

# Contents

1. THE FINITE ELEMENT METHOD	1
1.1 <i>Introduction</i> • 1	
1.2 <i>Principle of virtual work</i> • 2	
1.3 <i>Principle of minimum total potential energy</i> • 2	
1.4 <i>Stiffness matrix of a bar member</i> • 3	
1.5 <i>Stiffness matrix of a beam member</i> • 4	
1.6 <i>Finite element procedure</i> • 5	
1.7 <i>Displacement functions</i> • 6	
1.8 <i>Choice of displacement functions</i> • 15	
1.9 <i>Formulation of stiffness matrix and load matrix</i> • 22	
1.10 <i>Bar element stiffness matrix rederived</i> • 25	
1.11 <i>Beam element stiffness matrix rederived</i> • 27	
2. TRIANGULAR ELEMENT FOR PLANE ELASTICITY AND A SIMPLE COMPUTER PROGRAM	31
2.1 <i>Introduction</i> • 31	
2.2 <i>Constant strain triangular element</i> • 31	
2.3 <i>Example problem for all subsequent computations</i> • 40	
2.4 <i>Data preparation</i> • 43	
2.5 <i>Generation of individual stiffness matrices</i> • 49	
2.6 <i>Assemblage of the structural stiffness matrix</i> • 51	
2.7 <i>Introduction of prescribed displacement conditions</i> • 58	
2.8 <i>Load matrix</i> • 62	
2.9 <i>Solution of simultaneous equations</i> • 64	
2.10 <i>Calculation of element stresses</i> • 70	
3. QUADRATIC ISOPARAMETRIC ELEMENT FOR PLANE ELASTICITY	80
3.1 <i>Introduction</i> • 80	
3.2 <i>Isoparametric concept</i> • 81	
3.3 <i>Family of isoparametric elements</i> • 83	
3.4 <i>Stiffness matrix formulation</i> • 87	
3.5 <i>Numerical integration</i> • 91	
3.6 <i>Calculation of element stiffness</i> • 94	
3.7 <i>Stress matrix</i> • 101	
3.8 <i>Some consistent load matrices</i> • 104	

4. THE FRONT SOLVER	117
4.1 <i>Introduction</i> • 117	
4.2 <i>The front solver</i> • 118	
4.3 <i>Transformed constraints</i> • 134	
4.4 <i>Improvements to the efficiency of execution</i> • 138	
5. COMPUTER PROGRAM LISTING AND COMPUTATIONS USING ISOPARAMETRIC ELEMENTS	143
5.1 <i>Computer program listing</i> • 143	
5.2 <i>Example problem using isoparametric elements</i> • 152	
5.3 <i>Input data for the 6<sup>o</sup> segment</i> • 153	
6. AUTOMATIC MESH GENERATION	163
6.1 <i>Introduction</i> • 163	
6.2 <i>Mesh generation</i> • 163
