Chapter I. The Brouwer Bibliography

1.1	Publications	2
1.2	Unpublished Papers	16

Chapter II. Brouwer, Life and Work

2.1	Childhood and Student-years	21
2.2	Post-graduate Study	28
2.3	Life, Art and Mysticism [1905]	31
2.4	The Foundations of Mathematics	35
2.4.1	Chapter One – The Construction of Mathematics	37
2.4.2	Chapter Two – Mathematics and Experience	39
2.4.3	Korteweg's Rejection	40
2.4.4	Chapter Three – Mathematics and Logic	43
2.5	Towards an Academic Career	45
2.5.1	The Unreliability of the Logical Principles [1908C]	46
2.5.2	The Rome Conference 1908	47
2.5.3	Topological Activity 1908-1912	49
2.5.4	The Nature of Geometry [1909A]	49
2.5.5	Zur Analysis Situs	51
2.5.6	The New Methods and the Invariance of Dimension	53
2.5.7	International Recognition	55
2.5.8	Professor L.E.J. Brouwer, 14 October 1912	57
2.6	Intuitionism and Formalism	61
2.6.1	Intuitionist Set Theory	62
2.7	The Signific Interlude	65
2.8	The Second Act of Intuitionism	71
2.8.1	The Foundations of Set Theory Part I	71
2.8.2	The Foundations of Set Theory Part II	75

2.8.3	The New Foundation Crisis	75
2.9	The Turbulent Years	77
2.9.1	Signific and Political Campaigns	77
2.9.2	Göttingen and Berlin Calls	80
2.9.3	The Intuitionist 'Putsch'	82
2.10	The Brouwer Logic	85
2.10.1	The Principle of the Excluded Middle – 1923	85
2.10.2	The Calculus of Absurdities	87
2.10.3	La Logique Brouwerienne	88
2.11	The Reconstruction of Analysis	90
2.11.1	The Continuity Arguments	91
2.12	The Unfinished Books	93
2.12.1	Reelle Funktionen	93
2.12.2	Die Berliner Gastvorlesungen	94
2.13	The Brouwer-Hilbert Controversy and the Annalen Affair	99
2.14	The Silent Years	103
2.15	Post-war Lectures and Final Years	107

Chapter III. Brouwer's Philosophy

3.1	Introduction	111
3.2	Character and Early Background	112
3.3	Philosophy, Metaphysics and Ideology	115
3.4	Mysticism	119
3.5	God and the Moral Principle	122
3.6	Kant and the French Intuitionist Tradition	127
3.7	French Mathematical Intuitionism	132
3.8	The Self, Consciousness and Mind	135
3.9	Causal Attention, Will and Cunning Activity	141
3.10	The Phase of Social Acting and Language	144

Chapter IV. Brouwer's Philosophy of Mathematics

4.1	The Primordial Intuition of Time	147
4.1.1	Introduction	147
4.1.2	Genesis of the Concept and Definitions	148
4.1.3	Brouwer's Primordial Intuition of Mathematics	150
4.1.4	The Discrete and the Continuous in the Primordial Intuition	153

4.2	Intuitive Thinking and Mathematics	157
4.3	The Nature of Mathematics	159
4.4	Reflection on the Nature of Mathematics	162
4.5	Constructiveness and Existence	164
4.5.1	Brouwer Construction	164
4.5.2	Classification of Constructions	165
4.5.3	Distinctive Features of Mathematical Constructive Thinking	168
4.6	The Subject and the Intersubjectivity of Mathematics	171
4.6.1	Brouwer's Idealism	171
4.6.2	The Idealized Subject	172
4.6.3	Mathematics, the Life of the Idealized Free Subject	174
4.6.4	Objectivity and Inter-subjectivity	180
4.7	The Application of mathematics	182
4.7.1	Brouwer's Critique of Scientific Practice	184
4.7.2	The Ideal Nature of Science	185
4.7.3	The Process of Application and its Mathematical Truth	188

Chapter V. Language and Logic

5.1	Society and Communication	193
5.2	The Purpose and Origin of Language	196
5.3	Language and Pure Thought	199
5.4	The Programme of Reform	201
5.5	Brouwerian Semantic Theory	203
5.5.1	The Privacy of Language	203
5.5.2	The Instability of Language	204
5.5.3	Words, Sentences and Truth	211
5.6	Brouwer's Analysis of Mathematical and Linguistic Activity	213
5.6.1	The Language of Mathematics	215
5.6.2	The Language of Logical Reasoning	220
5.7	Brouwers's Analysis of Logic	224
5.7.1	Logic, the Science of Reasoning	224
5.7.2	Pure Logic as Science and Abstraction	225
5.7.3	The Application of Logical Principles	230
5.8	Brouwer Negation	238
5.8.1	Brouwer's Constructive Notion of Negation	239

5.8.2	Absurdity as Impossibility of 'Fitting-in'	240
5.8.3	Constructed Impossibility	242
5.8.4	Mathematical Absurdity and Other Notions of Negation	244
5.9	The Refutation of the PEM	247
5.9.1	The Unreliability of the PEM, 1908	248
5.9.2	Mathematics Without the PEM, 1917	250
5.9.3	Brouwer's Counterexamples	252
5.9.4	The Contradictority of the PEM	255
5.10	Logical Negation and the 'Brouwer Logic'	257
5.10.1	The Calculus of Absurdities	257
5.10.2	Logical Necessity and Truth	260
5.10.3	Logical Absurdity	262
5.10.4	Non-contradictority and Absurdity-of-absurdity	265
5.11	The Crisis in Brouwer's Intuitionism	270
5.11.1	The Use of Language and Logic in Brouwer's Reconstruction of Mathematics	271
5.11.2	The Pragmatism of Post-Brouwer Intuitionism	274
5.12	The Formalization of Mathematics	279
5.12.1	The 'Formalist' Schools and Formal Axiomatic Theory	279
5.12.2	The Formalization of Intuitionist Mathematics	285
5.12.3	Heyting's Formalization of Intuitionist Logic	288
	Selected Contributions to the Formalization of Intuitionist Logic and Mathematics	293

Chapter VI. Brouwer's Intuitionist Mathematics

6.1	Introduction	295
6.2	Brouwerian Separable Mathematics	300
6.2.1	The Primordial Intuition as Set-construction	301
6.2.2	The Fundamental Sequence	305
6.2.2.1	The Order-type n	306
6.2.2.2	The Order-type ω	309
6.2.2.3	Brouwer's Generalization of the Concept Sequence	309
6.2.3	Cardinality	312
6.2.4	Systems and Operations of Separable Mathematics	314
6.2.4.1	The Operations on Ordinal Numbers	314
6.2.4.2	The Integers	315

6.2.4.3	Rationals and the Order-type η	316
6.3	The Brouwer Mathematical Continuum	318
6.3.1	Introduction	318
6.3.2	The Genesis and Nature of the Intuitive Continuum	323
6.3.2.1	The Construction of Intervals	325
6.3.2.2	Relations and Ordering of Intervals	326
6.3.3	Point-sets on the Continuum and the 'Made-measurable Continuum' (pre-1917)	328
6.3.3.1	The 'Made-measurable Continuum'	328
6.3.3.2	Point on the Continuum	330
6.3.3.3	Sets of Constructed Points	332
6.3.3.4	Denumerably-unfinished Systems and Definable Points	333
6.3.4	The New Set-theory 1917	334
6.3.5	Mathematical Species	335
6.3.6	The Genesis of Species	337
6.3.7	The Hierarchy of Species	340
6.3.8	The Theory of Species	345
6.3.8.1	Union and Intersection of Species	346
6.3.8.2	The Empty Species	347
6.3.8.3	Relations between Species	347
6.3.8.4	Difference, Deviation and Apartness	348
6.3.8.5	Congruence and Agreement	351
6.3.9	The Complementarity of Species	352
6.3.10	Spreads and Choice-sequences	357
6.3.11	Real Elements of the Continuum	361
6.3.11.1	Interval	362
6.3.11.2	Real Point or Real Number	362
6.3.11.3	Law and Choice	363
6.3.11.4	Species of Coincident Points or Point-cores	364
6.3.11.5	Point-set or Point-spread	366
6.3.11.6	Fundamental Sequences of Intervals and Finite Point-spreads	369
6.3.12	The General Spread Concept	370
6.3.13	Continuity and Uniform Continuity of Spread Functions	378
6.3.13.1	Finite Spreads	378
6.3.13.2	The Brouwer Continuity Hypothesis or the Fundamental Hypothesis for Real Functions	379

6.3.13.3 The Fundamental Theorem of Finite Spreads 381
6.3.13.4 The Uniform-Continuity Theorem 384

Appendices

1 Profession of Faith of L.E.J. Brouwer [BMS 1A] (Dutch original and English translation) 387
2 Student Notebook [BMS 1B] (Dutch original and English translation) 394
3 The Rejected Parts of Brouwer's Dissertation [BMS 3B] 405
4 Intuitive Significs [BMS 22B] (Dutch original and English translation) 416
5 Will, Knowledge and Speech (English translation of BR[1933]) 418
6 Short Retrospective Notes on the Course "Intuitionist Mathematics" [BMS 52] 432
7 Disengagement of Mathematics from Logic [BMS 49] 441
8 Notes for a Lecture [BMS 47] (Dutch original and English translation) 447
9 Changes in the Relation between Classical Logic and Mathematics [BMS 59] 453
10 'Second Lecture' [BMS 66] 459
11 Real Functions [BMS 37] 469
12 Intuitionist Mathematics or Die Berliner Gastvorlesungen [BMS 32] 481
13 The Brouwer-Korteweg Correspondence 487
