## PART I - CONTROL

<b>Chapter 1 System Dynamics and Differential Equations</b>	
1.1 Introduction. ....	13
1.2 Some System Equations .....	13
1.3 System Control. ....	19
1.4 Mathematical Models and Differential Equations .....	21
1.5 The Classical and Modern Control Theory .....	23
<b>Chapter 2 Transfer Functions and Block Diagrams</b>	
2.1 Introduction. ....	27
2.2 Review of Laplace Transforms .....	27
2.3 Applications to Differential Equations. ....	38
2.4 Transfer Functions .....	39
2.5 Block Diagrams .....	41
<b>Chapter 3 State-Space Formulation</b>	
3.1 Introduction. ....	49
3.2 State-Space Forms .....	49
3.3 Using the Transfer Function to Define State Variables .....	57
3.4 Direct Solution of the State Equation .....	62
3.5 Solution of the State Equation by Laplace Transforms .....	70
3.6 The Transformation from the Companion to the Diagonal State Form. ....	73
3.7 The Transfer Function from the State Equation .....	78
<b>Chapter 4 Transient and Steady State Response Analysis</b>	
4.1 Introduction. ....	83
4.2 Response of First Order Systems .....	84

4.3	Response of Second Order Systems. . . . .	86
4.4	Response of Higher Order Systems . . . . .	92
4.5	Steady State Error. . . . .	95
4.6	Feedback Control . . . . .	99
<b>Chapter 5 Stability</b>		
5.1	Introduction. . . . .	107
5.2	The concept of Stability . . . . .	107
5.3	Routh Stability Criterion . . . . .	110
5.4	Introduction to Liapunov's Method . . . . .	116
5.5	Quadratic Forms . . . . .	126
5.6	Determination of Liapunov's Functions. . . . .	128
5.7	The Nyquist Stability Criterion . . . . .	131
5.8	The Frequency Response . . . . .	131
5.9	An Introduction to Conformal Mappings . . . . .	138
5.10	Applications of Conformal Mappings to the Frequency Response .	142
<b>Chapter 6 Controllability and Observability</b>		
6.1	Introduction. . . . .	149
6.2	Controllability . . . . .	149
6.3	Observability . . . . .	155
6.4	Decomposition of the System State . . . . .	157
6.5	A Transformation into the Companion Form . . . . .	165
<b>Chapter 7 Multivariable Feedback and Pole Location</b>		
7.1	Introduction. . . . .	171
7.2	State Feedback of a SISO System. . . . .	171
7.3	Multivariable Systems. . . . .	175
7.4	Observers. . . . .	188
<b>PART II - OPTIMAL CONTROL</b>		
<b>Chapter 8 Introduction to Optimal Control</b>		
8.1	Control and Optimal Control. . . . .	197
8.2	Examples. . . . .	197
8.2.1	Economic Growth . . . . .	197
8.2.2	Resource Depletion . . . . .	200
8.2.3	Exploited Populations . . . . .	200
8.2.4	Advertising Policies . . . . .	201
8.2.5	Rocket Trajectories . . . . .	203
8.2.6	Servo Problem . . . . .	204
8.3	Functionals . . . . .	204
8.4	The Basic Optimal Control Problem . . . . .	206

<b>Chapter 9</b>	<b>Variational Calculus</b>	
9.1	The Brachistochrone Problem . . . . .	209
9.2	Euler Equation . . . . .	210
9.3	Free End Conditions . . . . .	219
9.4	Constraints. . . . .	222
<b>Chapter 10</b>	<b>Optimal Control with Unbounded Continuous Controls</b>	
10.1	Introduction. . . . .	231
10.2	The Hamiltonian . . . . .	233
10.3	Extension to Higher Order Systems. . . . .	235
10.4	General Problem . . . . .	238
<b>Chapter 11</b>	<b>Bang-Bang Control</b>	
11.1	Introduction. . . . .	245
11.2	Pontryagin's Principle. . . . .	249
11.3	Switching Curves. . . . .	254
11.4	Transversality Conditions . . . . .	258
11.5	Extension to the Boltza Problem . . . . .	261
<b>Chapter 12</b>	<b>Applications of Optimal Control</b>	
12.1	Introduction. . . . .	267
12.2	Economic Growth . . . . .	267
12.3	Resource Depletion . . . . .	270
12.4	Exploited Populations . . . . .	274
12.5	Advertising Policies . . . . .	276
12.6	Rocket Trajectories . . . . .	279
12.7	Servo Problem . . . . .	281
<b>Chapter 13</b>	<b>Dynamic Programming</b>	
13.1	Introduction. . . . .	289
13.2	Routing Problem. . . . .	289
13.3	D.P. Notation . . . . .	291
13.4	Examples. . . . .	295
	13.4.1 Resources Allocation . . . . .	295
	13.4.2 Production Planning. . . . .	297
13.5	Bellman's Equation . . . . .	300
13.6	The Maximum Principle . . . . .	307
<b>Appendix 1</b>	<b>Partial Fractions . . . . .</b>	<b>315</b>
<b>Appendix 2</b>	<b>Notes on Determinants and Matrices</b>	
A2.1	Determinants . . . . .	319
A2.2	Partitioned Matrices. . . . .	322

A2.3	Eigenvectors and Eigenvalues. . . . .	323
A2.4	The Companion Matrix. . . . .	325
A2.5	The Cayley–Hamilton Theorem . . . . .	326
A2.6	Linear Dependence and the Rank of a Matrix . . . . .	328
<b>Solutions to Problems . . . . .</b>		<b>331</b>
<b>Bibliography. . . . .</b>		<b>393</b>
<b>Index . . . . .</b>		<b>397</b>
