaining the Trial of Galileo	321
1. Koestler Upsets the Historians	321
2. Koestler and his Predecessors	322
3. Koestler's Pen-Portrait of Galileo and Its Implications	326
4. The Fall of Galileo	328
5. The Change in Galileo's Behaviour	333
6. Galileo's Faith and Fate	337
7. The <i>Dialogue</i> and the Trial of Galileo	341
8. Conclusion	347
Notes	348
Bibliography	349
25. The Origins of the Royal Society	352
1. The Historical Significance of Bacon's Teaching	352
2. Baconian Radicalism in Action	355
3. Reservations Regarding Bacon	358
4. The Rise of the Royal Society	362
5. Disputing Ancestry Claims	366
6. Bacon Versus Boyle	370
Notes	371
Appendix	371
26. The Ideological Import of Newton	372
1. Background: The Enlightenment and Newton	372
2. The Problem Situation at Present	374
3. The Persistence of the Tension	380
4. The Enlightenment Mythology	384
27. Sir John Herschel's Philosophy of Success	388
1. The Public Situation	389
2. A General View of Science	394
3. The Doctrine of Prejudice	397
4. Induction	401
5. A Eulogy on Bacon	402
6. Aids for the Intellect	406
7. Higher Level Generalizations	407

8. The History of Science	412
9. The Philosophy of Success	414
Notes	419
28. What Makes for a Scientific Golden Age?	421
1. The Trilemma: Bacon Versus Whewell Versus Popper	421
2. The Historical Dimension	425
3. The Experimental Dimension	431
29. Max Weber's Scientific Religion	436
1. A Picture of the Scientist as a Maniac	437
2. The Presuppositions of Science	439
3. Conclusion: Weber's Outlook	442
30. On Pursuing the Unattainable	444
1. Reducing Remote Goals to Near	444
2. The Positivistic Utopia of Rationality	448
3. The Frustration of Seeking the Unattainable	451
4. The Scientific Millennium	454
31. Faith Has Nothing to do With Rationality	457
1. The Basis of Rationality	457
2. The Reason for Rationality	459
3. The Faith in Rationality	461
32. Rationality and the <i>Tu Quoque</i> Argument	465
1. The Faith in Reason Again	465
2. Rationality and Morality	469
3. Rationality and Society	473
33. Technocracy and Scientific Progress	477
1. Robinson Crusoe Today	477
2. The Rise of Technocracy	481
3. Science is Neither Crusonian Nor Technocratic	484
4. Science as a Guild and as a Republic	488
34. Standards to Live By	491
1. Preliminary Difficulties	491
2. The Ills of Excessive Standards	493
3. Room for Making Standards Reasonable	496
4. The Reform of Standards	498
