

Contents

Author Biographies.....	xxv
Foreword	xciii
Abbreviation Meaning	xcix
Introduction to the Book.....	ciii
Phase 1	1
<i>Henrik von Scheel, Mark von Rosing, Marianne Fonseca, Maria Hove, Ulrik Foldager</i>	
Introduction	1
Process Concept Evolution 1.0	2
Sun Tzu	2
Adam Smith	4
Taylorism	5
Henry Ford.....	7
End Notes	8
Phase 2: Process Concept Evolution 2.0.....	11
<i>Henrik von Scheel, Mark von Rosing, Maria Hove, Marianne Fonseca, Ulrik Foldager</i>	
Introduction	11
Gantt Chart	13
Frank B. Gilbreth	14
Allan H. Mogensen	16
Boeing B17	17
Benjamin S. Graham	18
ASME: American Society of Mechanical Engineers	18
Functional Flow Block Diagram of PERT	20
Functional Flow Block Diagrams	20
PERT: Program Evaluation Review Technique.....	21
Data Flow Diagrams and IDEF	22
Data Flow Diagram	22
Integrated Definition	23
IDEF0 Overview: Function Modeling Method	23
IDEF1 Overview: Information Modeling Method	24
IDEF1X Overview: Data Modeling Method	24
IDEF3 Overview: Process Description Capture Method	25
IDEF4 Overview: Object-Oriented Design Method	25
IDEF5 Overview: Ontology Description Capture Method	25
Zero Defects	25
Toyota Production System	27

Jidoka: Highlighting/Visualization of Problems	28
Just-In-Time: Productivity Improvement	28
The 14 Principles of TPS	30
End Notes	34
Phase 3: Process Concept Evolution 3.0	37
<i>Mark von Rosing, August-Wilhelm Scheer, John A. Zachman, Daniel T. Jones, James P. Womack, Henrik von Scheel</i>	
Introduction	37
Prof. Dr. H.c. Mult. August-Wilhelm Scheer	39
Introduction	39
A New Way of Thinking: Linking Process and Information Concepts	40
Architecture of Integrated Information Systems (ARIS)	41
Additional Important Aspects	42
Conclusion	42
John A. Zachman—the Arrival of Enterprise Architecture	42
Introduction	42
The Zachman Framework for Enterprise Architecture	43
Perspectives of the Framework	44
Conclusion	46
Lean Thinking, Lean Practice and Lean Consumption	46
The evolution of Toyota's practices	46
The evolving understanding of Lean	47
The spread of Lean and Lean Consumption	48
Conclusion	49
Business Process Reengineering	50
Dr Michael Hammer	50
Introducing Business Process Reengineering	50
Width before Depth	51
The Three Levels of Management	52
The Three Important Ingredients	52
The Business Process Reengineering Cycle	53
Methods and Approaches to Business Process Reengineering	54
Business Process Reengineering Project and Success Criteria	55
The Pros of Business Process Reengineering	56
The Cons of Business Process Reengineering	57
Conclusion	57
Total Quality Management	58
Introduction	58
Implementing Total Quality Management in the Organization	59
Key Elements for Change	59
The Use of Total Quality Management in Process Work	61

Tools for TQM	63
House of Quality or Quality Function Deployment	63
Taguchi Techniques	64
Pareto Diagrams	64
Process Diagrams	65
Cause & Effect Analysis Diagrams	66
Statistical Process Control	66
The PDCA Cycle	66
Business Excellence and EFQM	69
Conclusion	69
Six Sigma	70
Introduction	70
What Six Sigma Means	70
The Purpose of Six Sigma	70
DMAIC	71
DMADV	72
Conclusion	72
End Notes	73
Phase 4: What Is Business Process Management?	79
<i>Keith Swenson, Mark von Rosing</i>	
Introduction	79
Definition and Research	79
Insights Gained	83
BPM Is Not About Automation of Processes	83
BPM Is Done by People Concerned Primarily with Improvement of the Process	84
Misrepresentations of BPM	84
BPM Is Not a Product	84
BPM Is Not a Market Segment	84
An Application Does Not Do BPM	84
BPM As a Service Is Not Application Hosting	85
Entire Organizational Units Do Not Do BPM	85
BPM Is Not Merely Anything that Improves Business	85
BPM Is Not All Activities Supported by a BPMS	85
Just Because You Can Do Something with a BPMS Does Not Mean It Is BPM	85
Participating in a Process Is Not Doing BPM	86
Implementation (Coding) of the Process Application Is Not BPM	86
Making a Suggestion for Process Improvement Is Not BPM	86
Improving a Single Step of a Process Is Not BPM	86
Conclusion: One Common Definition	87
End Notes	88

The BPM Way of Thinking	89
<i>Mark von Rosing, Henrik von Scheel, August-Wilhelm Scheer</i>	
Introduction	89
The Value of Ontology	91
<i>Mark von Rosing, Wim Laurier, Simon Polovina</i>	
Introduction	91
What Is Ontology?	91
Ontology Classification Based on Context Dependency	92
Ontology Maturity and the Maturing Process	92
State of the Art	93
Conclusions and Directions for Future Research	95
End Notes	96
The BPM Ontology	101
<i>Mark von Rosing, Wim Laurier, Simon Polovina</i>	
Introduction	101
The BPM Ontology as a Folksonomy: Sharing Fundamental Process Concepts	101
The BPM Ontology as a Thesaurus: Structuring Process Knowledge by Defining Relations	106
The BPM Ontology as a Frame: The Ontological Structure of the Leading Practice Process Meta Model	114
Discussion of the BPM Ontology	119
Summary	120
End Notes	121
Process Tagging—A Process Classification and Categorization Concept	123
<i>Mark von Rosing, Neil Kemp, Maria Hove</i>	
Introduction	123
Logical Clustering: Learning from other Areas	123
Conceptual and Logical Process Classification and Categorization	125
Classification of Process by Method of Execution	128
The Nature of Process Decomposition	130
Describing Work	133
Process Area	136
What Is a Process Area?	136
How to Identify Process Areas	137
How Is a Process Area Documented?	137
Process Group	139
What Is a Process Group?	139
Why Separate Process Group and Business Service as Unique Concepts?	140

How to Identify Process Groups	140
How Are Process Groups Documented?	142
The Nature of Process Groups	143
Process	143
What Is a Process?	143
How to Identify Processes	144
How Are Processes Documented?	144
The Nature of Processes	147
Process Lifecycle Verb Taxonomy	147
Process Step	147
What Is a Process Step?	147
How to Identify Process Steps	147
How Are Process Steps Documented?	150
The Nature of Process Steps	157
Activity	157
What Is an Activity?	157
How to Identify Activities	157
How Are Activities Documented?	157
The Nature of Activity	158
The Work System	158
What Is the Work System?	158
How to Determine the Work System	159
How Is the Work System Documented?	159
Procedure	159
What Is a Procedure?	159
How to Identify Procedures	160
How Are Procedures Documented?	160
Connecting the Work Spaces	160
Process Scenarios	161
Process Type	162
Process Tier	165
Process Nature	165
Miscategorization and Misclassification	169
Conclusions	169
End Notes	170
Why Work with Process Templates	173
<i>Mark von Rosing, Maria Hove, Henrik von Scheel, Ulrik Foldager</i>	
Introduction	173
The Relationship Between Business Process Management Ontology and Process Templates	173
What Are Process Templates?	175

Process Maps	175
Process Matrix	177
Process Model	178
The Most Common Process Templates	181
Benefits of Process Templates	181
Conclusion	183
End Notes	184
The BPM Way of Working	185
<i>Henrik von Scheel, Mark von Rosing, August-Wilhelm Scheer</i>	
Introduction	185
Business Process Trends	187
<i>Mark von Rosing, August-Wilhelm Scheer, Henrik von Scheel, Adam D.M. Svendsen, Alex Kokkonen, Andrew M. Ross, Anette Falk Bøgebjerg, Anni Olsen, Antony Dicks, Asif Qumer Gill, Bas Bach, Bob J. Storms, Callie Smit, Cay Clemmensen, Christopher K. Swierczynski, Clemens Utschig-Utschig, Dan Moorcroft, Daniel T. Jones, David Coloma, Deb Boykin, Dickson Hunja Muhita, Duarte Gonçalves, Fabrizio aria Maggi, Fan Zhao, Fatima Senghore, Fatma Dandashi, Fred Cummins, Freek Stoffel, Gabriel von Scheel, Gabriella von Rosing, Gary Doucet, Gert Meiling, Gert O. Jansson, Hans Scheruhn, Hendrik Bohn, Henk de Man, Henk Kuil, Henrik Naundrup Vester, Jacob Gammelgaard, James P. Womack, Jeanne W. Ross, Jeff Greer, Jens Theodor Nielsen, John A. Zachman, John Bertram, John Golden, John M. Rogers, Jonnro Erasmus, Joshua von Scheel, Joshua Waters, Justin Tomlinson, Karin Gräslund, Katia Bartels, Keith D. Swenson, Kenneth Dean Teske, Kevin Govender, Klaus Vitt, Krzysztof Skurzak, LeAnne Spurrell, Lloyd Dugan, Lotte Tange, Mads Clausager, Maria Hove, Maria Rybrink, Marianne Fonseca, Mark Stanford, Marlon Dumas, Mathias Kirchmer, Maxim Arzumanyan, Michael D. Tisdell, Michel van den Hoven, Mikael Munck, Mike A. Marin, Mona von Rosing, Nathaniel Palmer, Neil Kemp, Nils Faltin, Partha Chakravartti, Patricia Kemp, Peter Franz, Philippe Lebacqz, Rich Hilliard, Richard L. Fallon, Richard N. Conzo, Rod Peacock, Ronald N. Batdorf, Sarel J. Snyman, Scott Davis, Simon M. Polovina, Stephen White, Steve Durbin, Steve Willoughby, Sven Vollbehre, Thomas Boosz, Thomas Christian Olsen, Tim Hoebeek, Tom Preston, Ulrik Foldager, Victor Abele, Vincent Snels, Volker Rebhan, Wim Laurier, Yr Gunnarsdottir, Yury Orlov, Zakaria Maamar, Ekambareswaran Balasubramanian, Mai Phuong, Régis Dumond</i>	
Introduction	187
The Importance of Trends	187
Maturity of the Subject	188
Mega Trends	189
Emerging Trends	190
Process Trends	191
Early Adoption	191
Early Adopter of Process Trends	193

Industry Adoption	204
Industry Adoption of Process Trends	205
Standard Adoption	211
Standards Adoption of Process Trends	211
Conclusion	216
End Notes	216
BPM Center of Excellence	217
<i>Mark von Rosing, Maria Hove, Henrik von Scheel, Rogan Morrison</i>	
Introduction	217
The Challenge BPM CoE Faces	217
What Happens Without a BPM CoE?	220
Cause and Effect Matrix	222
Lessons Learned Regarding BPM CoE	222
Work of a BPM CoE	224
Typical BPM CoE Roles	226
BPM CoE Process Life Cycle	227
BPM CoE Portfolio Process Management	227
A Clear Understanding and Approach to BPM Governance	229
A BPM Maturity Holistic View in BPM CoE	232
BPM Performance Management Is Executed Within the BPM CoE	233
BPM Alignment to Value So That the Strategic Intent Is Woven Into the BPM CoE	234
Alignment of BPM CoE to Existing Enterprise Standards, Enterprise Architecture, Enterprise Modeling, and Other IT Disciplines	235
Continuous Improvement and BPM CoE Change Management	236
Conclusion	238
End Notes	238
Understanding Business Process Management Roles	241
<i>Mark von Rosing, Neil Kemp, Maxim Arzumanyan</i>	
Introduction	241
Motivation for Defining Your BPM Roles	241
Relevance Context	242
What Is a Role?	242
Standards that Link to Role Concepts	246
Current Methods	247
Role Context	248
Abilities to Act	250
Rights versus Hierarchical Power	250
Role Profile	251
Categories of Working Roles	251

Common Roles Involved with Role Modeling	252
Roles within BPM	253
Typical BPM CoE Roles	254
BPM CoE Stakeholders	254
Process Owner	255
BPM CoE Manager	256
Business Process Portfolio Manager	256
Process Project Manager	257
Process Expert	257
Business Process Analyst	257
Process Engineer	258
Process Architect	258
Enterprise Architect	259
Process Support Desk	259
Methods and Tools Specialist	259
Business Process Management Tool Administrator	259
Training Specialist	259
Additional Roles	260
Role Profile within BPM CoE	261
Role Profile within BPM Projects	262
Conclusion	263
End Notes	263

Working with the Business Process Management

(BPM) Life Cycle	265
-------------------------------	------------

Ulrik Foldager, Mark von Rosing, Maria Hove, Joshua von Scheel, Anette Falk Bøgebjerg

Introduction	265
Phase 1: Analyze—Project Preparation and Blueprint	266
Step 1: Identify Critical Business Factors	270
Step 2: Describe Process Goals	270
Step 3: Choose Building	271
Step 4: Check for Process Reference Content	273
Step 4a: Process Reference Content Available	273
Step 4b: Define High-Level Process Landscape Based on Process Reference Content	275
Step 4c: Analyze Match of Process Reference Content	276
Step 4d: Processes That Do Not Match Process Reference Content	276
Step 4e: Understand As-Is High-Level Process Landscape	277
Step 5: No Process Reference Content Available	278

Phase 2: Design—Project Realization and Design	278
Step 6: Process Planning and Design	280
Step 7: Define Process Map	282
Step 8: Design Solution	283
Step 9: Case-Based Process Concept	283
Step 10: Value-Based Process Concept	284
Step 11: Standardize and Integrate	285
Step 12: Process Requirement Management	286
Step 13: Processes Cannot Be Adapted	287
Phase 3: Build—Final Project Preparation	287
Step 14: As-Is Analysis	291
Step 15: To-Be Value-Driven Process Design	291
Step 16: Harmonize Variants Based on Value-Driven Process Design	292
Step 17: To-Be Documentation and To-Be Organizational Structure	293
Step 18: Match Processes to Process Reference Content	294
Step 19: Processes with Variants	294
Step 20: Directly Adaptable Processes	295
Phase 4: Deploy/Implement—Go Live	295
Step 21: Decide on Process Implementation (Based on Requirements)	299
Step 22: Process Rollout	299
Step 23: Add Process Rewards	300
Step 24: Enable Process Performance Measurements	301
Step 25: Define Performance Indicators Based on Value Drivers	302
Step 26: Harmonize Terms	303
Step 27: Establish Process Ownership	303
Phase 5: Run/Maintain—Run Processes and Govern Performance	306
Step 28: Process Measurements, Monitoring, Reporting, and Audits	307
Step 29: Perform Scoping of Gaps	310
Step 30: Choose Building Blocks	310
Step 31: Evaluate Potential Solutions	312
Step 32: Analyze Variances	312
Step 33: Estimate Impact	314
Phase 6: Continuous Improvement—Continuously Optimize and Develop Processes	316
Continuous Improvement: Performance and Value Drivers	318
Step 34: Prioritize Improvement Areas	320
Step 35: Manage Process Update	324
Step 36: Performance Change Management	324
Step 37: Business Innovation and Transformation Enablement	325
Step 37a: Value Model	327

Step 37b: Revenue Model	329
Step 37c: Cost Model	330
Step 37d: Service Model	331
Step 37e: Operating Model	333
Step 37f: Performance Model	336
Conclusion	336
End Notes	340
The Chief Process Officer: An Emerging Top Leadership Role	343
<i>Mathias Kirchmer, Peter Franz, Mark von Rosing</i>	
Introduction	343
The Emerging Role of the CPO	343
Key Tasks of the CPO	345
Positioning of the CPO in the Organization	346
Conclusion	347
End Notes	347
iBPM—Intelligent Business Process Management	349
<i>Nathaniel Palmer</i>	
The Evolution of Intelligent BPM	350
From Automation to Orchestration: The Realignment of BPM Around Service-Oriented Architectures	351
Apply SOA Strategies to Integrating Unstructured Information	352
Leveraging Content As a Service	353
Realizing Adaptability: Shifting from Event-Driven to Goal-Driven	353
Goal-Driven Scenarios	354
Phase Three: Intelligent BPM	354
Adaptability Begins with Reading Signals	355
Intelligent BPM Leverages Big Data	356
Faster Adaptation Is Not Necessarily Faster Decisions	358
The Value of Social Media to Intelligent BPM	359
The Ability to Mobilize	360
Conclusion	360
End Notes	361
Evidence-Based Business Process Management	363
<i>Marlon Dumas, Fabrizio Maria Maggi</i>	
Introduction	363
Evidence-Based BPM: What for?	363
The Answer: Process Mining	364
Descriptive Approaches	365
Process Performance Analytics	366

Automated Process Discovery	366
Model Enhancement	367
Deviance Mining	368
Process Variant and Outlier Identification	369
Predictive Approaches	369
Case Studies and Lessons in Evidence-Based BPM	370
Case Studies in Automated Process and Variant Discovery	370
Case Studies in Deviance Mining	371
Case Studies in Predictive Monitoring	373
Conclusion	373
End Notes	374
Social Media and Business Process Management	377
<i>Zakaria Maamar, Henrik von Scheel, Mona von Rosing</i>	
Introduction	377
The Digital Mind-set Is Changing	377
Social Media Are Reshaping Business	379
Enabling Customer-Centricity	383
Lessons Learned Around Social-Oriented Process Modeling	384
Target Marketing Campaigns with Social Media	385
Improving the Prospect Qualification Process	386
Customer Profile Data for Process (Simplification)	386
Customer Notifications for Process (Visibility)	387
Alternative Channels for Sales	387
Selection of the Right Offering/Solution	387
Social Media and BPM for Customer Servicing	387
Customer Relationship Management	388
Social Media Process Flow	392
Conclusion	392
End Notes	394
BPM and Maturity Models	395
<i>Gabriella von Rosing, Krzysztof Skurzak, Henrik von Scheel, Maria Hove</i>	
Introduction	395
Historic Development of Maturity Models	396
The Different Stages of Maturity Models	399
The Missing Parts of the Maturity Models	401
BPM Maturity Model	403
Maturity Levels	403
Business Process Maturity: Level 1	403
Business Process Maturity: Level 2	404

Business Process Maturity: Level 3	404
Business Process Maturity: Level 4	404
Business Process Maturity: Level 5	405
From Maturity Level Assessment to Maturity Benchmark	421
Conclusion	424
End Notes	424
The BPM Way of Modeling	427
<i>Mark von Rosing, Henrik von Scheel, August-Wilhelm Scheer</i>	
Introduction	427
Business Process Model and Notation—BPMN	429
<i>Mark von Rosing, Steve White, Fred Cummins, Henk de Man</i>	
Introduction	429
What Is BPMN?	429
The Historic Development of BPMN	430
The BPMN Notations/Shapes	431
BPMN Diagrams	439
To Point (1) Private (Internal) Business Processes	439
Public Processes	440
Collaborations	441
To Point (2) Choreography	441
To Point (3) Conversations	442
BPMN Usage	443
Diagram Point of View	444
Understanding the Behavior of Diagrams	444
BPMN Example	444
BPMN Caveats	447
The Future of BPMN	447
Fulfilling the BPMN Vision	448
Implementation Level Modeling	449
Case Management Modeling	451
Conclusions	452
End Notes	452
Variation in Business Processes	455
<i>Mark von Rosing, Jonno Erasmus</i>	
Introduction	455
Business Process Variances: What Is It?	455
Complications and Challenges	457
Solution Description	459

When Should Variation Be Allowed and How Much Is Enough?459
 Defining and Justifying Business Process Variance462
 Modeling of Business Process Variance464
 Managing Business Process Variances468
 Cost Calculation of Process Variances470
 Lessons Learned471
 Conclusion and Summary472
 End Notes472

**Focusing Business Processes on Superior Value Creation:
 Value-oriented Process Modeling475**

Mark von Rosing, Mathias Kirchmer

Introduction475
 Value Is a Different Kind of Concept for Process Teams475
 Targeting Value476
 Segmentation of Business Processes477
 Value-oriented Design481
 Value-oriented Process Modeling483
 Value-oriented Implementation484
 Value-oriented Process Governance to Sustain Value489
 Conclusion491
 End Notes491

Sustainability Oriented Process Modeling493

Gabriella von Rosing, David Coloma, Henrik von Scheel

Introduction493
 Situation, Complications, and the Main Questions493
 Conditions, Circumstances, and Complexity494
 The Main Questions Covered495
 The Answer496
 The Way of Thinking Around Sustainability Oriented Process Modeling496
 Sustainability Oriented Process Modeling: The Way of Working497
 Understanding Your Organization’s Sustainability Personality499
 Building and Transforming the BPM CoE and Organization’s
 Culture Toward Sustainability499
 Developing the Organization’s Business Model499
 Developing the Sustainability’s Life Cycle500
 Building the Organization’s Sustainability Maturity Model501
 Developing the Sustainability Value Model502
 Developing the Sustainability Revenue Model504

Sustainability Oriented Process Modeling: Way of Modeling	505
Sustainability Oriented Process Modeling: Way of Implementing	507
Sustainability Oriented Process Modeling: Way of Governing	508
Benefits of Combining BPM and Sustainability Oriented Process Modeling	508
Conclusions	509
End Notes	509
Information Modeling and Process Modeling	511
<i>Hans-Jürgen Scheruhn, Mark von Rosing, Richard L. Fallon</i>

Business Process Portfolio Management	613
<i>Mark von Rosing, Hendrik Bohn, Gabriel von Scheel, Richard Conzo, Maria Hove</i>	
From Business Process Management to Business Process Portfolio Management	613
Common Pitfalls When Implementing BPPM	614
Not All Process Portfolios are Equal	614
Changes to a Process Portfolio Can be Implemented Over Several Years, Yet Budgets are Allocated Yearly	615
Organization Has a Silo Mentality	615
Lack of Information on Processes	615
Getting Reliable and Accurate Information on Processes	615
Inadequate Portfolio Management Skills	615
Additional Time Constraint on Busy Executives	616
Establishing BPPM	616
Comparison of PPM, BPPM, and BPM	617
Creating a BPPM Competency	618
Guiding Principles	618
Analysis Phase	619
Design Phase	619
Build Phase	619
Deploy/Implement Phase	619
Run/Maintain Phase	620
Continuous Improvement Phase	620

Alignment Considerations When Implementing BPPM	620
Strategic Alignment	621
Social Alignment	621
Processual Alignment	621
Technical Alignment	621
BPPM Life Cycle	621
Business Process Portfolio Planning and Alignment Phase	622
Opportunity Management Phase	622
Variation/Change Management Phase	622
Approval Phase	624
Opportunity Realization Phase	624
Feedback Loop Communication	626
Feedback Loop	626
Continuous Improvement Phase	627
Business Process Hierarchy	627
Business Process Area	628
Business Process Group	628
Business Process	628
BPPM Information, Measurements, and Reporting	628
BPPM Information for Measurement and Reporting	629
BPPM Measurements and Reporting	630
Summary of Establishing BPPM	630
Lessons Learned From Implementing BPPM	630
Right Time to Implement BPPM	630
Effect of Limited or No Implemented BPPM in the Long Run	631
Conclusions	631
End Notes	633
Real-Time Learning: Business Process Guidance at the Point of Need ...	635
<i>Nils Faltin, Mark von Rosing, August-Wilhelm Scheer</i>	
Introduction	635
Real-Time Learning to Close the Knowledge Gap	637
Bite-Sized Learning Units	637
Electronic Performance Support: Delivering Knowledge at the Point of Need	638
Business Process Guidance	638
Components of a BPG System	639
BPG in Practical Use	639
Supporting Entry of Correct Data	639
Supporting Multiple Applications	640

Enhancing Communication with the Support Desk	640
Introducing BPG in an Organization	641
Creating a Repository of Microlearning Content	641
Major Steps to Create the Repository	642
Conclusions and Outlook	642
