

CONTENTS

Chapter 1	PRELIMINARIES	1
1.1	Introduction	1
1.2	Initial Value Problems	2
1.3	Difference Equations	4
1.4	Numerical Methods	8
1.5	Stability Analysis	13
1.6	Convergence	18
1.7	Boundary Value Problems	21
1.8	Approximate Methods	23
1.9	Partial Differential Equations	25
1.10	Parabolic and Hyperbolic Equations	28
1.11	Elliptic Equations	34
Chapter 2	SINGLESTEP METHODS	37
2.1	Introduction	37
2.2	Taylor's Series Method	38
2.3	Runge-Kutta Methods	41
2.4	Extrapolation Method	53
2.5	Stability Analysis	58
2.6	Implicit Runge-Kutta Methods	63
2.7	Attainable Order of Runge-Kutta Methods	68
2.8	Obrechhoff Methods	71
2.9	Systems of Differential Equations	77
2.10	Higher Order Differential Equations	80
Chapter 3	MULTISTEP METHODS	94
3.1	Introduction	94
3.2	Explicit Multistep Methods	95
3.3	Implicit Multistep Methods	103
3.4	Multistep Methods Based on Differentiation	106
3.5	General Linear Multistep Methods	107
3.6	Predictor-Corrector Methods	126
3.7	Hybrid Methods	140
3.8	Higher Order Differential Equations	148

Chapter 4	FINITE DIFFERENCE METHODS FOR BOUNDARY VALUE PROBLEMS IN ORDINARY DIFFERENTIAL EQUATIONS	1
4.1	Introduction 160	
4.2	Difference Schemes 160	
4.3	Second Order Linear Boundary Value Problems 170	
4.4	Nonlinear Boundary Value Problems 179	
4.5	Convergence of Difference Schemes 185	
4.6	Fourth Order Linear Boundary Value Problems 188	
4.7	Linear Eigenvalue Problems 193	
4.8	Results from Computation 196	
Chapter 5	DIFFERENCE METHODS FOR PARABOLIC PARTIAL DIFFERENTIAL EQUATIONS	2
5.1	Introduction 211	
5.2	Difference Schemes for Equations in One Space Dimension with Constant Coefficients 213	
5.3	Implementation of Difference Schemes 229	
5.4	Stability Analysis and Convergence of Difference Schemes 238	
5.5	Difference Schemes for Equations in Two Space Variables with Constant Coefficients 245	
5.6	ADI Methods for Equations in Two Space Variables with a Mixed Derivative 255	
5.7	ADI Methods for Equations in Three Space Variables with Constant Coefficients 263	
5.8	Difference Schemes for Equations with Variable Coefficients 268	
5.9	Difference Schemes for Fourth Order Equations 284	
5.10	Nonlinear Parabolic Equations 293	
Chapter 6	DIFFERENCE METHODS FOR SECOND ORDER HYPERBOLIC PARTIAL DIFFERENTIAL EQUATIONS	31
6.1	Introduction 313	
6.2	Difference Schemes for Hyperbolic Equations in One Space Dimension with Constant Coefficients 313	
6.3	Difference Schemes for Equations in Two Space Variables with Constant Coefficients 317	
6.4	Difference Schemes for Equations in Three Space Variables with Constant Coefficients 323	

6.5	Difference Schemes for Equations with Variable Coefficients	326
6.6	Locally One Dimensional (LOD) Methods	331
Chapter 7	DIFFERENCE METHODS FOR ELLIPTIC PARTIAL DIFFERENTIAL EQUATIONS	340
7.1	Introduction	340
7.2	Difference Schemes	340
7.3	Dirichlet Problem	350
7.4	Iterative Methods	353
7.5	Alternating Direction Method	364
7.6	Neumann Problem	369
7.7	Third Boundary Value Problem	371
7.8	Biharmonic Equation	375
Chapter 8	FINITE ELEMENT METHODS	381
8.1	Introduction	381
8.2	Approximate Methods	382
8.3	Finite Elements	390
8.4	Boundary Value Problems	395
8.5	Initial Value Problems	398
	BIBLIOGRAPHY	405
	ANSWERS AND HINTS TO THE PROBLEMS	413
	INDEX	435
