

# Contents

Introduction	1
Chapter 1. Representations of Weil groups	9
Chapter 2. Simple characters and tame parameters	15
Chapter 3. Action of tame characters	23
Chapter 4. Cuspidal representations	33
Chapter 5. Algebraic induction maps	35
Chapter 6. Some properties of the Langlands correspondence	45
Chapter 7. A naïve correspondence and the Langlands correspondence	49
Chapter 8. Totally ramified representations	53
Chapter 9. Unramified automorphic induction	61
Chapter 10. Discrepancy at a prime element	69
Chapter 11. Symplectic signs	79
Chapter 12. Main Theorem and examples	85
Bibliography	87
