

# CONTENTS

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	The Problem to be Solved	1
1.2	Numerical Approximation of the Solution	7
1.3	An Illustration—the Euler Method	10
1.3.1	<i>Error estimates</i>	13
1.3.2	<i>Comparison of error estimates with actual errors</i>	15
1.3.3	<i>Stability</i>	16
1.3.4	<i>Round-off errors</i>	18
1.3.5	<i>The perturbation due to the numerical approximation</i>	21
	Problems	23
<b>2</b>	<b>Higher Order One-Step Methods</b>	<b>25</b>
2.1	The Taylor's Series Method	25
2.2	Richardson Extrapolation to $h = 0$	26

2.3	Second Order Runge-Kutta Methods	27
2.4	Explicit Runge-Kutta Methods	31
2.4.1	<i>The classical Runge-Kutta method</i>	35
2.4.2	<i>The Ralston Runge-Kutta method</i>	36
2.4.3	<i>Butcher's results on the attainable order of Runge-Kutta methods</i>	36
2.5	Implicit Runge-Kutta Methods	37
2.5.1	<i>Practical considerations of implicit Runge-Kutta methods</i>	39
2.6	Convergence and Stability	40
2.6.1	<i>Stability regions for explicit Runge-Kutta methods</i>	40
2.6.2	<i>Stability regions for implicit Runge-Kutta methods</i>	42
	Problems	43

## **3 Systems of Equations and Equations of Order Greater than One** 45

3.1	Application of One-Step Techniques to Systems of Equations	46
3.2	Reduction of a Higher Order Equation to a System of First Order Equations	47
3.3	Direct Methods for Higher Order Equations	47
3.3.1	<i>Taylor's series methods</i>	48
3.3.2	<i>Runge-Kutta methods</i>	48
	Problems	50

## **4 Convergence, Error Bounds, and Error Estimates for One-Step Methods** 52

4.1	Vector and Matrix Norms	53
4.2	Existence and the Lipschitz Condition	54
4.3	Convergence and Stability	55
4.4	Error Bounds and Order of Convergence	59
4.5	Asymptotic Error Estimates	61
4.5.1	<i>The perturbation due to the numerical approximation</i>	64

4.6 General Application of Error Bound and Estimate Theorems 66
4.6.1 <i>Taylor's series methods</i> 67
4.6.2 <i>Runge-Kutta methods</i> 67
4.6.3 <i>The need for continuous derivatives</i> 68
4.7 Variable Step Size 68
Problems 70

## **5** The Choice of Step Size and Order 72

5.1 The Choice of Order 73
5.2 Choice of Step Size 76
5.3 The Practical Control of Errors 79
5.4 Estimation of the Local Truncation Error 81
5.4.1 <i>Step doubling</i> 81
5.4.2 <i>The Runge-Kutta-Merson method</i> 85
Problems 86

## **6** Extrapolation Methods 87

6.1 Polynomial Extrapolation 87
6.1.1 <i>Example of polynomial extrapolation</i> 89
6.1.2 <i>Round-off effects</i> 89
6.1.3 <i>Stability</i> 89
6.1.4 <i>Higher order methods</i> 92
6.2 Rational Function Extrapolation 93
Problems 100

## **7** Multivalue or Multistep Methods—Introduction 102

7.1 Multivalue Methods 103
7.2 Explicit Multistep Methods—the Adams-Bashforth Method 104

7.2.1	<i>Generating functions for the coefficients</i>	108
7.2.2	<i>Two other techniques for deriving the Adams-Bashforth methods</i>	109
7.2.3	<i>Truncation error in the Adams-Bashforth methods</i>	110
7.3	<b>Implicit Multistep Methods—the Adams-Moulton Method</b>	111
7.4	<b>Predictor-Corrector Methods</b>	114
	<b>Problems</b>	115

**8****General Multistep Methods,  
Order, and Stability****116**

8.1	<b>The Order of a Multistep Method</b>	117
8.1.1	<i>Determination of <math>\alpha</math> if <math>\beta</math> is given and vice versa</i>	119
8.1.2	<i>The principal root of a method</i>	120
8.2	<b>Milne's Method</b>	121
8.2.1	<i>Stability of Milne's method for <math>y' = \lambda y</math></i>	122
8.3	<b>Stability of General Multistep Methods</b>	124
8.3.1	<i>Absolute stability</i>	126
8.4	<b>The Class of Three-Step Methods of Order Four</b>	132
	<b>Problems</b>	134

**9****Multivalue  
Methods****136**

9.1	<b>Behavior of the Error</b>	137
9.1.1	<i>Stability of predictor-corrector methods</i>	138
9.2	<b>Equivalent Methods</b>	142
9.2.1	<i>Factors affecting the choice of representation</i>	143
9.2.2	<i>Adams' methods in the backward difference representation</i>	147
9.2.3	<i>The Nordsieck form of Adams' method</i>	148
9.2.4	<i>Modified multistep methods</i>	150
9.2.5	<i>Higher order equations</i>	151
9.3	<b>Automatic Control of Step Size and Order</b>	155
	<b>Problems</b>	167

<b>10</b>	<b>Existence, Convergence, and Error Estimates for Multivalue Methods</b>	<b>169</b>
	10.1 Convergence and Stability 172	
	<i>10.1.1 Stability</i> 174	
	<i>10.1.2 Order</i> 180	
	<i>10.1.3 Consistency and convergence</i> 187	
	10.2 The Maximum Order of a Stable Multistep Method 194	
	10.3 Existence of Stable Multivalue Methods 198	
	10.4 Improved Order for Normal Form Multivalue Methods 200	
	10.5 Asymptotic Behavior of the Error 204	
	Problems 207	
<b>11</b>	<b>Special Methods for Special Problems</b>	<b>209</b>
	11.1 Stiff Equations 209	
	<i>11.1.1 Multistep methods</i> 212	
	<i>11.1.2 A-stable methods</i> 220	
	<i>11.1.3 Methods based on a knowledge of <math>\delta f/\delta y</math></i> 222	
	11.2 Algebraic and Singular Equations 223	
	11.3 Parameter Estimation 227	
	Problems 229	
<b>12</b>	<b>Choosing a Method</b>	<b>231</b>
	12.1 Effect of Future Developments 235	
	<b>Bibliography</b>	<b>237</b>
	<b>Index</b>	<b>251</b>
