

# CONTENTS

## **Editor's Introduction 5**

### **1. Overview 7**

### **2. Statistics 7**

Common Sense Perspective on Statistics 9

Formal Criteria 10

### **3. Conceptual Framework 12**

Populations, Parameters, Samples, and Statistics 12

Probability 12

Sampling Distributions 19

Sampling 23

Common Theoretical Distribution 25

Using Probability Distributions 29

Logic of Hypothesis Testing 34

### **4. Tests of Significance 44**

Comparing Whole Distributions—Goodness of Fit 44

Central Tendency 59

Two Sample Tests 61

K-Sample Test 64

Existence of a Relationship 67

Regression and Correlation 69

Other Tests of Significance 71

Confidence Intervals 73

The Interpretation of Significance Tests 76

Questions of the Utility of Tests of Significance 78

Technical Issues 78

Philosophy of Science Issues 83

Other Interpretations 85

Arguments for Tests of Significance 87

Conclusion 87

## **Notes 88**

## **References 92**
